EXHIBIT A: SCOPE OF SERVICES

SUBJECT: Building One Side Walk Install
Location: State Military Reservation, Building One

GENERAL

The Contractor will provide all labor; materials, equipment, supplies, and transportation as needed to install side walk on the south west side of building one.

Contractor will install side walk in accordance with specifications given to all bidding contractors.

The specifications are from the original side walk as builds.

There have been no cracks or break down of the sidewalks in the past 8 years.

The new side walk is a continuation of the existing side walk on the west side of the building.

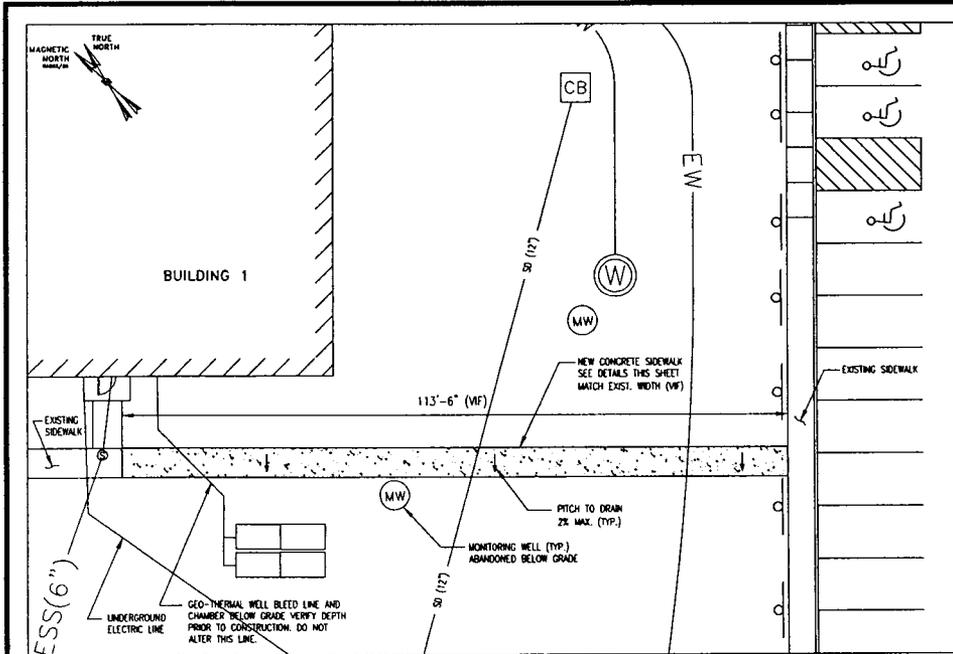

The soldiers use the rear doors to access the building and are walking across the lawn. This will save the lawn from damage from all the soldiers and civilian workers gaining access to the west side of the building.

There will be a new lawn installed before the new side walk is installed. This is because of scheduling and will not inhibit the install of the new side walk. The lawn would get damaged either way. Damage to the lawn will need to be repaired and reseeded.

This project will be completed no later than 09-30-2014.

EXHIBIT D - Environmental Management System
Notice for Contractors and Contractor employees

The New Hampshire Army National Guard (NHARNG) has implemented an environmental Management System (eMS), in accordance with Federal Executive Orders 13423 and 13514, to guide its operations in an environmentally sound manner. Under its eMS, the NHARNG has identified significant activities, products or services that can interact with the environment (known as aspects) and potential environmental impacts from its operations.

The significant environmental aspects are listed below:

HVAC (heating, ventilation & a/c)	Endangered species management
Ground vehicle maintenance & repair	AASF JP-8 use and storage
Vehicle travel (fleet) between work stations	

These five (5) significant aspects and their associated impacts will be closely monitored by the NHARNG. Objectives and associated target completion dates have been developed to reduce the environmental impacts from the two (2) shaded aspects. Further, the NHARNG is tracking the success of the implementation plans established to achieve the NHARNG's objectives.

For the purposes of this notice, applicability is limited to those actions that the contractor or subsequent employees are likely to perform on NHARNG properties.

The primary purpose of this notice is to communicate the three basic tenets of the NHARNG's eMS policy:

- eMS (ISO 14001) is the management system the NHARNG uses to implement the Adjutant General's Environmental Policy;
- The eMS Environmental Policy commits the NHARNG to comply with environmental laws and regulations, to prevent pollution and to promote continual improvement of the eMS; and
- Contractors are responsible for knowing the environmental impacts of their services, and must understand the management requirements for any activities that could affect any of NHARNG's significant aspects, or that could result in potential environmental impacts.

AASF JP-8 Use and Storage

The NHARNG is committed to reducing environmental impacts from fueling operations. If you perform on-site fueling activities at the AASF, you must be aware that this facility is covered by an Integrated Contingency Plan (ICP). Spills of fuel must be reported as indicated on the Spill Chart and Hazardous Waste Emergency Notification Form. Fueling activities may only be performed by personnel who have been trained according the functions performed. Personnel dispensing fuels are responsible for cleaning up any spills that occur during fueling activities.

HVAC (Heating, Ventilation, and A/C)

The NHARNG is committed to reducing its consumption of energy from HVAC. Reducing energy consumption from HVAC may be realized by turning off electrical equipment when not in use, or reducing heating temperatures/increasing cooling temperatures, using alternative fuels (if available, such as E85 or biodiesel), etc. Contracts that include the use or installation of HVAC Equipment will seek the most energy efficient technology within the scope of the contract.

Ground Vehicle Maintenance and Repair

The NHARNG is committed to reducing hazardous waste generation by ground vehicle maintenance and repair through pollution prevention and waste minimization. Hazardous wastes generated by your vehicle maintenance and repair activities must be disposed in accordance with contract provisions and regulatory requirements.

Endangered Species Management

The NHARNG is committed to preserving and restoring habitat and threatened and endangered species. The federally endangered Karner Blue Butterfly (KBB) is known to occur on the State Military Reservation, and habitation restoration areas are only for authorized uses. Signage is present on the SMR to identify the habitat restoration area. Use of this area is prohibited by contractors unless specifically included in your contract.

Vehicle Travel (fleet) Between Work Stations

The NHARNG is committed to preventing pollution through monitoring of Federal GSA Fleet vehicle usage. Usage of fleet vehicles by contractors is prohibited.

Significant aspects likely to be affected by contractor's activities, products, or services:
