CHRISTOPHER D. CLEMENT, SR.
COMMISSIONER

JEFF BRILLHART, P.E.
ASSISTANT COMMISSIONER

Bureau of Construction
October 13, 2014

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with M.E. Latulippe Construction, Inc. (Vendor 157609) of Ashland, NH on the basis of a low bid of \$448,091.00 for rehabilitating the lined ditches and maintaining the slopes along I-93 northbound and southbound adjacent to the Town of Plymouth drinking water wells, from the date of Governor and Council approval through July 31, 2015 unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available as follows: FY 2015
04-96-96-963515-3054
Consolidated Federal Aid
400-500870 Highway Contract Payments \$448,091.00

2. Further authorize that a contingency in the amount of \$22,404.55 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 5% of the contract amount.

Funding is available as follows: FY 2015
04-96-96-963515-3054
Consolidated Federal Aid
400-500870 Highway Contract Payments \$22,404.55

EXPLANATION

This project is part of the Department's Interstate Pavement Preservation Program. Impervious ditches were constructed along I-93 northbound and southbound during the original construction of the Interstate in the 1960's adjacent to the Town of Plymouth drinking water wells. Trees and runoff material have accumulated within the existing ditches blocking the intended flow of surface water. The project will remove trees, reestablish the grade and hydraulic efficiency of the ditches, and construct a high density polyethylene drainage ditch system along the ditch line, and match the existing slopes and outlets to the Pemigewasset River. The work also involves sliplining of existing drainage pipes. This work will ensure the continued integrity of the groundwater protection measures originally installed.

The contingency amount is proposed to be 5% of the contract amount. Although this is a one year duration contract, with fixed limits, the bulk work is being constructed in the spring of 2015, during a time of possible rising and falling petroleum prices. Adjusting limits to offset quantity overruns is not practical.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and that the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 90% federal funds with 10% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Christopher D. Clement, Sr.
Commissioner

CDC/md

Department Estimate: \$476,387.00
Contract Amount: \$448,091.00
Under Estimate: \$ 28,296.00

SEPTEMBER 2, 2014

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION OF WORK: This project involves reestablishing the ditches and maintaining the slopes along I-93 northbound and southbound adjacent to the Town of Plymouth drinking water wells. The work begins on the northerly side of the Pemigewasset River and continues north 1,450 feet to the State of NH Railroad. The work includes reestablishing the ditch line, slope clearing, replacement or slip lining of existing drainage pipes.

FEDERAL FUNDING: The improvements for the project are funded from the Interstate Pavement Preservation Program with 90% Federal Funding and the 10% match being Turnpike Toll Credits.

