 And the Honorable Council  
 State House  
 Concord, New Hampshire 03301

**REQUESTED ACTION**

Authorize the Department of Environmental Services (DES) to enter into a contract with J.W.C. Enterprises, Inc. (VC# 156080) of Milford, New Hampshire in the total amount of \$570,000, to provide sampling containers and laboratory analytical services, effective as of July 1, 2018 through June 30, 2021, upon Governor and Council approval. Funding is 35% MtBE Remediation Funds, and 65% Drinking Water and Groundwater Trust Fund.

Funding is available in the accounts listed below with the authority to adjust encumbrances in each of the state fiscal years through the Budget Office if needed and justified. Funding for FY 2020 - 2021 is contingent upon the availability and continued appropriation of funds.

<b>Total</b>	<b>\$300,000</b>	<b>\$130,000</b>	<b>\$140,000</b>	<b>\$570,000</b>

**EXPLANATION**

This contract is to provide sampling containers and analytical services for many different manmade and naturally occurring contaminants to evaluate the presence of these contaminants in groundwater and drinking water sources in New Hampshire communities.

Since August of 2014, the MtBE Remediation Bureau has been collecting samples for volatile organic compound (VOC) analysis to assess and monitor methyl-tert-butyl ether (MtBE) impacts to drinking water supply wells. More than 6,000 water supply wells have been assessed since program inception. Detectable levels of MtBE are identified in approximately 15% of the wells sampled. The existing laboratory services contract for VOC analysis will expire on June 30, 2018. This contract will allow MtBE Settlement Funds to continue to be used to assess VOCs in drinking water supply wells throughout the state of NH.

In addition to MtBE Settlement Funds, The Drinking Water and Groundwater Trust Fund, established under RSA 485-F, is intended to provide for the protection, preservation, and enhancement of the drinking water and groundwater resources of the state. This work will include a statewide drinking water quality sampling program to better understand the distribution of per- and polyfluoro alkylated substances (PFAS) and a suite of other drinking water contaminants. The New Hampshire Drinking Water and Groundwater Advisory Commission authorized the statewide water quality sampling program at its meeting on November 2, 2017.

This contract is necessary to: (1) continue to allow the DES MtBE Remediation Bureau to assess and monitor MtBE in private drinking water wells in order to identify at-risk residents and arrange for the long term provision of point of entry treatment systems or connection to alternate water supplies; and to (2) address the enabling legislation for the Trust Fund that charges DES, in part, to "measure levels of contamination statewide . . ." Work performed under this contract will provide vital information to DES in prioritizing its work to protect the more than 60% of citizens who rely on groundwater as their primary drinking water source.

Three analytical laboratory contracts are necessary to address the anticipated volume of analytical work and assure timely and responsive service. Two additional contracts for analytical services are being submitted under separate cover.

DES issued a Request for Bids on January 11, 2018, that included a requirement for submission of a qualifications package with each bid. The Request for Bids was posted on the Department of Administrative Services Purchase and Property website and was mailed out to 78 laboratories known to provide analytical services in New Hampshire.

Nine laboratories submitted bid packages. The bid packages were reviewed by a committee consisting of three DES staff to determine completeness and the bidder's qualifications to provide the required services. The bid packages were scored in accordance with the Award Criteria specified in the Request for Bids. Three laboratories were selected for contract awards based on the scores and pricing provided in Attachment A.

J.W.C. Enterprises, Inc. holds the requisite accreditations and has demonstrated that it has the staffing and laboratory capabilities to perform the analyses in accordance with the specifications set forth by DES.

The contract has been approved by the Department of Justice as to form, substance, and execution.

We respectfully request your approval.

