His Excellency, Governor Christopher T. Sununu
and the Honorable Council

REQUESTED ACTION

Authorize the Department of Environmental Services to award a Local Source Water Protection grant to the City of Manchester (VC #177433) in the amount of \$20,000 to complete a project to protect public drinking water systems, effective upon Governor and Council approval through May 31, 2018. 100% Federal Funds.

Funding is available as follows:

Dept. Environmental Services, DWSRF Administration, Grants- Federal	\$20,000

EXPLANATION

The Department of Environmental Services issued a request for proposals for 2017 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Nineteen proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on the available federal funding, the Department determined that it could offer grants to nine source protection planning projects and six source security projects. See attachment A for the full list of grants awarded and list of reviewers.

The City of Manchester will use grant funds to update the current Lake Massabesic Protection Overlay District (LMPOD) ordinance to reflect current best practices and better protect the drinking water supply for the City of Manchester and surrounding communities.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that federal funds no longer become available, General funds will not be requested to support this program. This grant award, while less than \$25,000 threshold, requires G&C approval as the City of Manchester has already received funds in excess of the threshold for this fiscal year.

We respectfully request your approval.

Clark Freise
Assistant Commissioner

EXHIBIT A SCOPE OF WORK

City of Manchester:

The City of Manchester will use New Hampshire Department of Environmental Services (NHDES) grant funds to help protect the drinking water supply for the City of Manchester and surrounding communities by updating the current Lake Massabesic Protection Overlay District (LMPOD) ordinance to incorporate a no net increase in phosphorus standard and to reflect current best practices. The goal of this project is to help protect the drinking water supply for the City of Manchester and surrounding communities by updating the existing LMPOD ordinance. Specifically, the following tasks, as described in the application submitted to NHDES, will be accomplished:

Task 1. Review Existing Protection Overlay District

Complete a review Manchester's Lake Massabesic Protection Overlay District (LMPOD) ordinance and other ordinances including the city's stormwater ordinance, site plan and subdivision regulations. The review will determine the current level of protection to Lake Massabesic and identify improvements to the LMPOD and recommended changes to the ordinances and regulations noted above. Overlay districts within other communities in New Hampshire and the region designed to protect surface water sources will also be reviewed. Based upon this review, a list of potential improvements to increase watershed protection will be summarized in a short narrative report and forwarded to NHDES for review and comment.

A meeting will be held between MWW, CEI and the City of Manchester Planning and Community Development Department to discuss the above review and proposed improvements and any concerns with the ordinance. Advance notice of the meeting will be provided to the NHDES' project manager and a written summary of the meeting will be forwarded to the same.

Task 2. Draft Revised Ordinance

Draft revisions (language) for revising the LMPOD and recommendations for other city regulations based on the results of Task 1 will be completed. Revision of the LMPOD ordinance will be consistent with state guidance, regulations and authorized under state statute. These revisions may include:

- A phosphorus control component to establish a no net increase of phosphorus load from new development;
- Amount of allowable impervious cover;
- Setbacks from resource areas or other property features;
- Buffer zones and restrictions on land uses with high potential for pollution (i.e. gas stations);
- Septic system design and maintenance requirements;
- Mandated use of erosion controls and other BMPs designed to reduce the potential for erosion and sedimentation during and/or after construction; and
- Stricter stormwater design standards.

Task 3. Finalize LMPOD Language and Communications with Watershed Communities

Comments received from the City of Manchester departments in writing or given during meetings described in Task 2 and from NHDES will be incorporated into the ordinance based on a consensus reached at meetings held under Task 2. Final language will be reviewed by MWW and then provided to the City Planning and Community Development Department to consider for adoption by the City.

Copies of the final revised LMPOD ordinance will also be provided to the Lake Massabesic watershed communities' Planning Boards in Auburn, Hooksett, Candia, Chester, and Allenstown, along with a letter of explanation addressed from a representative of MWW. The letter will include a recommendation for consideration of developing and adopting a similar overlay district ordinance and a primary contact available to answer questions or address concerns.
