The U.S. Forest Service and The Trails Bureau have a long and rich relationship of working together to provide diverse and high-quality public snowmobile recreation opportunities on the White Mountain National Forest. The two organizations have a lasting relationship of working together in trail and associated trail facility construction and maintenance activities. Together the partnership manages approximately 650 miles of snowmobile trails on the White Mountain National Forest. Part of this management is the maintenance and replacement of significant infrastructure including bridges and culverts.

The purpose of the challenge cost share agreement is to document the cooperation between the parties to plan, maintain and manage mutually beneficial snowmobile trail system and associated facilities stewardship projects.

Use this worksheet to perform the cost analysis that supports the lump sum figures provided in the matrix. NOTE: This worksheet auto populates the relevant and applicable matrix cells.

Cost element sections may be deleted or lines may be hidden, if not applicable. Line items may be added or deleted as needed. The Standard Calculation sections provide a standardized formula for determining a line item's cost, e.g. cost/day x # of days=total, where the total is calculated automatically. The Non-Standard Calculation sections provide a write-in area for line items that require a calculation formula that is other than the standardized formulas, e.g. instead of salaries being calculated by cost/day x # of days, costs may be calculated simply by a contracted value that is not dependent on days worked, such as 1 employee x \$1,200/contract= \$1,200. Be sure to review your calculations when entering in a Non-Standard Calculation, and provide a brief explanation of units used to make calculation, e.g. '1 month contract,' on a line below the figures.

Cost element sections may be deleted or lines may be added, if not applicable. Line items may be added or deleted as needed. The Standard Calculation sections provide a standardized formula for determining a line item's cost, e.g. cost/day x # of days = total, where the total is calculated automatically. The Non-Standard Calculation sections provide a write-in area for line items that require a calculation formula that is other than the standardized formulas, e.g. instead of salaries being calculated by cost/day x # of days, costs may be calculated simply by a contracted value that is not dependent on days worked, such as 1 employee x \$1,200/contract = \$1,200. Be sure to review your calculations when entering in a Non-Standard Calculation, and provide a brief explanation of units used to make calculation, e.g. '1 month contract,' on a line below the figures.
