**MEMORANDUM OF AGREEMENT AMONG
THE COMMUNITY COLLEGE SYSTEM OF NEW HAMPSHIRE,
THE UNIVERSITY SYSTEM OF NEW HAMPSHIRE, AND
THE NEW HAMPSHIRE DEPARTMENT OF EMPLOYMENT SECURITY,
ECONOMIC AND LABOR MARKET INFORMATION BUREAU.**

This Agreement, made the 1st day of October, 2018, is among the Community College System of New Hampshire (CCSNH), which represents a consortium of public postsecondary colleges including: White Mountains Community College, (Berlin), River Valley Community College (Claremont), NHTI-Concord's Community College, Lakes Region Community College (Laconia), Manchester Community College, Nashua Community College, and Great Bay Community College (Stratham); the University System of New Hampshire (USNH), which represents its member public postsecondary colleges: University of New Hampshire (UNH), Plymouth State University (PSU), Keene State College (KSC), and Granite State College (GSC); and the New Hampshire Department of Employment Security (NHES). The purpose of this Agreement is to specify the scope and method of data exchange for the express and sole purpose of allowing CCSNH and USNH, respectively, to obtain and report information concerning the placement of students in employment and their average earnings within broad industry classifications for program outcomes assessment and program planning purposes, to help determine the degree to which public postsecondary college graduates by in-state and out-of-state origin become employed in New Hampshire, and to specify remuneration for those services.

I. RECITALS:

1. New Hampshire postsecondary educational institutions maintain education records on enrollees, completers and alumnae, which include information on student demographics, programs of study, program attainment, and social security numbers. The New Hampshire Department of Employment Security maintains unemployment insurance wage records on all qualified participating employees in New Hampshire.
2. The Family Education Rights and Privacy Act (FERPA) 20 USC Section 1232g; 34 CFR Part 99 generally prohibits the disclosure of education records without the consent of students attending postsecondary educational institutions, with allowable exceptions as noted in Section I.3, below. Under FERPA, education records are defined as records directly related to a student and maintained by an educational agency or institution. The records accessed by the Community College System of New Hampshire and the University System of New Hampshire to evaluate program outcomes are education records and subject to FERPA compliance.
3. FERPA contains exceptions to the disclosure rule at 34 CFR Sections 99.31 and 99.35 permitting disclosure without prior written consent in certain circumstances, including disclosures made to authorized representatives of the educational agency or institution in connection with an audit or evaluation of federal or state supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs.
4. The New Hampshire Department of Employment Security (NHES) maintains Unemployment Insurance Compensation records for the State of New Hampshire for each quarter; this data is available two full quarters after their completion for administrative record match in authorized situations. NHES maintains the confidentiality of employer, employee, and wage data records, as outlined in RSA 282-A:118.

5. Whereas employment outcomes may serve as an indicator of academic program effectiveness, the Community College System of New Hampshire (CCSNH) and the University System of New Hampshire (USNH), under the audit/evaluation provision of FERPA, will each disclose data from their respective education records to the New Hampshire Department of Employment Security (NHES), Economic and Labor Market Information Bureau (ELMIB), acting as a designated authorized representative, as that term is defined in 34 CFR. 99.3, for the purpose of conducting the data match to identify employment/earnings outcomes for each of the respective Systems.
6. The information to be provided by all Parties to this Agreement, and the process by which it will be provided, are described in Attachment A (CCSNH/USNH Wage Record Data Match Specification). Information will be provided in an aggregate format in keeping with the requirements of RSA 282-A:118, V. In no instance will individual employee wages or employer data be disclosed for any quarter under this Agreement.

II. AGREEMENT:

1. The Community College System of New Hampshire and the University System of New Hampshire will each provide individual student information via secure transmission as described in Attachment A.
2. The New Hampshire Department of Employment Security, Economic and Labor Market Information Bureau agrees to destroy all personally identifiable information obtained as soon as the administrative data match has been completed. All versions of these data obtained from the Systems pursuant to this Agreement, whether electronic, printed, or otherwise, will be destroyed. In carrying out the provisions of this Agreement, all Parties will adhere to the confidentiality restrictions specified in Section IV.9.
3. The New Hampshire Department of Employment Security has the right to terminate this Agreement at any time for any reason with thirty (30) days prior written notice.
4. The Community College System of New Hampshire and the University System of New Hampshire have the right to terminate their respective participation in this Agreement at any time for any reason with thirty (30) days prior written notice.

This Agreement shall be in effect until June 30, 2021, and may be extended upon mutual agreement by the parties.

