EXPLANATION

This request is **retroactive** because the vendors were not able to execute the contract amendment before the deadline for submission for Governor and Executive Council in June 2019. Additionally, the contract amendments are retroactive to June 30, 2019 to continue services under these agreements.

This request is **sole source** because the vendors have effectively operated the Student Assistance Program (SAP) for two (2) to five (5) years. Research demonstrates that substance misuse prevention education is most successful when the program is delivered in a consistent manner over a course of five (5) plus years to affect each cohort of grades. Additionally, the New Hampshire Bureau of Drug and Alcohol Services must demonstrate sustained outcomes through the grant period in order to continue receiving Federal funding.

The contracts contain renewal language in Exhibit C-1 that allows the Department to renew the contract for up to two (2) years, subject to the continued availability of funding, satisfactory performance of service, parties' written authorization and approval from the Governor and Executive Council. The Department is in agreement with renewing services for one (1) of the two (2) years available at this time.

This request includes two (2) of the seventeen (17) agreements listed in the table above. Governor and Executive Council approved thirteen (13) agreements on June 19, 2019, item 29A. Two additional agreements with Claremont School District and Newport School District will be submitted at a future Governor and Executive Council meeting.

The Contractors will continue Student Assistance Programming (SAP) using the evidenced based Project Success in one (1) high school, three (3) middle schools in an effort to serve 898 New Hampshire youth in high need communities in order to prevent and reduce underage drinking, high risk drinking and the use of non-medical prescription drugs including opioids and illicit opioid drug use.

The Contractors conduct screenings for alcohol and other drug use, individual support sessions, group support sessions, and referrals to drug and alcohol treatment providers when indicated by the screening. Additionally, the vendors provide students and parents with targeted drug and alcohol education to improve understanding of risks associated with prescription drug and underage alcohol use as well as the developmental milestones and brain development of adolescents. The scope of work in these agreements require the Contractors to incorporate community level media strategies as well as other approaches shown to impact the culture and overall wellbeing of the community.

Student Assistance Programs work collaboratively with the Department and the NH Center for Excellence to improve the quality of services to students as well as to collect data to make data driven decisions on school-based prevention programming. Based on the Youth Risk Behavior Surveillance Survey trend data from 2013 to 2017 results for the schools indicate statistically significant changes in the following:

- Increase in students' perception of risk for the use of alcohol and non-medical prescription drugs,
- Increase in students' reporting parent and peer disapproval for the use of alcohol and non-medical prescription drugs.

His Excellency, Governor Christopher T. Sununu and the Honorable Council Page 2 of 4

The following performance measures/objectives will continue to be used to measure the effectiveness of the contracts:

- There will be an increase in the percentage of students who report a high risk of harm for using substances (alcohol, marijuana, non-medical prescription drugs, and heroin) on the Youth Risk Surveillance Survey (YRBS).
- There will be an increase in the percentage of students who report their parents/caregivers and peer would disapprove if they used substances on the YRBS.
- There will be a decrease in the percentage of students who report they used substances (alcohol, non-medical prescription drugs and heroin) in the past 30 days on the YRBS.

Should the Governor and Executive Council not authorize this request, 898 students, statewide, may not receive the support and substance misuse prevention education needed during critical adolescent development years. Lack of these support services could result in: higher prevalence rates of underage drinking and drug use; misuse and abuse of prescription medication; and an escalation in adverse childhood experiences, such as a trauma related to parental/caregiver substance abuse.

Area served: Statewide.

Source of Funds: 97% Federal Funds from Department of Health & Human Services (DHHS), Substance Abuse & Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment, DHHS, SAMHSA, Center for Substance Abuse Prevention, and 3% General Funds.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

leffrey A Meyers Commissioner

EXPLANATION

This request is **sole source** because the vendors have effectively operated the student assistance program for a period of two (2) to five (5) years. Research demonstrates that substance misuse prevention education is most successful when the program is delivered in a consistent manner over a course of five (5) plus years to impact each cohort of grades. Additionally, to meet the federal evaluation requirements, the New Hampshire Bureau of Drug and Alcohol Services must demonstrate sustained outcomes throughout the grant periods.

This request represents nine (9) of twelve (12) contracts to provide Student Assistance Program Services. The Department anticipates awarding the remaining three (3) contracts at the next available Governor and Executive Council meeting, upon receipt of the fully executed contract documents.

The purpose of this request is to address underage drinking and prescription drug misuse and abuse in high need populations through the administration of a Student Assistance Program. The Student Assistance Program leverages the State's existing prevention system, resources and capacities to effect change in priority substance abuse areas among high need populations in the communities where those populations reside.

The vendors will implement Student Assistance Programming (SAP) using the evidenced based Project Success in twenty (20) high schools, twenty-three (23) middle schools and one (1) community college in an effort to serve 18,837 New Hampshire youth in order to prevent and reduce underage drinking, high risk drinking and the use of non-medical prescription drugs including opioids and illicit opioid drug use.

His Excellency, Governor Christopher T. Sununu

and the Honorable Council

Page 3

The vendors will conduct alcohol and other drug screenings, individual support sessions, group support sessions, and referrals to drug and alcohol treatment providers when indicated by the screening. Additionally, the vendors will provide students and parents with targeted drug and alcohol education to improve understanding of risks associated with prescription drug and underage alcohol use as well as the developmental milestones and brain development of adolescents. The scope of work in these agreements require the vendors to incorporate community level media strategies as well as other approaches shown to impact the culture and overall wellbeing of the community.

