Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non-Federal	

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Merrimack River watershed in April, 2016. The FLT application was received and on November 28, 2016, DES

Page 2

announced the decision to fund the FLT project in the Merrimack River watershed. The project proposed by the FLT was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

The project is to permanently protect a 7.6-acre property along the South Branch of the Piscataquog River in Frankestown, and protect 33-acres with conservation easements donated by abutting landowners in support of the project. The project will permanently protect 2,155 linear feet of the South Branch of the Piscataquog River, its associated riparian and upland forest as well as eight acres of wetlands at the confluence of Brennan Brook. The Brennan Brook-South Branch Confluence Project connects to and enhances the ecological function of over 4,500 acres of biologically diverse protected land. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Clark B. Freise, Assistant Commissioner

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.
