REQUESTED ACTION

Authorize The Adjutant General's Department to enter into a contract agreement with Architechnology (vendor code #158244), 37 Osgood Road, Sanbornton, New Hampshire, 03269 for Professional Architectural Services for planning and design of various projects as necessary and required by the Department. The contract period is July 1, 2015 through June 30, 2017 with the option for two (2) additional one-year contract renewal periods subject to Governor and Council approval. The amount to be expended under this agreement shall not exceed \$400,000.00.

EXPLANATION

Three (3) different vendors have been selected to perform these contract services, and each project will be funded from accounts specific to each particular project. The majority of projects needing this type of work are maintenance/repair and Capital Budget projects.

The Department proposes to retain the firm of Architechnology to expedite the project workload and provide appropriate technical expertise as required for specific future projects. This contract will enable the Department to respond quickly to unscheduled project requests and possible emergencies regarding architectural and building issues. The decision as to which projects will be assigned will be made on a case-by-case basis, depending on the particular expertise required and the firm's current workload.

The request for qualifications used to identify the chosen vendor(s) and the selection process utilized by the Department for this project is in accordance with RSA 21-I:22, "Selection of Engineers, Architects and Surveyors", as many of these projects will need to have a professional architectural stamp to be legally sufficient.

A rating panel made up of employees from The Adjutant General's Department and the New Hampshire Army National Guard was formed and tasked with rating the proposals submitted. The rating panel members all brought different strengths and knowledge to the table which allowed for independent evaluation during the scoring process, thorough discussion, and weighing the different perspectives during the final rating process.

Her Excellency Margaret Wood Hassan
and The Honorable Executive Council

A Legal Notice was published in the New Hampshire Union Leader newspaper and on the Public Notices web site seeking Requests for Proposals (Letters of Intent) to provide these services. The bid transmittal letter noted that more than one firm may be selected to perform these services. Fourteen (14) vendors submitted letters of interest and ten (10) firms submitted Qualification Packets. Those ten (10) packets were all rated by the panel based on clarity of proposal, comprehension of assignment, work history with similar projects, capacity to do work in a timely manner, quality and experience of project managers and team members, overall suitability to the assignment, quality assurance protocols, and letters of reference.

The ten (10) firms with the highest rated scores were chosen to come in to make a comprehensive oral presentation to the rating panel addressing each of the specific topic areas on the rating checklist. Three (3) firms were subsequently chosen as the finalists based on the total combined score from their initial rating and the oral presentation score. The references provided by these three (3) vendors were then contacted to validate information provided, and the two (3) finalists were confirmed as selected.

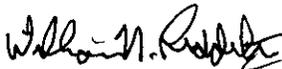

The Adjutant General's Department negotiated with the vendor(s) to establish the rates of compensation. The rates were compared with recent New Hampshire Bureau of Public Works contracts for these services and a number of Federal Government General Services Administration contracts. The Adjutant General's Department determined that the negotiated rates are fair and reasonable. The Request for Qualifications was advertised with an initial base contract period with the option for two (2) one-year renewal periods subject to the agreement of both parties and additional Governor and Council approval of such contract renewal(s).

A rating summary of Architechnology is attached, along with the rating of all firms who submitted a proposal for these services.

Federal Funds may be used to pay for these contract services and are provided to the State of New Hampshire - Adjutant General's Department by the National Guard Bureau pursuant to a Federal-State Master Cooperative Agreement for the mutual support of the New Hampshire National Guard. The contract agreement has been approved by the New Hampshire Department of Justice as to form, substance and execution.

Your approval is respectfully requested.

Respectfully Submitted,

William N. Reddel, III

Bid/Management Summary

The procedures used to identify the three (3) firms chosen followed the requirements pursuant to RSA 21-I: 22, "Selection of Engineers, Architects, and Surveyors."

A solicitation was placed in the Union Leader newspaper seeking Requests for Proposals (RFP)/Letters of Intent. The RFP specified that more than one firm could possibly be chosen to perform these services.