Attachment A: CCSNH/USNH Wage Record Data Match Specification

Summary

The project's purpose is to determine employment outcomes and average wages for graduates of the Community College System of New Hampshire (CCSNH) and the University System of New Hampshire (USNH) (both referred to as "Systems") by matching the individually identifiable information of graduated undergraduates to quarterly earnings records from the unemployment insurance covered earnings database maintained by NH Employment Security (NHES). Examples of employment outcomes may include percentage of graduates obtaining employment in NH within a certain time frame following graduation; percentage of employed graduates by academic program and by industry; percentage employed in NH by residency status (i.e., in-state vs. out-of-state resident for purpose of tuition rate). USNH and CCSNH are approaching the project separately but entering into this Agreement concurrently for efficiency of NHES records processing in order to achieve cost efficiency.

Employment outcomes have long served as an indicator of vocational program effectiveness, and they are increasingly viewed by the public and elected officials as an indicator of overall postsecondary institutional effectiveness. While there are recognized limitations in using wage data to assess effectiveness at both the institution and the program level (particularly in the liberal arts), understanding the limitations and the benefits of such an assessment is essential to engage in the public discourse around outcomes.

Data exchange between the Systems and NHES will occur up to four times per year. Specifications may be changed over time with agreement by all parties on scope and cost.

Overview of Process

Each System will submit files of records of their graduates to NHES using the NH secure FTP site system. CCSNH will send and receive a single file. USNH will send four individual files and will receive in return a combined single file. NHES will have a process in place to retrieve any uploaded files by the Systems within specific submission windows. Each System will designate authorized users who can submit a data file for processing during any given submission window. Each file submitted by System authorized users will have a unique name. Once NHES has completed processing an uploaded file, NHES will place the response file in a designated directory on the secure FTP site.

Secure FTP Process

NHES and the System will coordinate SSH keys for users to exchange data through the secure FTP site. An individual account will have access only to one designated parent folder. The parent directory will have the file permissions set so as to not allow any other folders or files to be written by the user. Both the Upload and Processed directories will have read/write/delete access for the user.

The Upload file submitted by the System will be in a quoted comma separated format with the file name in the format of YYYYMMDD.csv based on date of submission.

For example, if a file were submitted by a user to Upload directory on March 1, 2013. The file format would be 20130301.csv.

If there is an error in data in the submitted file, the user will overwrite the existing with the same name.

The Response file format from NHES in the Processed directory will be a quoted comma separated formatted file with the name format of YYYYMMDDG.csv. The file name matches the name of the original file uploaded and not the date the response file is produced and saved to the FTP site by NHES.

For the above example, the response file would be 20130301G.csv saved to the [Parent Folder] >Processed directory by NHES.

A notification email will be sent to the authorized user of the folder by NHES when the files are retrieved and saved by NHES to the secure FTP site. Each System will be responsible for developing its own process for downloading and processing the files exchanged. When an Upload file is retrieved by NHES from the Upload directory for processing, the file will be deleted by NHES from the directory. NHES will not preserve any student information between data runs. It will be at the discretion of the Systems as to which student records are uploaded during any given data submission. Users will be responsible for deleting response files from the Processed directory.

For USNH: Each of the four component institutions will upload a file containing individual records to the Upload directory on the secure FTP site. UNH Upload file will include UNHM bachelor's graduates, to be identified as UNHM. NHES will submit a group aggregated records response file to the Processed directory for download by the authorized USNH System Office user.

Submission Frequency

Wage matches can be requested at any time, with the understanding that NHES administrative wage records are not available until three full calendar months after the end of a quarter.

For example, first quarter (calendar year) wage records would not be available for matching until July 1.

File Formats

For the purpose of the file layout description, the term "student" refers to a student who has graduated from the Institution having earned, at CCSNH, a degree or certificate, or, at USNH, a bachelor's degree.

USNH,UNHM,20120,Jonas,Smith,555121212,14,14.03,0,20124

A student record may appear more than once for the purpose of identifying multiple Wage Match Quarters, in which case, identifying information fields (columns 1 through 10) can be the same for more than one Wage Match Quarter.

The Upload file must contain 12 fields in the same file across different records. A submitted file is malformed and should be rejected by NHES if it doesn't correspond to the specification.

Note: If a person has employment in more than one NAICS Industry in a quarter, they will be counted in both industries; however they will only be counted once in any given category. For example if they work at two different businesses in the same NAICS code, they will only be counted in that NAICS code once. Industry line item only returns a line if the count of employed (COL 5 is greater than 0) between the 2 and 3 digit aggregation level.

CCSNH and USNH understand that NHES will aggregate and screen data for confidentiality first at the two-digit level, then break out at the three-digit level where possible as permitted by NHES/BLMI aggregation and disclosure rules.

The group file aggregations are based on group id and match quarter.

Group File (Additional Information)

CCSNH and USNH understand that NHES will aggregate additional crossmatches of data where confidentiality screening permits. These crossmatches may include NAICS employment by Residency code and CIP employment by Residency code.

Combined, all of the above group response file specifications effectively provide for the aggregated wage record groupings identified below, with possible omissions due to NHES confidentiality requirements.
