Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Merrimack River watershed in April, 2019. The FLT application was received and on November 22, 2019, DES announced the decision to fund the FLT project in the Merrimack River watershed. The project proposed by the FLT was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the

Page 2

Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

The FLT will use the funds to purchase the 10-acre Shattuck property located along the South Branch of the Piscataquog River – a Designated River. This project will protect both upland and riparian natural communities, and contribute to local efforts to conserve land in this watershed, adding to a total 448 acres of land. This project will provide significant benefits to local wildlife and fisheries, with resident wild Eastern Brook Trout in this section of the river. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.
