

The State of New Hampshire  
**Department of Environmental Services**

**Robert R. Scott, Commissioner**

July 15, 2019

His Excellency, Governor Christopher T. Sununu  
 and The Honorable Council  
 State House  
 Concord, NH 03301

**REQUESTED ACTION**

Approve the Town of Moultonborough's request to perform the following work on Lake Winnepesaukee in Moultonborough. File # 2018-01134. This project will not have significant impact on or adversely affect the values of Lake Winnepesaukee.

The Applicant requests that the permit be amended to include improvements of the boat launch surface and the addition of a seasonal pier.

The New Hampshire Department of Environmental Services (NHDES) imposed the following conditions as part of this approval:

1. All work shall be in accordance with revised plans by KV Partners, LLC dated March 26, 2019 and cross sections dated April 6, 2019, as received by DES on April 10, 2019.
2. All development activities associated with this project shall be conducted in compliance with applicable requirements of RSA 483-B and N.H. Code of Administrative Rules Env-Wq 1400 during and after construction.
3. The Applicant shall implement and adhere to the Invasive Species Control Plan, Lake Winnepesaukee, States Landing Beach at States Landing Road, Moultonborough, NH.
4. Work authorized shall be carried out such that there are no discharges in or to spawning or nursery areas during spawning seasons. Impacts to such areas shall be avoided or minimized to the maximum extent practicable during all other times of the year.
5. Work shall be carried out in a time and manner to avoid disturbances to migratory waterfowl breeding and nesting areas.
6. Appropriate siltation and erosion controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized. Temporary controls shall be removed once the area has been stabilized.
7. Appropriate turbidity controls shall be installed prior to construction, shall be maintained during construction such that no turbidity escapes the immediate dredge area and shall remain until suspended particles have settled and water at the work site has returned to normal clarity.
8. All dredged material shall be placed outside of the areas subject to RSA 482-A. Any spoil material deposited within 250 feet of any surface water shall comply with RSA-483-B.
9. The contractor responsible for completion of the work shall use techniques described in the New Hampshire Stormwater Manual, Volume 3, Erosion and Sediment Controls During Construction (December 2008).
10. This permit authorizes a single dredge event in the area depicted on the approved plans to correct the effects inadequate stormwater management and soil stabilization along State's Landing Road. The Applicant accepts that should the dredge area be refilled no new dredge will be permitted.
11. The entire dredge area shall be enclosed by appropriate turbidity controls.
12. Equipment initially entering surface waters shall be completely free of any imported aquatic plants and animals.
13. Watercraft and equipment washing/rinsing shall not occur in any area that is subject to RSA 482-A jurisdiction.

[www.des.nh.gov](http://www.des.nh.gov)

29 Hazen Drive • PO Box 95 • Concord, NH 03302-0095

NHDES Main Line: (603) 271-3503 • Subsurface Fax: (603) 271-6683 • Wetlands Fax: (603) 271-6588

TDD Access: Relay NH 1 (800) 735-2964

14. Launching and recovering equipment and off-loading spoils shall not destabilize or otherwise disturb the bank.
15. No person undertaking any activity shall cause or contribute to, or allow the activity to cause or contribute to, any violations of the surface water quality standards in RSA 485-A and Env-Wq 1700.
16. Discharge from dewatering of work areas shall be to sediment basins that are: a) located in uplands; b) lined with hay bales or other acceptable sediment trapping liners; c) set back as far as possible from wetlands and surface waters, with a preferred undisturbed vegetated buffer of at least 50 feet and a minimum undisturbed vegetative buffer of 20 feet.
17. Only those structures shown on the approved plans shall be installed or constructed along this frontage. All portions of the seasonal docking structure shall be at least 20 feet from the abutting property lines or the imaginary extension of those lines into the water.
18. No portion of the pier shall extend more than 80 feet from the shoreline at full lake elevation (Elev. 504.32).
19. All seasonal structures, including watercraft lifts, shall be removed for the non-boating season.

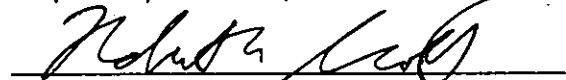

#### EXPLANATION

The NHDES approved this project on June 13, 2019. The NHDES supported its decision with the following findings:

1. This is a major impact project per Administrative Rule Env-Wt 303.02(g), dredge of more than 20 cubic yards of material from public waters.
2. The need for the proposed impacts has been demonstrated by the applicant per Env-Wt 302.01.
3. The applicant has provided evidence which demonstrates that this proposal is the alternative with the least adverse impact to areas and environments under the department's jurisdiction per Env-Wt 302.03.
4. The applicant has demonstrated by plan and example that each factor listed in Env-Wt 302.04(a), Requirements for Application Evaluation, has been considered in the design of the project.
5. The Department finds that because the project is not of significant public interest and will not significantly impair the resources of Lake Winnepesaukee a public hearing under RSA 482-A:8 is not required.
6. The sediment to be removed from the lakebed consists largely of sand and silt eroded from State's Landing Road and deposited by stormwater running down the existing boat launch and across the existing public beach.
7. The Town of Moultonborough has completed improvements to the stormwater management along State's Landing Road and has proposed additional improvements to the stormwater management along both the Road and upslope of the public beach.
8. The proposed dredging in combination with the completed and proposed stormwater management improvements shall serve to correct site conditions resulting in continuing adverse impacts to Lake Winnepesaukee.
9. The existing boat launch is available for free public use.
10. The proposed extension and upgrade of the launch surface has been designed to benefit the public interest by continuing to provide free public access to Lake Winnepesaukee while reducing turbidity and lakebed scour that have historically occurred as a result of powering water craft onto and off of trailers at this facility.
11. Rule Env-Wt 402.03, Dimensions, which establishes standard seasonal pier dimensions of 6 feet x 40 feet for seasonal piers on lakes over 1000 acres is waived pursuant to Part Env-Wt 204, Waivers, as the proposed 8 foot x 80 foot seasonal pier will improve the safety of both those individuals using the launch and those people using the existing public beach that will be separated from the adjacent launch by the new pier and thus the pier is deemed to be in the public interest.

