REQUESTED ACTION

Authorize the Department of Health and Human Services, to exercise a **sole source** contract amendment with the City of Franklin (Vendor #177390-B002), Purchase Order #1034390,-B001, 316 Central Street, Franklin, NH 03235, by decreasing the Price Limitation by \$15,000 from \$100,000 to an amount not to exceed \$85,000 to continue to provide planning, training, and equipment for the emergency Northern New England Metropolitan Medical Response System (MMRS) strike teams in New Hampshire to enhance the overall medical surge capability in response to a large-scale health event, to be effective July 1, 2016 through June 30, 2017. 100% Other Funds (New Hampshire Department of Safety).

Funds are available in SFY 2017, with authority to adjust encumbrances between State Fiscal Years through the Budget Office, without further approval from the Governor and Executive Council, if needed and justified.

			Total	\$100,000	(\$15,000)	\$85,000

EXPLANATION

This request is **sole source** because the recent grant award to New Hampshire from the US Department of Homeland Security specifically allocates these funds for support of activities of the federally-designated Northern New England Metropolitan Medical Response System. The US Department of Homeland Security has awarded all Metropolitan Medical Response System funds nationwide through state governments in order to enhance local coordination. The City of Franklin is the designated Northern New England Metropolitan Medical Response System in New Hampshire.

The purpose of this amendment is to reduce funding in SFY 2017 due to a reduction in available funds from the New Hampshire Department of Safety through their US Department of Homeland Security grant.

The Northern New England Metropolitan Medical Response System functions to coordinate resources arriving in response to the health and medical consequences of a weapon of mass destruction attack impacting New Hampshire. The Northern New England Metropolitan Medical Response System also serves as a resource for other mass casualty events or significant disease outbreaks in the region, including serving as a structure to help local communities take advantage of arriving federal assets. In planning, exercising and responding, the Northern New England Metropolitan Medical Response System provides a system through which cooperative, regionalized activities can take place.

Because the Contractor realizes the importance and value to the State of New Hampshire to have the ability to quickly activate advanced medical strike teams in the event of large-scale threats to the public's health, they will continue to recruit, train, and equip advanced medical strike teams and provide the services detailed in the original Exhibit A Scope of Services at the reduced funding amount.

The following performance measures will continue to be used to measure the effectiveness of the agreement:

- Provide to the Emergency Management Unit, the roster of volunteers available to respond during an emergency deployment within 24 hours after notification of need, unless specific time frame is given;
- Process to resupply cache is started three days after demobilization;
- All response equipment is checked, cleaned and/or replaced 96 hours after demobilization;
- 90% of training attendees will rate the monthly training sessions on medical and emergency response procedures, equipment operations and maintenance, and emergency management policies and procedures as "excellent" or "very good" in an evaluation survey.
- The Contractor shall develop and submit annually, a corrective action plan for any performance measure that was not achieved.

Area served: Statewide.

Source of Funds: 100% Other Funds originally awarded to the New Hampshire Department of Safety as 100% Federal Funds from the U.S. Department of Homeland Security.

In the event that the Other Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Rick Cricenti
Director

EXPLANATION

This request is **sole source** because the recent grant award to New Hampshire from the US Department of Homeland Security specifically allocates these funds for support of activities of the federally-designated Northern New England Metropolitan Medical Response System. The US Department of Homeland Security has awarded all Metropolitan Medical Response System funds nationwide through state governments in order to enhance local coordination. The City of Franklin is the designated Northern New England Metropolitan Medical Response System in New Hampshire.

Funds in this agreement will be used to recruit, train, and equip advanced medical strike teams. The Northern New England Metropolitan Medical Response System functions to coordinate resources arriving in response to the health and medical consequences of a weapon of mass destruction attack impacting New Hampshire. The Northern New England Metropolitan Medical Response System also serves as a resource for other mass casualty events or significant disease outbreaks in the region, including serving as a structure to help local communities take advantage of arriving federal assets. In planning, exercising and responding, the Northern New England Metropolitan Medical Response System provides a system through which cooperative, regionalized activities can take place.

Should Governor and Executive Council not authorize this Request, there will be diminished ability to quickly activate advanced medical strike teams in the event of large-scale threats to public health.

This contract contains a provision that allows the Department to extend this agreement for two (2) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Council.

The following performance measures will be used to measure the effectiveness of the agreement:

- Provide to the Emergency Management Unit, the roster of volunteers available to respond during an emergency deployment within 24 hours after notification of need, unless specific time frame is given;
- Process to resupply cache is started three days after demobilization;
- All response equipment is checked, cleaned and/or replaced 96 hours after demobilization;
- 90% of training attendees will rate the monthly training sessions on medical and emergency response procedures, equipment operations and maintenance, and emergency management policies and procedures as "excellent" or "very good" in an evaluation survey.
- The Contractor shall develop and submit annually, a corrective action plan for any performance measure that was not achieved.

Area served: Statewide.

Source of Funds: 100% Other Funds originally awarded to the New Hampshire Department of Safety as 100% Federal Funds from the U.S. Department of Homeland Security.

In the event that the Other Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Rick Oricenti
Director

Nicholas A. Toumpas
Commissioner
