Consolidated Federal Aid
400-500870 Highway Contract Payments \$142,117.75

EXPLANATION

This project is part of the annual Federal Resurfacing Program. The work involves primarily reclaiming the existing pavement and repaving with 4 to 4 1/2" of new pavement. Both sections show deteriorating pavement conditions, areas of high distress, and generally poor pavement conditions. The primary focus of the NH Route 9 portion of the project is to extend the life of the existing pavement structure. For NH Route 10, the main purpose of this portion is to rehabilitate the pavement structure to match the adjacent sections of NH Route 10.

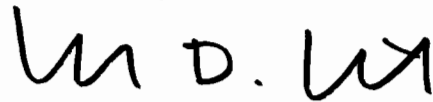

The contingency amount is proposed to be 5% of the contract amount. This is a two season project requiring a winter shutdown, and project limits cannot be adjusted to offset quantity over runs.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 80% federal funds with 20% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Christopher D. Clement, Sr.
Commissioner

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: This is a pavement rehabilitation project on a 2.6 mile section of NH Route 9 in Keene/Roxbury and 0.3 mile section of NH Route 10 in Swanzey.

The Keene-Roxbury portion of the project begins on NH Route 9, approximately 600 feet west of the NH Route 10 intersection, and proceeds east approximately 2.6 miles to a pavement joint approximately 650 feet east of the Keene-Roxbury Town Line. The existing pavement will be reclaimed 12" deep and repaved with 4 1/2 inches of new pavement. The project also includes replacement of existing guardrail with new steel beam/steel post guardrail, rehabilitation of drainage structures, and installation of underdrain in spot locations.

The Swanzey portion of the project begins on NH Route 10, approximately 1,400 feet north of the Base Hill Rd intersection, and proceeds north approximately 0.3 miles to a pavement joint approximately 1,500 feet south of the Swanzey-Keene Town Line. The existing pavement will be cold planed to remove excess pavement, and the remaining pavement and portions of the gravel shoulders will then be reclaimed and repaved with 4 inches of new pavement, resulting in two 11' travel lanes with 4' paved shoulders.

FEDERAL FUNDING: Construction funding is 80% Federal Funding with the anticipated utilization of Turnpike Toll Credits as the State's 20% match.

CONTINGENCY: The contingency requested is approximately 5% of the contract amount. This is two season project requiring a winter shutdown, and project limits cannot be adjusted to offset quantity over runs.

