Bureau of Construction
April 9, 2018

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with Pine Ridge Technologies, Inc. (Vendor 286308) of Wakefield, MA on the basis of a low bid of \$484,801.00 for retrofitting all signal head backplates at 184 intersections throughout the state with 2-inch fluorescent yellow retroreflective borders, from the date of Governor and Council approval through November 1, 2019 unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available in State Fiscal Year 2018 and 2019 and is contingent upon the availability and continued appropriation of funds in Fiscal Year 2020 as follows, with the ability to adjust encumbrances through the Budget Office between State Fiscal Years if needed and justified:

Funding is available as follows:	<u>FY 2018</u>	<u>FY 2019</u>	<u>FY 2020</u>
04-96-96-963515-3054 Consolidated Federal Aid			
400-500870 Highway Contract Payments	\$100,000.00	\$284,801.00	\$100,000.00

2. Further authorize that a contingency in the amount of \$33,936.07 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 7% of the contract amount.

Funding is available as follows:	<u>FY 2018</u>	<u>FY 2019</u>
04-96-96-963515-3054 Consolidated Federal Aid		
400-500870 Highway Contract Payments	\$0.00	\$33,936.07

EXPLANATION

This project is part of the State's Ten Year Transportation Improvement Plan under the Highway Safety Improvement Program and the Intersection Safety Improvement Plan. The project retrofits all signal head backplates at 184 intersections throughout the state with 2-inch fluorescent yellow retroreflective borders. This will be accomplished by replacing outdated signal heads with new heads including backplates that have fluorescent yellow retroreflective borders, replacing damaged or unacceptable backplates with new backplates that have fluorescent yellow retroreflective borders, or adding fluorescent yellow retroreflective tape to existing backplates. Work will also include upgrading existing signals to meet current MUTCD standards through installation of additional signal heads, new LED

indications, new indication visors, and/or altering vertical and/or lateral placement of signal heads on existing mast arms or poles.

The project is part of a recommended series of intersection improvements as described in the Intersection Safety Improvement Plan. This project will provide 2-inch fluorescent yellow retroreflective borders on signal heads for improved visibility and safety as well as provide minor corrections to meet MUTCD compliance. This project, Phase Three of Three, will upgrade 184 (all remaining state-maintained) signalized intersections throughout the State in all six districts.

The Contingency amount is proposed to be 7% of the contract amount. Due to the nature of the retrofit work required under this contract as well as the number and diversity of project locations, there could be items unaccounted for to complete some installations.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 80% federal funds with 20% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Victoria F. Sheehan
Commissioner

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: The project retrofits all signal head backplates at 184 intersections throughout the state with 2-inch fluorescent yellow retroreflective borders. This will be accomplished by replacing outdated signal heads with new heads including backplates that have fluorescent yellow retroreflective borders, replacing damaged or unacceptable backplates with new backplates that have fluorescent yellow retroreflective borders, or adding fluorescent yellow retroreflective tape to existing backplates. Work will also include upgrading existing signals to meet current MUTCD standards through installation of additional signal heads, new LED indications, new indication visors, and/or altering vertical and/or lateral placement of signal heads on existing mast arms or poles.

FEDERAL FUNDING: 90% (Highway Safety Improvement Program (HSIP)) utilizing Turnpike Toll Credits for the State's 10% match.

CONTINGENCY: The Contingency amount is proposed to be 7% of the contract amount. Due to the nature of the retrofit work required under this contract as well as the number and diversity of project locations, there could be items unaccounted for to complete some installations.

PROJECT INITIATED: Highway Safety Improvement Program (HSIP) and Intersection Safety Improvement Plan (ISIP)

PROJECT EXPLANATION: The project is part of a recommended series of intersection improvements as described in the Intersection Safety Improvement Plan. This project will provide 2-inch fluorescent yellow retroreflective borders on signal heads for improved visibility and safety as well as provide minor corrections to meet MUTCD compliance. This project, Phase Three of Three, will upgrade 184 (all remaining state-maintained) signalized intersections throughout the State in all six districts.

TRAFFIC IMPLICATIONS: Work that requires lane closures shall be restricted to off-peak hours. Some night work will be required, as specified. Every effort shall be made to maintain traffic lanes.
