**EXPLANATION**

The purpose of this request is to allow the Contractor to continue to provide the web-based Health and Safety Training program, ongoing support and maintenance of the ProSolutions online training platform, and will include three (3) new trainings, Culturally Responsive Practices to Reduce Implicit Bias, Disproportionality, Suspension and Expulsion; Wellness: Taking Care of Yourself; and Trauma-Informed Care. Care Solutions is the Bureau of Child Development and Head Start Collaboration (BCDHSC) contracted vendor of web based health and safety training. This training is required by, the Administration for Children and Families (ACF) Office of Child Care (OCC). Adding these courses provides increased access to professional development/training relative to pandemic- and post-pandemic priority topics for quality and credentialing purposes.

The web-based Health and Safety Training program is a requirement for caregivers, teachers, and directors working in New Hampshire's licensed child care and afterschool programs and for license-exempt providers eligible to receive New Hampshire Child Care Scholarship Program funds (hereinafter referred to as "NH child care providers").

As required by the Federal Child Care and Development Block Grant Act of 2014, the Department must guarantee all NH child care providers working with young children complete training every year in eleven required safety topics, including the prevention of infectious diseases, sudden infant death syndrome, and child development from birth to age thirteen. NH Administrative rules require licensed NH child care providers complete a minimum of three (3) hours of training and license-exempt NH child care providers eligible to receive NH Child Care Scholarship complete a minimum of two (2) hours of training in eleven health and safety topics. These trainings are available through this contract.

Since the release of the training program on June 1, 2017, the total number of professionals that have ordered the NH Health & Safety Training program is 13,724; the total number of individual courses completed is 132,436; and the total number of professionals that have completed the entire training package is 8,399.

The population served is caregivers, teachers, and directors working in New Hampshire's licensed child care and afterschool programs and for license-exempt providers eligible to receive

New Hampshire Child Care Scholarship Program funds. Approximately 600 to 800 new child care providers will continue to enroll in the training from July 1, 2021 to June 30, 2022.

To ensure NH child care providers meet the aforementioned requirements, the Department determined the most effective and cost-efficient approach was to provide a self-paced web-based training program that NH child care providers have access to 24/7 at their convenience at no cost, rather than having to leave work to take a class and interrupt staffing resources. The web-based Health and Safety Training program content for the training program comes from "Caring for Our Children: National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs, Third Edition." The training program also includes training on the New Hampshire Child Care Licensing Rules applicable to each topic. The training is also offered in Spanish.

The Department will monitor contracted services using the following performance measures:

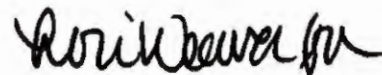

- Data collection and reporting by the Contractor of a student's comprehension of knowledge on a topic area gained by taking the training program;
- Results of an online participant survey.

Should the Governor and Council not authorize this request the Department would likely be unable to meet the federal Administration for Children and Families requirements to have all NH child care providers working in licensed and license-exempt child care, as well as afterschool programs, trained in the eleven health and safety topics. Without the web-based training program, the Department will be unable to provide the necessary education to ensure that children are being cared for in healthy and safe environments. Additionally, the Department would be at risk of financial penalties for not meeting the federal requirement. Without the three (3) additional modules, providers will lack critical information on offering equity/anti-bias approaches, engaging in self-care practices that increase their effectiveness in their work with children and families and gaining the most current information on providing trauma-informed care to children.

**EXPLANATION**

As previously stated, the original contract was approved by Governor and Council on April 5, 2017, Late Item #A. It was then subsequently amended with Governor and Council approval on June 20, 2018, Item #44A.

The purpose of this request is to allow the Contractor to continue to provide the web-based Health and Safety Training program and ongoing support and maintenance and will include three (3) new trainings, Child Care Billing, Trauma Informed Care, and Social Emotional Care. The web-based Health and Safety Training program is a requirement for caregivers, teachers, and directors working in New Hampshire's licensed child care and afterschool programs and for license-exempt providers eligible to receive New Hampshire Child Care Scholarship Program funds (hereinafter referred to as "NH child care providers"). This training includes the necessary information a New Hampshire child care provider needs to know to keep children safe and healthy.

As required by the Federal Child Care and Development Block Grant Act of 2014, the Department must guarantee all NH child care providers working with young children complete training every year in eleven required safety topics, including the prevention of infectious diseases, sudden infant death syndrome, and child development from birth to age thirteen. NH Administrative rules require licensed NH child care providers complete a minimum of three (3) hours and license-exempt NH child care providers eligible to receive NH Child Care Scholarship complete a minimum of two (2) hours in eleven health and safety topics.