Fourteen (14) firms expressed interest, ten (10) firms submitted Qualification Packets, and three (3) firms were chosen to perform these services.

The ten (10) packets were reviewed individually by a Rating Panel which comprised of four (4) professionals specializing in this discipline (see *Rater's Bios*).

Packets were rated on clarity of proposal, comprehension of assignment, work history with similar projects, capacity to do work in a timely manner, quality and experience of project manager and team, overall suitability for the assignment, and quality assurance protocols.

The Rating Panel then reviewed Qualification Packet Point totals by firm and assigned 1 through 5 points, rated in order of precedence where 5 = 1st choice, 4 = 2nd choice, etc. (see *Scorecard by Points*).

The three (3) firms chosen to perform these services are H.L. Turner, Dignard, and Architechnology.

EXHIBIT A: SCOPE OF SERVICES

Professional Architectural Services

GENERAL: The contractor shall furnish all labor, materials, and services as needed to perform consultant services as necessary in regards to site/civil design, development, environmental and investigations, landscape planning, master planning, and cost estimating. The Contractor shall comply with all applicable state and local laws, rules and regulations.

BACKGROUND: The Adjutant General's Department has approximately fifteen (15) Readiness Centers (RC), four (4) Field Maintenance Shops (FMS), a State Military Reservation (SMR), a 100-acre Training Site, a Regional Training Institute (RTI), an Army Aviation Support Facility (AASF), and other ancillary facilities statewide that are used for training and support of the New Hampshire Army National Guard (NHARNG). The NHARNG facilities management office (FMO) located in Concord on the SMR has chief responsibility for providing for all infrastructure support to include master planning, site development, design review and facilities maintenance. Most facilities are approximately 50-years old and due to changes in building codes as well as technology our facilities do not meet our needs as a modern operational force or the needs of the citizens of our communities. Aging buildings and infrastructure are compromising mission success at our facilities due to the following reasons: variety of non-standardized systems installed during upgrades over the life of the building; original systems installed may not be performing at peak efficiency due to end of life-cycle; lack of cohesive master plan for restoration and modernization of building systems; lack of ADA accessibility and code compliance at sites; lack of fire/life safety equipment; inefficient window air conditioning units installed; in addition to minimal upgrades in electrical and plumbing systems. The FMO is looking to obtain services to include design of small projects in accordance with current state and federal statutes, as well as complete analysis of existing building systems, master plans and other deliverables for our facilities in order to correct current deficiencies and meet future operational requirements.

LIST OF POTENTIAL PROJECTS WITH GENERAL DESCRIPTIONS:

The following is a list of potential projects to be performed under this contract. The Adjutant General's Department may request the contractor to perform other services not specified that it determines are within the scope of the Agreement and the contractor has the technical qualifications to perform.

Architectural services: Design and provide plans and specifications for a variety of minor building construction/renovation projects to include: latrine upgrades, kitchen upgrades, large scale additions; door and window replacement; rehabilitation of concrete steps; UST removal;

repaving of parking areas; sidewalk replacement; brick wall repointing as well as others. Provide construction documents at varying levels of design to include fencing, walls, passive vehicle barriers or other items applied along the perimeter of a facility to create a protective standoff and obscure vision, hinder personnel access, and hinder or prevent unauthorized vehicular access.

Consultant Services: Provide opinions of cost for projects in design or under construction.

Topographic/GIS Surveys: Readiness Centers throughout the state lack accurate surveys to determine if encroachments have occurred on our properties. Land survey plats are needed to decide encroachment issues, determine property lines in regards to erecting new motor pool fencing, etc. As the Adjutant General's Department expands its GIS-capabilities, linking land survey plats with GIS will be required and must meet National Guard Bureau (NGB) requirements. All deliverables should be georeferenced using NH State Plane 1983 coordinates with 2 foot contour intervals. Firms should have the capability to delineate wetlands on our properties.

