#### **EXPLANATION**

The Department is requesting approval to use the Telvent DTN WeatherSentry Service as the Departmental forecasting for this upcoming winter maintenance. Bid invitations were advertised in the Manchester Union Leader on Sunday, August 18, 2019. Telvent DTN, LLC was the sole bidder for this service.

By using these services, the Transportation Management Center (TMC) has the ability to provide real time forecasting information to the Department's winter maintenance personnel. These services include the ability to communicate with live forecasters available on a 24/7 basis, to send out real time storm alert information to affected winter maintenance areas, as well as to track actual arrival and departure times of the storms which helps to validate the weather information coming through the Road and Weather Information Systems (RWIS). DTN also includes a real time traffic speed category on their map which assists DOT in visualizing how inclement weather is impacting the motoring public during storm events. They also provide location specific 72 hour tabular forecasts via e-mail to maintenance personnel across the state to assist in their planning of day to day operations.

The contract has been approved by the Attorney General as to form and execution and the Department has certified that the necessary funds are available. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Services, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

Your approval to enter into this agreement is respectfully requested.

Sincerely,

Victoria F. Sheehan Commissioner
