## EXPLANATION

The New Hampshire Fish and Game Department is in need of chemical treatment and redevelopment of Field Well #5 at Milford State Fish Hatchery. The well pumping performance and the water quality of this well have significantly diminished over time. The Milford Hatchery utilizes this well year round, and operation of these wells supplies the life supporting water for trout production at the hatchery. Restoring the flow and water quality is vital to sustaining required trout production.

Respectfully submitted,

Glenn Normandeau  
 Executive Director

Kathy Ann LaBonte, Chief  
 Business Division
