(VC #155097), Laconia, NH in the amount of \$6,600 to complete the Aerial Tramway Motor DC Generator reconditioning at Cannon Mountain Ski Area upon Governor and Executive Council approval through September 19, 2014. 100% Capital Funds

EXPLANATION

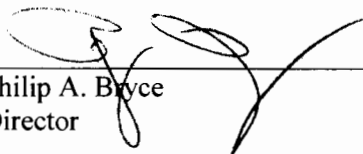

The generator drive system was installed during the original construction to power the main DC motor for the Cannon Aerial Tramway. Test results in 2012 revealed a significant degradation of the winding insulation and substantial winding continuity to ground. Due to these results it is imperative to recondition the 375kW 1780RPM DC generator and to have it in full working order in case of any unscheduled stops which could lead to disastrous consequences in transporting guests to and from the summit station.

On April 7, 2014 an invitation to submit bids for the "Aerial Tramway (Motor) DC Generator (Drive System) Reconditioning" was advertised on the Department of Administrative Services' website. NH Electric Motors was the lowest bid received; their skilled knowledge and understanding of the project also positions them as the best vendor to carry out the job. Attached for your information is a copy of the bid tabulation

The Attorney General's Office has reviewed and approved this contract as to form, substance and execution.

Respectfully submitted,

Concurred,

Philip A. Bryce
Director

- 8.2.4 treat the Agreement as breached and pursue any of its remedies at law or in equity, or both.