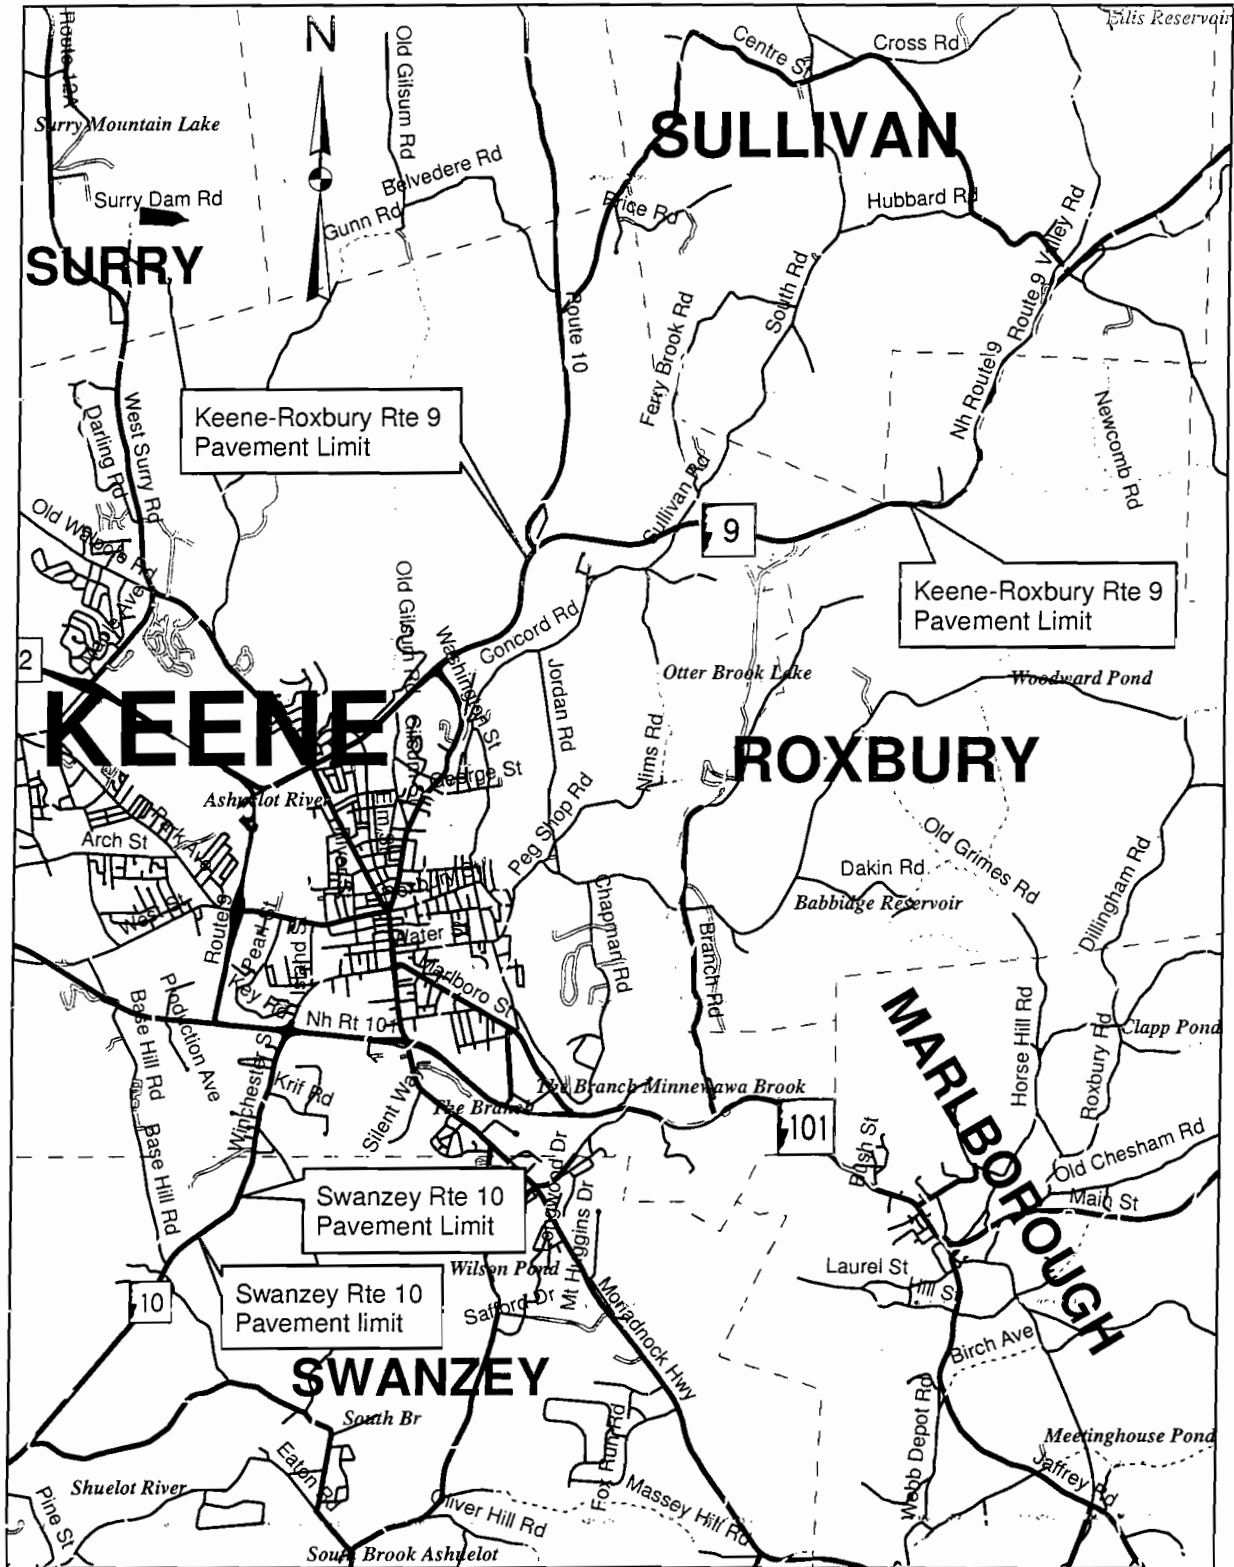

PROJECT INITIATED: The project was initiated through the State 10-Year Transportation Improvement Program, and is part of the Federal Resurfacing Program.

PROJECT EXPLANATION: The primary focus of the NH Route 9 portion of the project is to extend the life of the existing pavement structure. For NH Route 10, the main purpose of this portion is to rehabilitate the pavement structure to match the adjacent sections of NH Route 10.

TRAFFIC IMPLICATION: Reclaim operations will use alternating one-way traffic during work hours. No detours are proposed. Lane closures on NH 10 will not be allowed during peak commuter hours. Lane closures on NH 9 will be limited to 1 mile in length.