Student Assistance Programs work collaboratively with the Department and the NH Center for Excellence to improve the quality of services to students as well as to collect data to make data driven decisions on school-based prevention programming. Based on the Youth Risk Behavior Surveillance Survey trend data from 2013 to 2017 results for the schools indicate statistically significant changes in the following:

- Increase in students' perception of risk for the use of alcohol and non-medical prescription drugs,
- Increase in students' reporting parent and peer disapproval for the use of alcohol and non-medical prescription drugs, and

The following performance measures/objectives will be used to measure the effectiveness of the agreement:

- There will be an increase in the percentage of students who report a high risk of harm for using substances (alcohol, marijuana, non-medical prescription drugs, heroin) on the Youth Risk Surveillance Survey (YRBS).
- There will be an increase in the percentage of students who report their parents/caregivers and peer would disapprove if they used substances on the YRBS.
- There will be a decrease in the percentage of students who report they used substances in the past 30 days on the YRBS.
- Decrease in students' reporting past 30 day use of alcohol and non-medical prescription drugs.

As referenced in the Exhibit C-1 of these agreements, the Department reserves the right to extend contract services for up to two (2) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Executive Council.

Should the Governor and Executive Council not authorize this request, 18,837 students, statewide, may not receive the support and substance misuse prevention education that may be needed during critical adolescent development years. Lack of these support services could result in: higher prevalence rates of underage drinking and drug use, misuse and abuse of prescription medication, and an escalation in adverse childhood experiences such as a trauma related to parental/caregiver substance abuse.

Area served: Statewide.

His Excellency, Governor Christopher T. Sununu and the Honorable Council

Source of Funds: 98.63% Federal Funds from Department of Health & Human Services (DHHS), Substance Abuse & Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment, DHHS, SAMHSA, Center for Substance Abuse Prevention, and 1.37% General Funds.

In the event that the Federal (or Other) Funds become no longer available, additional General Funds will not be requested to support this program.

EXPLANATION

This request is **sole source** because the vendors have effectively operated the student assistance program for a period of two (2) to five (5) years. Research demonstrates that substance misuse prevention education is most successful when the program is delivered in a consistent manner over a course of five (5) plus years to impact each cohort of grades. Additionally, to meet the federal evaluation requirements, the New Hampshire Bureau of Drug and Alcohol Services must demonstrate sustained outcomes throughout the grant periods.

This request represents nine (9) of twelve (12) contracts to provide Student Assistance Program Services. The Department anticipates awarding the remaining three (3) contracts at the next available Governor and Executive Council meeting, upon receipt of the fully executed contract documents.

The purpose of this request is to address underage drinking and prescription drug misuse and abuse in high need populations through the administration of a Student Assistance Program. The Student Assistance Program leverages the State's existing prevention system, resources and capacities to effect change in priority substance abuse areas among high need populations in the communities where those populations reside.

The vendors will implement Student Assistance Programming (SAP) using the evidenced based Project Success in twenty (20) high schools, twenty-three (23) middle schools and one (1) community college in an effort to serve 18,837 New Hampshire youth in order to prevent and reduce underage drinking, high risk drinking and the use of non-medical prescription drugs including opioids and illicit opioid drug use.

His Excellency, Governor Christopher T. Sununu

and the Honorable Council Page 3

The vendors will conduct alcohol and other drug screenings, individual support sessions, group support sessions, and referrals to drug and alcohol treatment providers when indicated by the screening. Additionally, the vendors will provide students and parents with targeted drug and alcohol education to improve understanding of risks associated with prescription drug and underage alcohol use as well as the developmental milestones and brain development of adolescents. The scope of work in these agreements require the vendors to incorporate community level media strategies as well as other approaches shown to impact the culture and overall wellbeing of the community.

Student Assistance Programs work collaboratively with the Department and the NH Center for Excellence to improve the quality of services to students as well as to collect data to make data driven decisions on school-based prevention programming. Based on the Youth Risk Behavior Surveillance Survey trend data from 2013 to 2017 results for the schools indicate statistically significant changes in the following:

- Increase in students' perception of risk for the use of alcohol and non-medical prescription drugs,
- Increase in students' reporting parent and peer disapproval for the use of alcohol and non-medical prescription drugs, and

The following performance measures/objectives will be used to measure the effectiveness of the agreement:

- There will be an increase in the percentage of students who report a high risk of harm for using substances (alcohol, marijuana, non-medical prescription drugs, heroin) on the Youth Risk Surveillance Survey (YRBS).
- There will be an increase in the percentage of students who report their parents/caregivers and peer would disapprove if they used substances on the YRBS.
- There will be a decrease in the percentage of students who report they used substances in the past 30 days on the YRBS.
- Decrease in students' reporting past 30 day use of alcohol and non-medical prescription drugs.

As referenced in the Exhibit C-1 of these agreements, the Department reserves the right to extend contract services for up to two (2) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Executive Council.

Should the Governor and Executive Council not authorize this request, 18,837 students, statewide, may not receive the support and substance misuse prevention education that may be needed during critical adolescent development years. Lack of these support services could result in: higher prevalence rates of underage drinking and drug use, misuse and abuse of prescription medication, and an escalation in adverse childhood experiences such as a trauma related to parental/caregiver substance abuse.

Area served: Statewide.

His Excellency, Governor Christopher T. Sununu and the Honorable Council Page 4

Source of Funds: 98.63% Federal Funds from Department of Health & Human Services (DHHS), Substance Abuse & Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment, DHHS, SAMHSA, Center for Substance Abuse Prevention, and 1.37% General Funds.

In the event that the Federal (or Other) Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Katja S. Fox Director

However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
