

## Register Your Business Online Today

Until today, business registrations had to be mailed or hand-delivered along with payment by cash or check, but with NH QuickStart, anyone may now securely register corporations, LLCs and trade names online. When registering online, NH QuickStart users can pay with a credit card or an established ACH account.

Initially, NH QuickStart will allow users to register Trade Names, and create the following business types online: Domestic Corporation, Professional Corporation, Domestic Limited Liability Company, Domestic Professional Limited Liability Company, Foreign Corporation, Foreign Professional Corporation, Foreign Limited Liability Company and Foreign Professional Limited Liability Company.

This is also the first in a series of improvements planned to modernize the way customers interact with the Corporation Division. NH QuickStart allows users to create an account that tracks their business formation from initial submission through completion by receiving real-time notifications throughout the business filing process.

It also has the ability to keep users informed of new functionality as it becomes available through the "What's New?" and "News" links and provides frequently asked questions to guide the user through the online filing process, as well as useful links to New Hampshire business forms and laws, legacy business name search, a list of New Hampshire-registered agents and other state agencies.

In the coming months, additional improvements and features will be added to NH QuickStart, including additional business formation types, business amendments, document searching, electronic reminder notices, certificate of good standing requests and a new mobile app named NHQS available for both Android and Apple products.