Application file documents are being forwarded to the Governor and the Executive Council in connection with their consideration of this matter pursuant to RSA 482-A:3,II.(a) as it is a major project in public waters of the state.

Respectfully submitted,

Robert R. Scott  
Commissioner

See the Instructions &amp; Required Attachments document for clarification of the below statements

By signing the application, I am certifying that:

1. I authorize the applicant and/or agent indicated on this form to act in my behalf in the processing of this application, and to furnish upon request, supplemental information in support of this permit application.
2. I have reviewed and submitted information & attachments outlined in the Instructions and Required Attachment document.
3. All abutters have been identified in accordance with RSA 482-A:3, I and Env-Wt 100-900.
4. I have read and provided the required information outlined in Env-Wt 302.04 for the applicable project type.
5. I have read and understand Env-Wt 302.03 and have chosen the least impacting alternative.
6. Any structure that I am proposing to repair/replace was either previously permitted by the Wetlands Bureau or would be considered grandfathered per Env-Wt 101.47.
7. I have submitted a Request for Project Review (RPR) Form ([www.nh.gov/nhdhr/review](http://www.nh.gov/nhdhr/review)) to the NH State Historic Preservation Officer (SHPO) at the NH Division of Historical Resources to identify the presence of historical/ archeological resources while coordinating with the lead federal agency for NHPA-106 compliance.
8. I authorize NHDES and the municipal conservation commission to inspect the site of the proposed project.
9. I have reviewed the information being submitted and that to the best of my knowledge the information is true and accurate.
10. I understand that the willful submission of falsified or misrepresented information to the New Hampshire Department of Environmental Services is a criminal act, which may result in legal action.
11. I am aware that the work I am proposing may require additional state, local or federal permits which I am responsible for obtaining.
12. The mailing addresses I have provided are up to date and appropriate for receipt of NHDES correspondence. NHDES will not forward returned mail.

**MUNICIPAL SIGNATURES**

**12. CONSERVATION COMMISSION SIGNATURE**

The signature below certifies that the municipal conservation commission has reviewed this application, and:

1. Waives its right to intervene per RSA 482-A:11
2. Believes that the application and submitted plans accurately represent the proposed project, and
3. Has no objection to permitting the proposed work.

	Marie Samaha <small>Print name legibly</small>	4-19-18 <small>Date</small>
---	---	--------------------------------

**DIRECTIONS FOR CONSERVATION COMMISSION**

1. Expedited review ONLY requires that the conservation commission's signature is obtained in the space above.
2. Expedited review requires the Conservation Commission signature be obtained prior to the submittal of the original application to the Town/City Clerk for signature.
3. The Conservation Commission may refuse to sign. If the Conservation Commission does not sign this statement for any reason, the application is not eligible for expedited review and the application will be reviewed in the standard review time frame.

**13. TOWN/ CITY CLERK SIGNATURE**

As required by Chapter 482-A:3 (amended 2014), I hereby certify that the applicant has filed four application forms, four detailed plans, and four USGS location maps with the town/city indicated below.

	Barbara Wakefield <small>Print name legibly</small>	Moultonboro <small>Town/City</small>	4/20/18 <small>Date</small>
--	--	---	--------------------------------

**DIRECTIONS FOR TOWN/CITY CLERK:**

Per RSA 482-A:3,1

1. For applications where "Expedited Review" is checked on page 1, if the Conservation Commission signature is not present, NHDES will accept the permit application, but it will NOT receive the expedited review time.
2. IMMEDIATELY sign the original application form and four copies in the signature space provided above;
3. Return the signed original application form and attachments to the applicant so that the applicant may submit the application form and attachments to NHDES by mail or hand delivery.
4. IMMEDIATELY distribute a copy of the application with one complete set of attachments to each of the following bodies: the municipal Conservation Commission, the local governing body (Board of Selectmen or Town/City Council), and the Planning Board; and
5. Retain one copy of the application form and one complete set of attachments and make them reasonably accessible for public review.

**DIRECTIONS FOR APPLICANT:**

1. Submit the single, original permit application form bearing the signature of the Town/ City Clerk, additional materials, and the application fee to NHDES by mail or hand delivery.

NHB File ID: NHB18-1116

Applicant: Walter Johnson

Location: Tax Map(s)/Lot(s): 120/95  
Moultonborough

Project Description: Dredge the swim and boat ramp areas in Lake Winnepausaukee at the States Landing Beach Recreational Area located at the terminus of States Landing Road. The purpose of the project is to restore the swim and boat ramp areas to their historic recreational value for the residents of the Town of Moultonborough and the general public.

The NH Natural Heritage database has been checked for records of rare species and exemplary natural communities near the area mapped below. The species considered include those listed as Threatened or Endangered by either the state of New Hampshire or the federal government. We currently have no recorded occurrences for sensitive species near this project area.

A negative result (no record in our database) does not mean that a sensitive species is not present. Our data can only tell you of known occurrences, based on information gathered by qualified biologists and reported to our office. However, many areas have never been surveyed, or have only been surveyed for certain species. An on-site survey would provide better information on what species and communities are indeed present.

This report is valid through 4/8/2019.
