REQUESTED ACTION

Authorize the Department of Administrative Services to enter into a statewide Contract with TriState Generators, LLC. (Vendor No. 271332) of 18 Route 27, Brentwood NH, 03833, in the amount of \$600,000.00 for Generator Maintenance and Repair. The term shall be effective upon Governor and Executive Council Approval through August 31, 2025 with the option to extend for two (2) additional one (1) year extension terms.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

The Department of Administrative Services, through the Bureau of Purchase and Property, issued Request for Bid 2633-23 on 06/21/2022 with responses due on 07/07/2022. There were six (6) compliant responses received with TriState Generators, LLC. submitting the lowest compliant pricing for six (6) counties.

The purpose of this item is to obtain approval to enter into Contract for preventative maintenance, load bank testing, and repairs supporting the State's fleet of back-up power generators. Notable changes from the previous Contract resulting from RFB 2189-19 are as follows: twenty-eight (28) new generators have been added to the following counties: Rockingham County, sixteen (16), Merrimack County, ten (10), Hillsborough County, one (1), and Carroll County, one (1); Belknap County reduced generator inventory by one (1) generator from the prior Contract period.

The six (6) counties awarded to TriState Generators, LLC. represent a total cost of \$344,619.00 for preventive maintenance and load bank testing for the three (3) year Contract term. The Division of Procurement and Support Services has performed an analysis against the historical usage for repair services over the expiring Contract term and included an allowance of \$255,381.00 to accommodate agency needs in the coming three (3) years. The suggested price limitation of \$600,000.00 represents an increase from the prior Contract of approximately 31% comparing existing locations. This increase in cost is primarily due to the continued instability of the supply chain, i.e. increases in fuel, material cost, limited labor, etc. It should be noted that the next low compliant bid was approximately 25% higher than TriState Generators, LLC.

Financial Data:
