

THE STATE OF NEW HAMPSHIRE
DEPARTMENT OF TRANSPORTATION

MAY 17 '13 PM 1:54 DAS

208 [handwritten signature]

CHRISTOPHER D. CLEMENT, SR.
COMMISSIONER

JEFF BRILLHART, P.E.
ASSISTANT COMMISSIONER

Bureau of Construction
April 30, 2013

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with Busby Construction Co., Inc. (Vendor 155275) of Atkinson, NH on the basis of a low bid of \$128,136.25 for sliplining an existing corrugated metal arc pipe carrying Kelly Brook under NH Route 121A in Plaistow, from the date of Governor and Council approval through August 16, 2013 unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available as follows:
FY 2013
04-96-96-963515-3054
Consolidated Federal Aid
400-500870 Highway Contract Payments \$128,136.25

2. Further authorize that a contingency in the amount of \$12,813.63 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 10% of the contract amount.

Funding is available as follows:
FY 2013
04-96-96-963515-3054
Consolidated Federal Aid
400-500870 Highway Contract Payments \$12,813.63

EXPLANATION

This project is part of the annual Culvert Replacement/Rehabilitation & Drainage Repairs Program, which identifies culverts for repair or replacement prior to more expensive roadway failures or more difficult repairs are needed. The project involves sliplining the existing 8.5' X 6' corrugated metal arch culvert. The project will also install a parallel 30" high density plastic overflow pipe, as well as replace the existing cable guardrail. The existing culvert is deteriorated along the waterline (rusting and perforated). The original date of construction of the pipe and cable guardrail are unknown.

Page 2

The contingency amount is proposed to be 10% of the contract amount. This is a relatively small, short duration project and project limits cannot be adjusted to offset unanticipated subsurface conditions on quantity over runs.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 80% federal funds with 20% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Christopher D. Clement, Sr.
Commissioner

CDC/md

Department Estimate:	\$137,900.00
Contract Amount:	<u>\$128,136.25</u>
Under Estimate:	\$ 9,763.75

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: The existing culvert is a 103" x 71" x 40' long CMP arch culvert carrying Kelly Brook under NH Route 121A. Proposed rehabilitation is to slipline with a 95" x 67" polymer coated metal liner pipe and add a parallel 30" HDPE pipe to compensate for loss of capacity in the pipe arch due to sliplining. The project will also replace existing cable guardrail at the culvert with beam guardrail and energy absorbing terminal units (EAGRT's). NH Route 121A will receive a 1½" pavement overlay and re-striping within the project limits.

FEDERAL FUNDING: Construction funding is 80% Federal Funds from the Culvert Replacement/Rehabilitation & Drainage Repairs Program (CRDR *4157). The State's 20% match is anticipated to come from Turnpike Toll Credits.

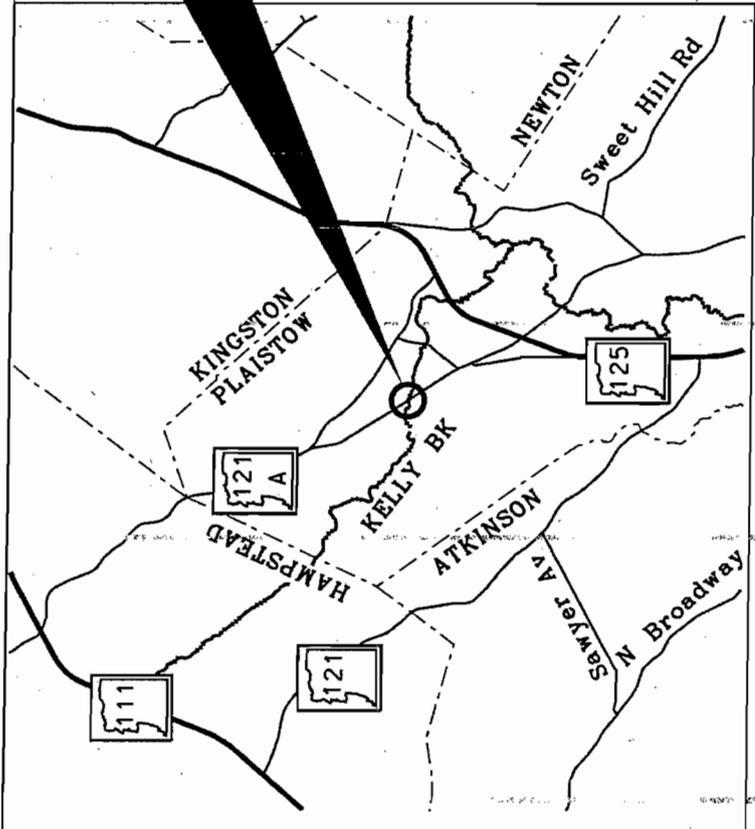

CONTINGENCY: Further authorize that a contingency of 10% be approved. This is a short duration project and project limits cannot be adjusted to offset quantity over runs.

PROJECT INITIATED: The project was initiated through the State's 10-Year Transportation Improvement Program.

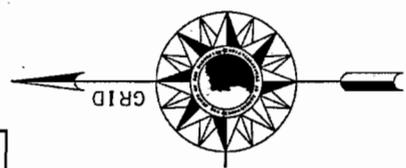

PROJECT EXPLANATION: This project is part of the annual Culvert Replacement/Rehabilitation & Drainage Repairs Program, which identifies culverts for repair or replacement prior to more expensive roadway failures or more difficult repairs are needed. The existing culvert is deteriorated along the waterline (rusting and perforated). The original date of construction of the pipe and cable guardrail are unknown. Age is estimated at over 40 years.

TRAFFIC IMPLICATIONS: Traffic impacts will include use of alternating one-way traffic during off-peak hours for tasks such as material deliveries, guardrail replacement and paving. NH 121A will be closed for one night (9 pm to 5 am) for installation of the 30" HDPE pipe. Emergency vehicle access will be maintained through the work area during the closure.