Project Management and Delivery Instruction:

Once the firm(s) is/are selected, the general anticipated project execution methodology will be:

1. The Adjutant General's Department shall determine project needs and develop a scope of work, or collaborate with the contractor to develop a scope of work. The scope of work shall include as a minimum: general project information, tasks to be completed, deliverables to be provided and a timetable for completion.
2. The Adjutant General's Department may request a short proposal and project fee estimate from the contractor(s).
3. The contractor(s) shall prepare a cost proposal. Cost proposals will be based on the time and materials rates (and overhead and profit if broken out separately) based on the approved rates established during negotiations.
4. The Adjutant General's Department will technically evaluate the cost proposal and determine the reasonableness of the cost proposal. If the proposal is determined to be reasonable, the Adjutant General's Department will issue a notice to proceed memorandum. If the project cost proposal is not determined to be reasonable, the Adjutant General's Department will request a justified modification from the contractor. Once an agreed upon cost proposal is established, the owner will issue a notice to proceed memorandum. The notice to proceed will include copies of the approved project scope of work and cost proposal.
5. The owner and the contractor shall attend a project kick-off meeting to clarify the manner of conducting the project, to review a proposed project schedule, a proposed outline of the project tasks to be executed and confirmation of expected deliverables.
6. The Adjutant General's Department may request monthly status reports for any project that exceeds one month in length, and/or between deliverables for specific project tasks. Status report will include: the specific project task that were completed,

- funds spent, a general outline of work to be completed in the coming month, and any issues that need to be addressed.
7. The contractor will submit an invoice as specific project tasks with deliverables are completed and delivered to the owner's project manager. Invoicing for projects costs beyond the approved proposal cannot be issued without prior approval, and a written notice of cost increase approval is required. Invoicing and payment is further outlined in Exhibit B.
 8. The contractor completes projects when all project tasks are accomplished in accordance with the project scope of work as determined by the owner.

EXHIBIT D - Environmental Management System
Notice for Contractors and Contractor employees

The New Hampshire Army National Guard (NHARNG) has implemented an environmental Management System (eMS), in accordance with Executive Orders 13423 and 13514, to guide its operations in an environmentally sound manner. Under its eMS, the NHARNG has identified significant activities, products or services that can interact with the environment (known as aspects) and potential environmental impacts from its operations. The significant environmental aspects are listed below:

- Energy Use
- Vehicle Travel (fleet) Between Work Stations

These significant aspects and their associated impacts are closely monitored by the NHARNG. Further, the NHARNG is tracking the success of the implementation plans established to achieve the NHARNG's objectives.

For the purposes of this notice, applicability is limited to those actions that the contractor or subsequent employees are likely to perform on NHARNG properties.

The primary purpose of this notice is to communicate the three basic tenets of the NHARNG's eMS policy:

- eMS (ISO 14001) is the management system the NHARNG uses to implement the Adjutant General's Environmental Policy;
- The eMS Environmental Policy commits the NHARNG to comply with environmental laws and regulations, to prevent pollution and to promote continual improvement of the eMS; and
- Contractors are responsible for knowing the environmental impacts of their services, and must understand the management requirements for any activities that could affect any of NHARNG's significant aspects, or that could result in potential environmental impacts.

Energy Use

The NHARNG is committed to reducing its consumption of energy. Reducing energy consumption may be realized by turning off electrical equipment when not in use, or reducing heating temperatures/increasing cooling temperatures, using alternative fuels (if available, such as E85 or biodiesel), etc. Contracts that include the use or installation of equipment will seek the most energy efficient technology within the scope of the contract.

Vehicle Travel (fleet) Between Work Stations

The NHARNG is committed to preventing pollution through monitoring of Federal GSA Fleet vehicle usage. Usage of fleet vehicles by contractors is prohibited.

Significant aspects likely to be affected by contractor's activities, products, or services:
