**Department of Environmental Services**

February 12, 2019

His Excellency, Governor Christopher T. Sununu  
 and the Honorable Council  
 State House  
 Concord, New Hampshire 03301

**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (DES) to award an Aquatic Resource Mitigation (ARM) Fund grant to the Southeast Land Trust of New Hampshire (SELT), Exeter, NH (Vendor Code #155425) in the amount of \$158,000 for the purpose of conserving a 129-acre parcel of land in Epping, effective upon Governor and Council approval through February 28, 2021. 100% ARM Funds.

Funding is available in the account as follows:

	<u>FY'19</u>
03-44-44-442010-38710000-073-500581	\$158,000

Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

**EXPLANATION**

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Salmon Falls – Piscataqua River watershed in April, 2018. The SELT application was received and on November 28, 2018, DES announced the decision to fund the SELT project in the Salmon Falls – Piscataqua River watershed. The project proposed by the SELT was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

His Excellency, Governor Christopher T. Sununu  
and the Honorable Council

Page 2

The SELT will use the funds to purchase the 129-acre property located on Dimond Hill Road in Epping. The project will protect 2,330 linear feet of a tributary stream to the Lamprey River and 4,560 linear feet along the western bank of the Lamprey. The property includes nearly 40.4-acres of important high value wetlands and floodplains, three documented vernal pools, and habitat that supports nearby known occurrences of three rare turtle species. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Robert R. Scott, Commissioner
