Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal	

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Merrimack River watershed in April, 2015. Four applications were received and on October 29, 2015, DES announced the decision to fund the Bear-Paw project in the Merrimack River watershed. The project proposed by Bear-Paw was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

The project in Pittsfield continues efforts of Bear-Paw to conserve land in the Wild Goose Pond and Crooked Run watersheds. The proposed conservation easements include 38 wetland areas totaling over 68 acres (including 12 vernal pools), over one mile of riparian habitat, and 1,000 feet of frontage on Wild Goose Pond. The project includes six restoration sites on the Bachelder property which are associated with woods road culvert crossings. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Clark B. Freise, Assistant Commissioner

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.

EXHIBIT A
SCOPE OF SERVICES

A. Project Title: 2015_Merrimack_Wild Goose Pond_Pittsfield

B. Project Tasks, Objectives, Scope of Work, and Monitoring Plan:

Task 1. Purchase/Close Conservation Easements on Wallman and Bachelder Properties

Task 2. Perform Wetland Restoration according to the 2015_Merrimack_Wild Goose Pond_Pittsfield wetland restoration plan as revised May 17, 2017 (attached).

C. Objectives

A total of four Wetland Restoration Sites were identified on the site. These sites are farm/woods road stream crossings with undersized or failed culverts. Their location and impact to wetland-stream flow are important. Improperly sized culverts impede flow and impact the hydrology of the stream. Restoration will include removal of fill and installation of wooded bridges or stone fords (conforming to the NH Stream Crossing Guidelines) resulting in the restoration of 2,725 square feet of stream bed.