  
Robert R. Scott, Commissioner

3. Contractor shall provide all necessary materials, including sample containers, coolers, preservatives, sample container labels, chain of custody forms, field blanks, trip blanks and air sampling media for collecting the samples. The containers shall be clean and conform to EPA quality control requirements and procedures, including preservation in accordance with applicable methodology. When requesting sampling equipment, NHDES will specify the number of trip blanks and field blanks required.
4. Contractor shall accept chain of custody forms that are developed by NHDES.
5. Contractor shall follow and maintain industry standard chain-of-custody procedures.
6. Contractor shall provide as-needed consultation on collection methods and interpretation of reports at no additional cost to NHDES.
7. Contractor shall provide technical support in the event that there are discrepancies in testing results among the labs awarded contracts. This technical support shall include investigation of the cause of the discrepancies.
8. Contractor shall pick up, or arrange for third party pick up, of samples at the Department of Environmental Services, 29 Hazen Drive, Concord, New Hampshire upon request by the NHDES at no additional cost to NHDES. 9. Contractor shall provide NHDES with a complete written report of its analyses as required under the scope of work to be performed. Analytical reports shall be formatted in accordance with The NELAC Institute (TNI) standards. Written analytical reports shall be prepared by Contractor and sent electronically in .pdf format to NHDES within five working days after completion of the sample analyses.
10. Contractor shall become an authorized data provider with NHDES Onestop and provide all analytical reports in a Microsoft Excel format that is compatible with the NHDES Environmental Monitoring Database (EMD) reporting templates. Electronic submittals shall be within ten working days after completion of the sample analyses. The Microsoft Excel documents that are used to submit data must not contain any abbreviations, omissions, or alterations of the information provided by NHDES to Contractor on the chain of custody form. The Excel template may be found on the NHDES web site at [http://des.nh.gov/organization/divisions/water/wmb/emd/documents/activity\\_template.xls](http://des.nh.gov/organization/divisions/water/wmb/emd/documents/activity_template.xls).
11. Contractor shall send reports directly to the well owner in instances where analyses are paid for by the well owner. The reports shall be sent electronically by email or regular mail using information provided by NHDES. The reports shall be mailed within ten working days of sample analysis with copies to NHDES, as specified in items 9 and 10 above, when appropriate permission has been obtained from the well owner.
12. Contractor shall report results for Group 2 and Group 3A of Section A of this Exhibit in units that are compatible with the NHDES Be Well Informed web application. This application may be viewed at: <http://xml2.des.state.nh.us/DWITool/>
13. Contractor shall include a link to the NHDES Be Well Informed web application when sending results to well owners as specified in item 12 above.
14. Unless otherwise specified or requested by NHDES, the standard turnaround time for analysis and reporting of results shall be three weeks (fifteen working days) from the date of Contractor receipt of the samples as documented on the corresponding chain of custody form.
15. Contractor shall perform expedited analyses on certain samples, as determined by NHDES; e-mailed reports shall be required in less than three working days of receipt of such samples.
16. Contractor shall retain and store samples at 4°C until such time as they are disposed in accordance with established laboratory policy, unless specifically requested by NHDES to retain samples for a longer period of time or to return samples to NHDES under

17. Contractor shall perform all Quality Assurance/Quality Control (QA/QC) measures as per the requested method and per NELAC Institute (TNI) standards. Full documentation of QA/QC is not required with the final data package unless specified by NHDES in advance of sample submission.
18. Contractor shall make available QA/QC data at the request of the NHDES. This information must be retrievable from Contractor's Laboratory Information Management System for a period not less than five years and be available for inspection at any time by the State. Contractor shall be subject to any State Quality Assurance/Quality Control audits and inspections by the State. Contractor shall provide clarifications and details on analytical methods and reported data, as requested, by the NHDES staff or program contact submitting the sample for analysis.
19. Contractor shall report results for all analytes listed in Section A by the methodology listed and to the detection limits specified therein.
20. Contractor shall provide NHDES with estimated J-Flag detection values for all compounds down to the lowest detection limit that the equipment used to process the sample allows.
21. Contractor shall credit NHDES if samples are broken by the laboratory, not processed within analytical hold times, or fail laboratory QA/QC.
22. On occasion, NHDES may require additional analyses for constituents or methods not listed in Section A. Upon request, Contractor may be asked to provide these analyses at a quoted cost.
23. All invoices must be submitted showing unit prices. Payment will be made no later than 30 days after completion of services or after an invoice has been received at the Department's business office, whichever is later. Invoices shall be sent electronically to:
