03-35-35-351510-374200000-103-500736 Contracts for Op Services	\$36,189.50

EXPLANATION

The New Hampshire Code of Administrative Rule Env-Wm 1402, Control of Aboveground Petroleum Storage Facilities, requires detailed interior tank inspections at certain intervals based on size and type of tank. DRED has five (5) 20,000 gallon above ground fuel storage tanks located at the Summit of Mt Washington which are due 10-year inspections. These tanks supply kerosene heating and generator fuel for the Sherman Adams' building. The inspections are necessary to ensure the integrity of the tanks and secondary containment in the event of a leak or spill. Attached for your information is the compliance notice from the Department of Environmental Services.

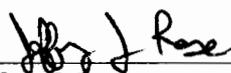

In March 2014, an invitation to submit bids for above ground fuel storage tank inspections at Mount Washington State Park was issued in accordance with Department of Administrative Services' policy. The bid solicitation was posted on the Division of Purchase and Property's website, the Division of Parks and Recreation's website, and the following construction services' websites: Construction Summary of NH, Infinite Imaging, McGraw Hill Construction, Signature Press and Blueprinting, and Works in Progress. Five (5) proposals were received and the low bidder, InterSpec, LLC, was selected. Attached for your information is a summary of the bids received for this contract.

The Attorney General's Office has approved this contract as to form, substance and execution.

Respectfully submitted,

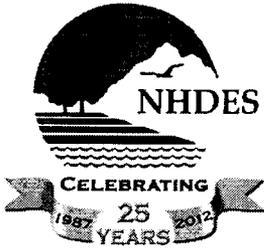

Concurred,

Attention: SETH PRESCOTT,

The New Hampshire Department of Environmental Services (DES) database indicates that the Subject aboveground petroleum storage tank (AST) facility has tank inspection requirements due in calendar year 2013. More specifically, it appears that a detailed interior tank inspection is due for the above listed tank(s) as required by the New Hampshire Code of Administrative Rules Env-Wm 1402, Control of Aboveground Petroleum Storage Facilities (AST Rules).

Env-Wm 1402.29 requires that an initial detailed interior tank inspection be performed on each AST having a capacity of 5,100-gallons or greater, by the time the AST is 10-years old (20-years old if entirely aboveground on cradles). Also, each AST shall be re-inspected at 10-year intervals (5-year intervals if containing gasoline), or sooner if recommended by the tank inspector. Env-Wm 1402.29 further requires that the interior inspections be conducted by an inspector who is certified by the American Petroleum Institute (API 653), the Steel Tank Institute (STI), and/or is a professional engineer (P.E.) licensed in New Hampshire. Please also note that Env-Wm 1402.29 requires a tightness test be performed on any underground piping associated with the tank. Such tightness tests shall be performed on both the primary and secondary containment pipe in accordance with NFPA 30 or manufacturer's test specifications.

Within 60 days of completing the detailed interior tank inspection, please forward a copy of the inspection report to my attention at DES pursuant to Env-Wm 1402.29(k)(1). Reports should identify the specific tank and include the inspector's findings regarding serviceability and the next recommended inspection date. The report shall also include the inspector's API or STI certification number and signature, and/or the stamp and signature of the P.E. As applicable,

the report should also include underground pipe test information (tester name / company / signature, test parameters, and findings.)

If the detailed interior tank inspection is performed in calendar year 2013 and documented as required, you will avoid enforcement action per New Hampshire RSA 146-A:15 and New Hampshire Code of Administrative Rules Env-C 600. Enforcement action may include administrative fines of not more than \$2,000 per violation per day and/or administrative orders.

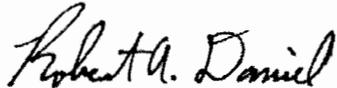

For your reference, the following link on the DES website includes non-comprehensive lists of various service providers in the AST industry:

http://www2.des.state.nh.us/OneStop/ORCB_Web_Reports_Menu.aspx

DES does not endorse the use of any specific service provider and the non-comprehensive lists are only provided at the request of the service providers themselves. Any qualified service provider may be used regardless or whether they are on the list.

Should you have any questions concerning the content of this letter, please contact me in the Waste Management Division of DES. DES appreciates your willingness to comply with the AST program in an effort to preserve New Hampshire's environment.

Sincerely,