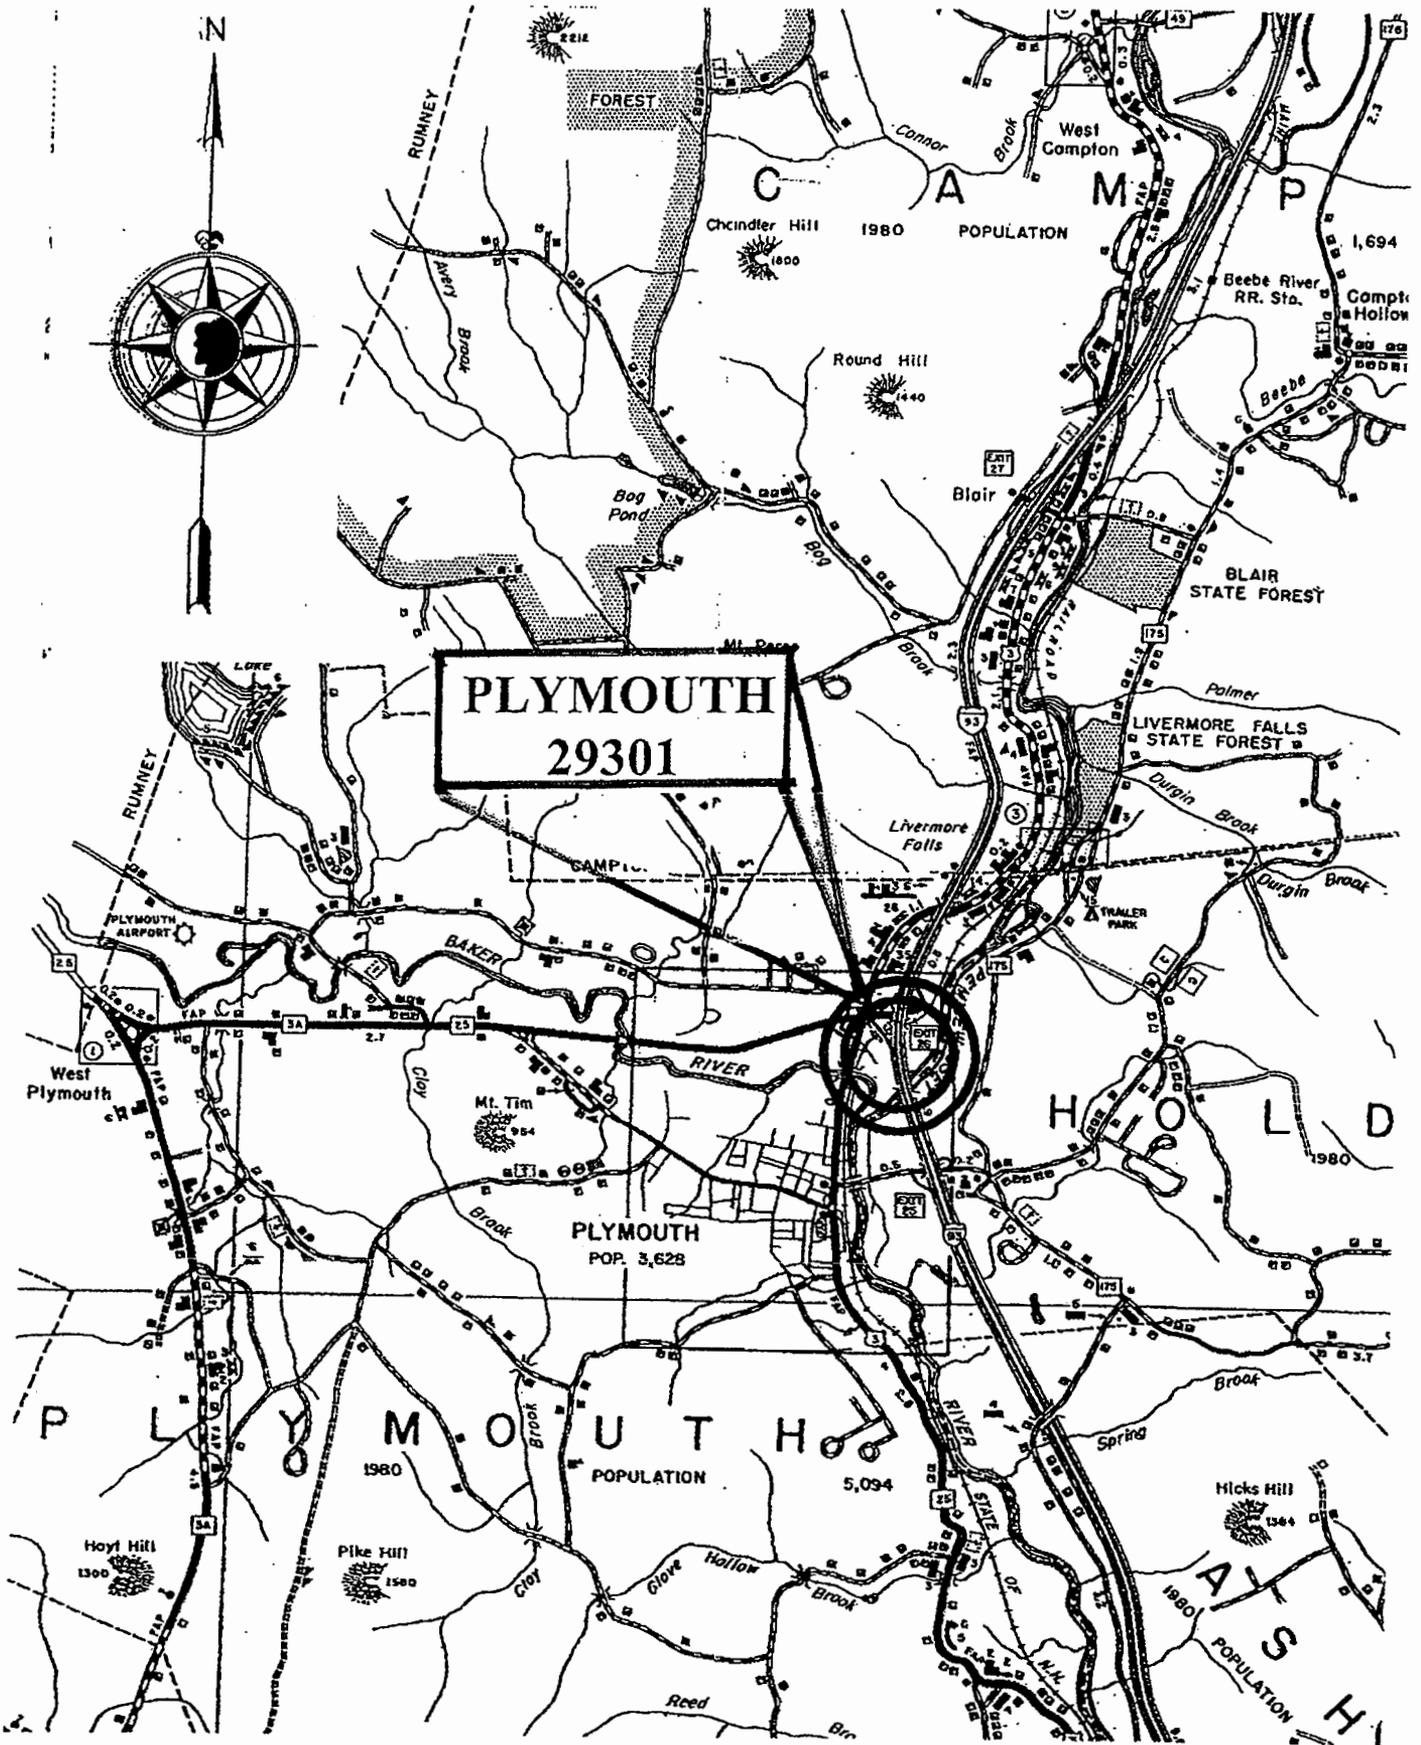

CONTINGENCY: The Contingency amount is proposed to be 5% of the contract amount. Although this is a one year duration contract, with fixed limits, the bulk work is being constructed in the spring of 2015, during a time of possible rising and falling petroleum prices. Adjusting limits to offset quantity overruns is not practical.

PROJECT INITIATED: State's Ten-Year Transportation Improvement Plan

PROJECT EXPLANATION: The project is part of the Department's Interstate Pavement Preservation Program. Impervious ditches were constructed along I-93 northbound and southbound during the original construction of the Interstate in the 1960's adjacent to the Town of Plymouth drinking water wells. Trees and runoff material have accumulated within the existing ditches blocking the intended flow of surface water. The project will remove trees, reestablish the grade and hydraulic efficiency of the ditches, and construct a high density polyethylene drainage ditch system along the ditch line, match the existing slopes and outlet to the Pemigewasset River.

TRAFFIC IMPLICATIONS: Traffic will be maintained on pavement having a minimum width of 16 feet at all times. Temporary daytime lane closure will be discontinued whenever the Contract Administrator determines traffic backups may contribute to either unsafe conditions or result in excessive delays for the traveling public. Two-lane traffic will be maintained during non-work hours. Emergency vehicles will be allowed to safely pass through the work zone.

COMPLETION DATE: July 31, 2015
