EXPLANATION

The Energy Policy Act of 2005, introduced by the Environmental Protection Agency (EPA) under President Bush, mandated new Federal Underground Storage Tank (UST) regulations by way of changes to both the UST program and in technologies with an emphasize on properly operating and maintaining equipment to improve environmental protection. In review of these new regulations, Cannon Mountain’s Maintenance Garage Fuel Dispensing System is out of compliance. In order to bring the system into compliance, the supply piping and other ancillary system parts must be upgraded. Operational deficiencies such as dispensing system piping, leak detection and tank level monitoring, venting and apron size have also been identified for upgrades. Finally, due to their age and functionality, the existing fuel pumps will be replaced while the other major repairs are achieved. The project is to be monitored and coordinated with the New Hampshire Department of Environmental Services for completion by November 1, 2015.

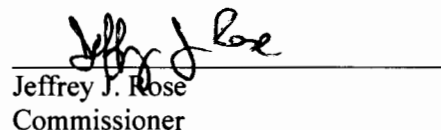

On June 12, 2015, an invitation to submit bids for “*Cannon Mountain Maintenance Garage Fuel Tank Piping & Pump(s) Upgrade*” was advertised and distributed on the Department of Administrative Services and several construction summary websites. Two (2) companies submitted bid proposals by the closing date of June 30, 2015 and Lakes Region Environmental Contractors, Inc. was subsequently selected as the low-bid contractor for this project. A scoring summary is attached for review.

The Attorney General’s Office has reviewed and approved this contact as to form, substance and execution.

Respectfully submitted,

Concurred,

Philip A. Bryce
Director

Overall Summary

Put out to bid June 12 / Received-Closed June 30 / Scored July 7th / Bid Tabulation July 13 / Awarded July 13

The review team felt that both companies offered an excellent package based upon our estimates after review, and that while Lyman edged LRE in the scoring area of demonstrated knowledge of assigned team members toward project and won handily in the area of overall presentation, LRE outbid (under-bid) Lyman by nearly \$18,000 (16.3%) and has a very solid working knowledge of Cannon Mountain's infrastructure, and specifically of the area and project in question.

Project was put out to bid via State Purchasing site, in addition to the Construction Summary and BidClerk websites.

Cannon was contacted by these two primary bidders and fielded several other soft inquiries; one bidder visited the site for a pre-bid meeting, while the other bidder was already amply familiar with the worksite in question; a total of two bids were submitted and scored.
