Introduction

Since 1985, the Upper Valley Lake Sunapee Regional Planning Commission (UVLSRPC) has been committed to a proactive transportation planning program. This Unified Planning Work Program (UPWP) continues the Commission's efforts to expand planning capacity, responsibilities, and abilities to ensure that the UVLSRPC's transportation planning efforts become more comprehensive and effective to meet the demands of the Moving Ahead for Progress in the 21st Century Act (MAP-21) Hampshire Long-Range Transportation Plan, and the region's municipalities. These efforts will continue to result in a high level of regional effectiveness, both as a stronger partner with NHDOT and a more capable advisor to our member communities.

This proposal outlines tasks to be completed over the next two fiscal years, FY 2014 and FY 2015. A key element is our continued emphasis on planning assistance to member communities, so that transportation projects and policy decisions can be formulated at the local level, prioritized at the regional level, and finalized at the State level. MAP-21 assures a broad range of public involvement in the project planning and development process. The UVLSRPC believes that this UPWP proposal puts the region in a strong position to meet this objective and enables our office to better plan for the future, to increase public participation and to improve the capabilities to collect, analyze, and present transportation data.

The Upper Valley Lake Sunapee Regional Planning Commission and the New Hampshire Department of Transportation recognize the inextricable relationship between transportation and land use. A primary goal of this UPWP is to develop a transportation planning program that recognizes this relationship, and seeks to integrate transportation and land use planning. Special emphasis is placed on providing technical assistance to communities to further investigate the relationship between land development and travel demand as well as the relationship between site design and traffic flow patterns. Educating communities about transportation demand management, and incorporating these elements into communities master plans, will be essential products of this Unified Planning Work Program. The UVLSRPC strongly supports the use of Context Sensitive Solutions as a means of integrating land use policies, transportation needs, and environmental concerns to provide transportation planning solutions in the context of individual community objectives.

Pursuant to federal requirements, a "Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity (Executive Solicitations for all Federal and federally-assisted construction contracts and subcontracts in excess of \$10,000. The Notice, which is published at 41 CFR 60-4.2, informs the contractor/bidder of the affirmative action requirements imposed under Executive Order 11246, including the specified goals for minority and female participation, for New Hampshire the target is 6.9%. UVLSRPC is an equal opportunity and affirmative action employer that does not discriminate in employment and ensures equal employment opportunity for all persons regardless of their race, color, religion, sex, national origin, or status as a qualified individual with a disability or Vietnam era or other protected veteran.
