REQUESTED ACTION

Authorize the Department of Health and Human Services, New Hampshire Hospital, to enter into a **Retroactive** amendment to an existing contract with Johnson Controls, Inc. (VC #177721), Manchester, NH for preventative maintenance completed to apply a Belzona coating on the condenser tube sheets, end bells and water boxes of two magnetic bearing YMC2-S1055AAS chillers located at the Acute Psychiatric Services Building at New Hampshire Hospital by increasing the price limitation by \$51,000 from \$60,184 to \$111,184 with no change to the contract completion date of June 30, 2023, effective retroactive to January 1, 2022, upon Governor and Council approval. 100% General Funds.

The original contract was approved by Governor and Council on May 5, 2021, Item #11.

Funds are available in the following accounts for State Fiscal Years 2022 and 2023, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

EXPLANATION

The Department previously had an agreement with the Contractor for chiller inspection and maintenance services, which expired in June 2021 and included the application of the Belzona coating. The Department anticipated that the application of Belzona coating would be completed in June 2021; therefore, the application work was not included in the current competitively bid contract that was awarded to the Contractor and approved by Governor and Council on May 5, 2021. However, the application work was delayed due to COVID-19 restrictions within New Hampshire Hospital's Acute Psychiatric Services facility and could not be completed until January 2022. The application work was inadvertently authorized by staff prior to realizing the services were not included in the current contract. Consequently, this request is **Retroactive** because the Department is seeking to add funding and the Belzona application services to the current contract in order to pay the Contractor for the work completed in January 2022.

The purpose of this request is to pay for costs associated with the application of a Belzona coating on condenser tube sheets, end bells and water boxes of two (2) Magnetic Bearing YMC2-S1055AAS chillers located at the Acute Psychiatric Services Building at New Hampshire Hospital to protect them against moisture and corrosion. Magnetic bearing chillers are state-of-the-art technology that must be serviced by specially trained and licensed technicians. The hospital staff lacks the necessary expertise to perform the required maintenance and repairs.

The Contractor successfully completed the work, which included opening the condensers, preparing the equipment surfaces with abrasives and blasting, applying metal glide to tube sheets to bring tube surfaces flush with tube ends, and applying two (2) layers of Belzona coating to all prepped surfaces. The Contractor is also providing a five-year warranty for the Belzona coating, effective from the date of application.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions, of the original agreement, the parties have the option to extend the agreement for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and Governor and Council approval. The Department is not exercising its option to renew at this time.

Should the Governor and Council not authorize this request, the Department will not be able to pay the Contractor, which is based in Manchester, NH and has reliably provided these services to New Hampshire Hospital for approximately five (5) years, for the necessary maintenance work to the magnetic bearing chillers at New Hampshire Hospital.

Respectfully submitted,

Lori A. Shibinette
Commissioner

EXPLANATION

The purpose of this request is to provide routine inspections, preventative maintenance, and corrective and emergency service repairs for two Magnetic Bearing YMC2-S1055AAS chillers located at the Acute Psychiatric Services Building at New Hampshire Hospital

The Contractor will provide routine operating inspections and preventative maintenance three times per year on two (2) Johnson Controls York Magnetic Bearing Chillers Model # YNCW-S1055AAS located in NH Hospital's Acute Psychiatric Services building. The Contractor will also provide scheduled corrective repairs and maintenance if needed, and emergency service repairs 24 hours per day, seven days per week at the Department's request.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 2

Magnetic bearing chillers are state-of-the-art technology that must be serviced by specially-trained and licensed technicians. The hospital staff lacks the necessary expertise to perform the required maintenance and repairs.

The Joint Commission requires the New Hampshire Hospital to maintain a proper "Environment of Care" for patients at all times. By using state-of-the-art technology to track and monitor functionality, these chillers ensure that New Hampshire Hospital maintains the proper climate and temperature. Without these chillers, the Acute Psychiatric Services Building at New Hampshire Hospital, including patient care units, support staff areas, and general communal areas, would become extremely hot during warm temperature months.

The Department will monitor contracted services by overseeing Contractor activity while performing the services onsite, and reviewing a service report that the Contractor will be required to provide after each service call.

The Department selected the Contractor through a competitive bid process using a Request for Bids (RFB) that was posted on the Department's website from January 22, 2021 through March 5, 2021. The Department received one (1) bid. The Bid Summary Sheet is attached.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions, Section 1, Revisions to Form P-37, General Provisions, Subsection 1.2 of the attached contract, the parties have the option to extend the agreement for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Department may not be able to maintain the chillers in accordance with the warranty requirements, which may lead to additional costly repairs, or complete failure of the equipment. Should the chillers not be able to maintain the ambient air temperature within the acceptable range, New Hampshire Hospital could be found in violation of The Joint Commission's standard for an "Environment of Care."

Area served: Acute Psychiatric Services Building at New Hampshire Hospital.
