and the Honorable Council  
State House

**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (DES) to award an Aquatic Resource Mitigation (ARM) Fund grant to the Hanover Conservancy, (hereinafter "Conservancy") of Hanover, NH (Vendor Code #271351) in the amount of \$249,740.00 for the purpose of acquiring a conservation easement on land owned by Peter and Kay Shumway, effective upon G&C approval through June 30, 2018. 100% Aquatic Resource Mitigation Funds.

Funding is available in the account as follows:

	<u>FY'17</u>

Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

**EXPLANATION**

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Middle Connecticut River watershed in April, 2016. The Conservancy application was reviewed and on November 28, 2016, DES announced the decision to fund the Conservancy project in the Lower Connecticut River watershed. The project proposed by the Conservancy was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

The project permanently protects a 313-acre property that will provide connections to a large block of permanently protected lands located in the Mink Brook watershed. The parcel consists of headwater streams and a diversity of other valuable wetlands including the presence of New Hampshire Fish and Game, Wildlife Action Plan Tier I and II wildlife habitat areas. The land is unique as it is the highest elevation unprotected wildlife habitat in the town. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

Part 60), and with any rules, regulations and guidelines as the State of New Hampshire or the United States issue to implement these regulations.
