EXPLANATION

The Department of Environmental Services issued a request for proposals for 2014 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Ten proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on the available federal funding, the Department determined that it could offer grants to six source protection planning projects and four source security projects. See attachment A for the proposal rankings and list of reviewers.

The Town of Exeter will use the grant funds to install a gate and fencing around the Gilman well, which is part of the Town's Public Water System. This project will provide better protection, by limiting unauthorized access and preventing threatening activities.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that federal funds no longer become available, General funds will not be requested to support this program.

We respectfully request your approval.

Thomas S. Burack
Commissioner
