EXPLANATION

The Winnepesaukee River Basin Program (WRBP) owns and maintains a regional sewer system in the Lakes Region of New Hampshire. The system includes a number of inverted siphons and other facilities that periodically require cleaning with a sewer vactor - a large, truck-mounted vacuum device and jet-cleaner. The WRBP does not have enough need to consider purchasing a sewer vactor. Accordingly, the WRBP periodically solicits quotations for vactor services from area firms that own vactors.

This contract includes semi-annual vactoring of the five (5) inverted siphons in Franklin and Belmont, the two influent (sewage) channels at the Winnisquam pumping station in Laconia, ten (10) storm water catch basins in Franklin at the wastewater treatment plant and one at the Winnisquam pump station. Details and schedules for the work are provided in Exhibit A of the agreement. An annual contingency for unscheduled services is also included in the contract should the need arise, for example, when a sewer line blockage occurs.

A Request for Quotations (RFQ) was sent out to ten (10) firms in the area known to be able to provide the required services. The RFQ was also advertised in The Citizen of Laconia newspaper and posted on the State's Purchase and Property website. The results of the bids are as follows:

	<u>Scheduled</u> <u>Services</u>	<u>Unscheduled</u> <u>Services</u>	<u>Bid Total</u>
Marlin Environmental, Inc., Middlesex, VT	\$20,450.00	\$10,000	\$30,450.00

Araco Sewer & Drain Service, S. Easton, MA	\$58,031.22	\$10,000	\$68,031.22
Ted Berry, Livermore, NH	\$68,511.01	\$10,000	\$78,511.01
City of Laconia			No Response
Advanced Pipe Inspection, Inc., E. Dedham, MA			No Response
Berkshire Industrial Services, Melvin Village, NH			No Response
Clean Harbors, Norwell, MA.			No Response
P&H Senesac, Inc., Milton, VT			No Response
Severn Trent Pipe Services, Manchester, NH			No Response

Based on the bids, we wish to award the contract to Marlin Environmental, Inc. This company has satisfactorily performed vactor services and other services for the WRBP over the last nine-plus years. The cost limitation of the contract is the annual cost of scheduled services, plus \$2,500 per year for any necessary, unscheduled emergency services.

All of the WRBP's operating expenses are paid by the users of the system; there is no General Fund contribution to the system's operating budget.

The contract has been approved by the Department of Justice as to form, substance and execution.

We respectfully request your approval.

Thomas S. Burack, Commissioner

EXHIBIT A THE SERVICES

1.01 Scheduled Services

Cleaning of the dual influent channels at the Winnisquam Pump Station located at 202 Water Street in Laconia, removal of grit from one raw and one degrittied septage tank located at the Franklin wastewater treatment plant, several storm water catch basins, and several inverted siphons and their associated inlet and outlet chambers which are located throughout the Winnepesaukee River Basin Program's collection system. The siphons have either two or three pipes which cross under a river. On either bank of the river, there exists an access chamber to each inverted siphon to provide access for cleaning. Siphon pipe sizes vary from as small as 6" in diameter to as large as 12" in diameter. The WRBP will provide one member of its staff to accompany the contractor during all work.

Semi-annual cleaning

Semi-annual cleaning will typically be performed during the months of May and October. Your bid must include a cost for: two cleanings of the five (5) siphons; removal of grit from one (1) septage receiving and one (1) degrittied septage tank; three (3) storm water catch basins; and the pair of influent channels in fiscal year 2016 (in October of 2015 and May of 2016), in fiscal year 2017 (in October of 2016 and May of 2017), in fiscal year 2018 (October 2017 and May 2018), and in fiscal year 2019 (October 2018 and May 2019).

Note that each siphon cleaning event must include pressure washing of the inside of each siphon chamber structure on both ends of the inverted siphons as well as flushing of siphon pipes.

Semi-annual grit removal from one (1) raw septage tank and one (1) degrittied septage tank, both tanks are approximately 17 feet 6 inches in depth with an access opening of 4 feet by 4 feet. A total of approximately 2 yards have been removed each time the grit has been removed from both tanks. Contractor is responsible for removing all grit regardless of volume. The grit will be deposited on site and the WRBP will dispose of it.

There are a number of storm water catch basins which will have their sumps vactored clean. There are two (2) catch basins at the treatment plant and one (1) at the Winnisquam pump station on 202 Water Street in Laconia, which are subjected to heavier use than the others; therefore, they will be cleaned more frequently on a scheduled basis. The two (2) in Franklin and the one (1) catch basin in Laconia are to be cleaned semi-annually, at the same time as the siphon chamber cleanings.

- 1) Franklin area at Senior Haven – under the Winnepesaukee River – 1 barrel at 6 inches in diameter and 1 barrel at 10 inches in diameter approximately 530 feet long.
