EXPLANATION

The purpose of the requested action is to provide NHDES with professional environmental consulting services to perform the following tasks: 1) rapidly and efficiently respond to emergencies caused by releases to the environment from petroleum and/or hazardous constituents; 2) investigate and remediate contaminated sites where the responsible party is either unknown or unable to perform the required work; and 3) provide site assessment/investigation, cleanup planning and remediation services at Brownfields and petroleum sites. For the past 20 years, the Governor and Council approved similar contracts to provide professional environmental consulting services. The current five

environmental consulting contracts expire on June 30, 2019. NHDES has completed a new qualifications-based selection process and W&S was selected as one of the firms for a new four-year contract.

This environmental consulting services contract will ensure that professional quality investigation, and remediation design and oversight can occur rapidly and cost-effectively. The services of W&S will be available to specifically assist NHDES in the investigation, monitoring and remediation of contaminated media at Brownfields sites, and state petroleum and hazardous waste sites in NH. This use of professional engineering services allows NHDES to obtain the required data, evaluate a cost-effective cleanup approach, and identify the appropriate remedy to accelerate required cleanup action, protect public health, provide clean drinking water, and encourage reuse and redevelopment of abandoned or underutilized sites where appropriate.

In August 2018, NHDES solicited qualifications and experience statements from professional environmental engineering firms using the procurement process as prescribed by RSA 21-I:22. NHDES received twelve qualification packages which were reviewed and evaluated by a seven-member team. The group of twelve firms was reduced to seven firms based on detailed evaluation self-score sheets and determination of engineering capabilities, experiences, staff and resources in New Hampshire. NHDES sent Interview Packages to and interviewed the seven short-listed firms in December 2018. Each firm was provided the opportunity to present its proposed project team, summarize its approach and accomplishments to completed projects, and present responses to a number of standard and site-specific questions by NHDES. Upon completion of these interviews, the NHDES evaluation team scored and ranked the seven firms as follows.

• Weston & Sampson Engineers, Inc. (W&S)	602.0
• GZA GeoEnvironmental, Inc. (GZA)	598.0
• Weston Solutions, Inc.	582.5
• Sanborn, Head & Associates (SHA)	568.3
• Ransom Consulting, Inc.	500.5
• Nobis Group	486.5
• Wilcox & Barton	463.9

The maximum possible score was 700. See Attachment A for the scores on the seven interviewed firms by the NHDES evaluation team.

A Contract Negotiation Package was sent to the top five firms requesting proposed labor rates, indirect cost rates, other direct cost multipliers, and subcontractor and profit mark-ups for this four-year contract. Hourly labor rates, multipliers and prices were negotiated with W&S for the proposed environmental work and agreement reached on the contract terms and conditions.

Salary rates will be renegotiated at the end of the second year of the contract, on or before June 30, 2021. Any adjustment will be approved by the Department and will apply to salaries during the remaining two years of the contract.

This contract has been approved by the Attorney General's Office as to form, content, and execution. See Exhibit B-1 for the detailed EPA Form 5700-41 four-year Price Breakdown.

We respectfully request your approval.

Commissioner
