EXPLANATION

During recent operations at the Mendums Pond Dam to refill the lake to its summer recreation level, a leak was observed at the base of the shaft of the concrete outlet works of the dam. The leak was of such size that it carried earthen material from the dam, which threatened the stability of the dam and, if left unrepaired, could lead to its failure. The seriousness of the problem required immediate sealing of the leak, necessitating this Retroactive, Sole Source request to retain the services of contractor who specializes in sealing leaks through concrete in dams. The contractor mobilized to the site on April 20, 2015 and sealed the original leak, but upon doing so discovered further serious leaks which also required immediate attention. The total cost of all these repairs, which are nearing completion, is \$41,250.

Mendums Pond Dam is 175 years old, and has been owned and operated by the State of New Hampshire since 1955. The dam is classified as a High Hazard Dam. Failure of the dam would cause the failure of Nottingham Lake Dam downstream and would inundate State Route 4 and several town roads in Nottingham, Lee, and Durham, as well as flood many houses and buildings in these areas. Failure of the dam would also result in the loss of this important 265-acre recreational resource in Barrington and Nottingham, as well as the loss of the 35-acre Nottingham Lake, around which many homes are located.

In view of the urgency of the repairs, DES contracted with O'Hara Industrial Services, a specialty contractor who had previously successfully performed similar emergency leak repairs at the

Amoskeag Dam for Public Service of New Hampshire, at the Sunrise Lake Dam, and at the state-owned Goose Pond Dam for the DES Dam Bureau.

The contractor's fee for the repairs is \$41,250, which, based on the Dam Bureau's experience with similar projects, is fair and reasonable for the scope of work included.

We respectfully request your approval.
