**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (NHDES) to enter into a **SOLE SOURCE** contract with HYSR, Dartmouth, MA (VC# 277908) in the amount of \$10,000 to apply the QPPQ Transform Method to extend daily stream flow records at two stream flow gages on the Cold and Warner Rivers, effective upon Governor and Council approval through May 31, 2019. 100% General Funds.

Funding is available in the following account:

03-44-44-442010-1518-102-~~500731~~ FY 2019  
Department of Environmental Services, Lakes-Rivers Management, Contracts for Program Services \$ 10,000

**EXPLANATION**

This contract is **SOLE SOURCE** because Dr. Neil Fennessey of HYSR, is the developer of the QPPQ Transform Method for calculating stream flows at ungaged locations. Under this contract, HYSR will apply the QPPQ Transform Method for calculating daily stream flow records to two United States Geological Survey (USGS) gages where there are gaps in the daily stream flow record. NHDES requires continuous multi-year records of daily stream flow data to assess protected instream flow criteria.

HYSR updated the 1994 QPPQ Transform Method as part of previous contracts. This contract applies the QPPQ Transform Method to calculate the daily stream flow records at the two USGS stream flow gages in the Cold and Warner Designated River watersheds. These data will provide critical data for the calculation of the Cold and Warner Designated Rivers' protected instream flows.

This contract has been approved by the Office of the Attorney General as to form, substance and execution.

We respectfully request your approval.

Robert R. Scott, Commissioner

The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

**Exhibit A**  
**Scope of Services**

HYSR will perform the following tasks as described in the proposal titled “Extending the Daily Streamflow Period-of-Record at the USGS Gage Site on the Cold River and the USGS Gage Site on the Warner River” submitted by Dr. Neil Fennessey, sole proprietor of HYSR, dated January 2019.

**Project goal:**

To apply the QPPQ Transform Method (QPPQ) in order to extend the stream flow data records at two USGS stream gage sites located on the Cold River at Alstead and on the Warner River at Davisville and to demonstrate that the flow records calculated are suitable for conducting instream flow protection assessments.

**Scope of Work:**

This project applies the 2018-version of the QPPQ Transform Method developed by Dr. Neil Fennessey to extend the stream flow records at two USGS gages on the Cold and Warner Designated Rivers. Daily stream flows will be calculated for gaps in the record occurring between 1950 and 2017. HYSR will evaluate the calculated values by comparing them with concurrent values of observed values.

HYSR will submit a written draft report containing and describing the calculated flow records and the evaluation of the calculated and observed values. HYSR will submit a final report after review by NHDES and revision.

**Project Tasks:**

HYSR will perform the following tasks, summarized below, consistent with the proposal titled “Extending the Daily Streamflow Period-of-Record at the USGS Gage Site on the Cold River and the USGS Gage Site on the Warner River” dated January 2019.

**Task a:** Use the daily period-of-record flows and those at the Cold River at Drewsville gage and the QPPQ Transform to extend the observed daily flows at Cold River, Alstead, NH USGS gage site.

**Task b:** Use the daily period-of-record flows and the QPPQ Transform to extend the observed daily flows at Warner River, Davisville, NH USGS gage site.

**Task c:** For the Cold River, Alstead, NH and the Warner River, NH USGS gage sites use concurrent values of observed flows and of QPPQ Transform Nearest Neighbor daily flows, if available, to construct July 15-September 30 “*Rearing & Growth*” flow duration curves (FDCs).

**Task d:** For the Cold River, Alstead, NH and the Warner River, Davisville USGS gage sites use concurrent values of observed flows and of QPPQ Transform Nearest Neighbor daily flows, if available, to compare the number of negative run-length events that occurred during the July 15-September 30 “*Rearing & Growth*” bioperiod  $Q_{85}$  and  $Q_{95}$  as test thresholds.

**Task e:** For the Cold River, Alstead, NH and the Warner River, Davisville USGS gage sites use values of concurrent observed flows and of QPPQ Transform Nearest Neighbor daily flows, if available, to construct negative run-length frequency histograms for the July 15-September 30 “*Rearing & Growth*” bioperiod  $Q_{85}$  and  $Q_{95}$  as test thresholds.

**Task f:** Submit the draft Final Report and Final Report to NHDES.

**Deliverables:**

HYSR will provide the following deliverables, summarized below, consistent with the proposal provided to NHDES dated January 2019.

1. A daily stream flow record for the USGS gage site Cold River at Alstead (01155000) extended from 1950 through 1978 using the Cold River at Drewsville historic daily gage data and the Watershed Area Ratio (WAR) method.
2. A daily stream flow record for the USGS gage site Cold River at Alstead (01155000) from 1978 through 2008 calculated using the QPPQ Transform Method.

3. A daily stream flow record for the USGS gage site Warner River at Davisville, NH (01086000) from 1979-2002 calculated using the QPPQ Transform Method.
4. At each of the two USGS gage sites, flow duration curve graphs comparing the concurrent values of observed data with the QPPQ data.
5. At each of the two USGS gage sites, graphs of the number of negative run-length events at the  $Q_{85}$  and  $Q_{95}$  thresholds that occurred during the July 15-September 30 bioperiod comparing the concurrent values of observed data with the QPPQ data.
6. At each of the two USGS gage sites, frequency histograms of the negative run-length events at the  $Q_{85}$  and  $Q_{95}$  thresholds that occurred during the July 15-September 30 bioperiod comparing the concurrent values of observed data with the QPPQ data.
7. A draft report documenting and explaining the processes and results of Tasks a. through e.
8. A final report incorporating revisions of the draft report.

**Exhibit B**  
**Method of Payment and Contract Price**

The total contract price shall be \$10,000. This amount will be charged for completing the tasks in Table 5-1 of the HYSR proposal. The payments will be billed in two parts: 1) after the two time series files of daily stream flows are turned over to NHDES; and 2) after the Final Report is approved by NHDES. The State shall pay to the Contractor the project costs in accordance with the following requirements:

No tasks shall be eligible for payment until after the task has been completed. All services shall be performed to the satisfaction of NHDES before payment will be made. All payments shall be made upon receipt and approval of a statement of the tasks completed and upon receipt of an associated invoice. Payments shall be made in accordance with the following schedule based upon completion of specific tasks described in Exhibit A. The total reimbursement shall not exceed the contract award of \$10,000.

Upon completion and NHDES approval of Tasks a. through c.	\$ 7,500
Upon completion and NHDES approval of Tasks d. through f.	<u>\$ 2,500</u>
	\$10,000

**Exhibit C**  
**Special Provisions**

**14. INSURANCE.**

Paragraph 14 of the General Provisions of the standard state agreement is expressly waived. This provision is being waived because the Contractor is an individual and carrying this general liability insurance would be cost prohibitive. The work being conducted is desktop computer work that should not expose the state to any liability.

**CERTIFICATE OF AUTHORITY** – No Certificate of Authority is required to be provided by the Contractor because the Contractor is the sole proprietor of HYSR and there are no other principals.