To ensure NH child care providers meet the aforementioned requirements, the Department determined the most effective and cost-efficient approach was to provide a self-paced web-based training program that NH child care providers had access to 24/7 at their convenience at no cost, rather than having to leave work to take a class and interrupt staffing resources. The web-based Health and Safety Training program content for the training program comes from, "Caring for Our Children: National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs, Third Edition". The training program also includes training on the New Hampshire Child Care Licensing Rules applicable to each topic. The training is also offered in Spanish.

New Hampshire Child Care Scholarship Program funds. Approximately 600 to 800 new child care providers will enroll in the training from July 1, 2020 to June 30, 2022.

The Department will monitor contracted services using the following performance measures:

- Data collection and reporting by the Contractor of a student's comprehension of knowledge on a topic area gained by taking the training program;
- Results of an online participant survey.

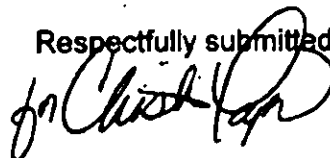

As referenced in Exhibit C-1, Revisions to General Provisions, Paragraph 3 of the original contract, the parties have the option to extend the agreement for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and Governor and Council approval. The Department is exercising its option to renew services for two (2) of the two (2) years available.

Should the Governor and Council not authorize this request, the Department would likely be unable to meet the federal Administration for Children and Families requirements to have all NH child care providers working in licensed and license-exempt child care, as well as afterschool programs, trained in the eleven health and safety topics. Without the web-based training program, the Department will be unable to provide the necessary education to ensure that children are being cared for in healthy and safe environments. Additionally, the Department would be at risk of financial penalties for not meeting the federal requirement.

### EXPLANATION

Approval of this Agreement will allow the Contractor to continue to provide the web-based Health and Safety training program and ongoing support and maintenance. The web-based Health and Safety training program is a requirement for caregivers, teachers, and directors working in New Hampshire's licensed child care and afterschool programs and for license-exempt providers eligible to receive New Hampshire Child Care Scholarship Program funds (hereinafter referred to as "NH child care providers"). This training includes the necessary information a NH child care provider needs to know to keep children safe and healthy.

The web-based Health and Safety training program includes eleven required topics including the prevention of infectious diseases, sudden infant death syndrome, and child development from birth to age thirteen. These topics are required trainings by the federal Child Care and Development Block Grant Act of 2014 (CCDBG), administered by the United States Department of Health and Human Services, Administration for Children and Families. Content for the training program comes from "Caring for Our Children: National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs, Third Edition". The training program also includes training on the New Hampshire Child Care Licensing Rules applicable to each topic.

As required by the CCDBG Act, the Department must guarantee all NH child care providers working with young children complete training in the required health and safety topics listed above. Additionally, the CCDBG Act requires child care providers complete training in the eleven health and safety topics every year. The New Hampshire Child Care Licensing Rule requires licensed NH child care providers complete a minimum of 3 hours of professional development in the eleven health and safety topics. The Child Care Enrollment Rule requires license-exempt NH child care providers eligible to receive NH Child Care Scholarship to complete a minimum of two hours in the eleven health and safety topics. To ensure NH child care providers meet this requirement, the Department determined that the most effective and cost efficient approach was to provide a self-paced web-based training program that NH child care providers had access to 24/7 at their convenience at no cost, rather than having to leave work to take a class and interrupt staffing resources.

The training program was launched on June 1, 2017. As of June 1, 2018, a total of 8,546 NH child care providers registered for the Training Program and 68,747 individual courses were completed. Since January 1, 2018, approximately 300-400 new child care providers enroll in the Training Program each month. The average cost to the Department per training is .62 cents. This cost includes the development and ongoing support and maintenance of the Training Program.

This Contract was competitively bid.

As referenced Exhibit C-1 of this Agreement, this competitively procured Agreement has the option to be extended for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Executive Council. The Department is extending this Agreement for an additional two (2) years.

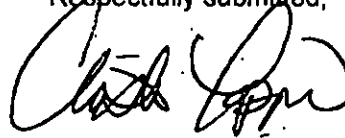

Should the Governor and Executive Council not authorize this request, the Department would likely be unable to meet the federal Administration for Children and Families requirements to have all NH child care providers working in licensed and license-exempt child care, as well as afterschool programs, trained in the eleven health and safety topics. Without the web-based training program, the Department will be unable to provide the necessary education to ensure that children are being cared for in healthy and safe environments. Additionally, the Department would be at risk of financial penalties for not meeting the federal requirement.

2018	102-500731	Contracts for Program Svcs	42117808	\$18,850
			<b>Total:</b>	<b>\$42,500</b>

**EXPLANATION**

Approval of this Agreement will allow the Contractor to provide a minimum six (6) hour self-paced, web-based Health and Safety training program ensure that children are being cared for in healthy and safe environments. The web based Health and Safety training program is a requirement for caregivers, teachers, and directors working in New Hampshire's licensed child care and afterschool programs and for licensed-exempt providers eligible to receive New Hampshire Child Care scholarship funds.

The web based Health and Safety training program shall include eleven required topics including the prevention of infectious diseases, sudden infant death syndrome, and child development from birth to age thirteen. These topics are required trainings by the federal Child Development Block Grant Act of 2014, administered by the United States Department of Health and Human Services, Administration for Children and Families. Content for the training program will come from "Caring for Our Children the National Health and Safety Performance Standards; Guidelines for Early Care and Education Programs, Third Edition." The training program will also include training on the new State

anticipated to be effective May 2017. The web based Health and Safety training program will include the necessary information a student needs to keep children safe and healthy and interactivity to keep the student engaged in learning and to ensure a students' comprehension of the program material.

By September 30, 2017, as required by the Child Development Block Grant Act of 2014, the Department is required to have up to 10,000 caregivers, teachers, and directors working in licensed child care and afterschool programs and licensed-exempt providers currently working with young children complete the health and safety training program. To meet this requirement, the Department determined that the most effective and cost efficient approach, given the time and number of people to be trained, was to provide a self-paced web-based training program. Additionally, the trainees will access the web-based training 24/7 at their convenience, rather than having to leave work to take a class and interrupt staffing resources.

The Contractor will continue to make the web based Health and Safety training program available after September 30, 2017, in order to meet the requirements for new caregivers, teachers, and directors working in New Hampshire licensed child care and afterschool programs and for licensed-exempt providers eligible to receive New Hampshire Child Care scholarship funds.

This Contract was competitively bid. The Department published a Request for Proposals for Web Based Health and Safety Training Program (RFP-2017-DCYF-09-WEBBA) on the Department of Health and Humans Services website from January 12, 2017 through February 9, 2017. Two (2) applications were received in response to the Request for Proposals. The applications were evaluated based upon the criteria published in the Request for Proposals by a team of individuals with program specific knowledge and expertise. Care Solutions, Inc. was selected. The bid summary is attached.

As referenced in the Request for Proposals and in Exhibit C-1 of this Contract, this competitively procured Agreement has the option to be extended for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Executive Council.

Language in the contract provides that, notwithstanding any other provision of the Contract to the contrary, no services shall continue after June 30, 2017, and the Department shall not be liable for any payments for services provided after June 30, 2017, unless and until an appropriation for these services has been received from the state legislature and funds encumbered for the SFY 2018-2019 biennium.

Should the Governor and Executive Council not authorize this request, the Department would likely be unable to meet the federal Administration for Children and Families requirements to have all caregivers, teachers, and directors working in New Hampshire's licensed child care and afterschool programs and for licensed-exempt providers trained in Health and Safety. Without the web-based training program, the Department will be unable to provide the necessary education to ensure that children are being cared for in healthy and safe environments. Additionally, the Department would be at risk of financial penalties for not meeting the federal requirement.

Area served: Statewide

Source of Funds: 100% Federal Funds from United States Department of Health and Human Services, Administration for Children and Families, Child Care and Development Fund Catalog for Domestic Assistance, (CFDA) # 93.596 and 93.575, Federal Award Identification Number (FAIN) #1-026000618-B3.

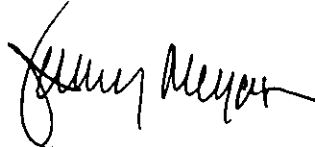

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

- e. Business Associate shall require all of its business associates that receive, use or have access to PHI under the Agreement, to agree in writing to adhere to the same restrictions and conditions on the use and disclosure of PHI contained herein, including the duty to return or destroy the PHI as provided under Section 3 (l). In addition to Paragraph 10 of the standard terms and conditions (P-37) of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I.
