EXPLANATION

The Department of Environmental Services (DES) issued a Request For Proposals (RFP) for the 2015 Watershed Assistance Grants program. Twenty proposals were received. The proposals were ranked based on the criteria included in the RFP: water quality improvement or protection; cost/benefit ratio; local capacity to complete the project; relative value or significance of the water body; and, general quality and thoroughness of the proposal. Based on results of the selection process and available federal grant funding levels, the fourteen highest ranked projects were selected to receive funding. Please see Attachment B for a list of project rankings and review team members.

The Watershed Assistance Grants focus on the reduction of nonpoint source (NPS) pollution. NPS pollution occurs when rainfall, snowmelt, or irrigation water runs over land or through the ground, transporting materials which are then deposited into rivers, lakes, and coastal waters, or introduced into the groundwater. Pollutants can include chemicals, sediments, nutrients, and toxics. These materials can have harmful effects on drinking water supplies, recreation, fisheries, and wildlife. Land development or changes in land use can also cause NPS pollution by disrupting the natural hydrology of a water body, increasing impervious surfaces, and contributing to the loss of aquatic habitat. Watershed Assistance programs address NPS pollution by promoting good land use practices on a watershed scale.

Baboosic Lake is a 222 acre natural lake with a 1,536-acre watershed situated on the Amherst/Merrimack town line. The 2008 Watershed Management Plan noted that “constant water quality monitoring for the past 25 plus years reveals a continuing deterioration in water quality and clarity”. Additionally, Baboosic Lake has experienced a disturbing trend of algae and cyanobacteria

blooms. The Baboosic Lake Association (BLA) applied for grants to remediate sites that were contributing pollution to the lake. In 2011 and 2012 the BLA, in conjunction with its project partners, completed 14 of 17 priority sites identified in the watershed plan. More recent data suggest the decreasing water quality trend has stabilized, and phosphorous samples suggest a 1.2 ppb decrease in seasonal average phosphorous in the lake. However, Baboosic Lake still fails to meet state water quality standards. Additional phosphorous reduction efforts will be necessary to reach the 2008 plan's in-lake phosphorous concentration goal, and to remove Baboosic Lake from the State's impaired waters list. To progress toward this goal, the BLA will target another high load phosphorous site identified in the plan.

The BLA's goal is to reduce the loading of nutrients, particularly phosphorous and sediment, by rectifying problem areas which were identified by the watershed management plan. Installation of best management practices (BMPs) to treat stormwater at these locations would result in a significant reduction phosphorous and sediment pollutant loading according to estimates prepared by BLA's consulting engineer. This phase of the project includes final site evaluation, BMP design, permitting, and construction. The grantee will also undertake development of a BMP maintenance program to help maintain the existing BMPs in the watershed.

The total project costs are budgeted at \$76,849. DES will provide \$46,100 (60%) of the project costs through a federal grant and the Baboosic Lake Association will provide the remaining costs through cash and in-kind services. A budget breakdown is provided in Attachment A. In the event that Federal Funds become no longer available, General Funds will not be requested to support this program. The agreement has been approved by the Office of the Attorney General as to form, execution, and content.

We respectfully request your approval.

### **Additional Requirements of the Agreement**

#### **Quality Assurance**

All project activities which are to be guided by a Quality Assurance document such as a Quality Assurance Project Plan (QAPP) or Site Specific Project Plan (SSPP) must **not** begin prior to DES/EPA approval of that QA document. In the event that sampling, modeling, or other such activities precede QA document approval, the data will not be considered valid, and the grantee will forfeit the ability to receive payment for those activities.

#### **Outreach Materials**

All materials produced for public distribution shall be reviewed and approved by DES prior to distribution and shall include the DES logo and the following citation: "Funding for this project was provided in part by a Watershed Assistance Grant from the NH Department of Environmental Services with Clean Water Act Section 319 funds from the U.S. Environmental Protection Agency".

#### **Operations and Maintenance**

Management practices implemented as agreed upon in the scope of services of this grant agreement and with grant funds or matching funds under a Section 319 Watershed Grant, shall be properly operated and maintained for the intended purposes during the life span of the project. The life span of a project shall be determined by the Grantee, tailored to the types of practices expected to be funded in this project, and agreed upon by DES. The Grantee shall provide DES with an engineering estimate of the design life of the best management practice(s) (BMPs), or in the case of small-scale BMPs which do not have a design life estimation completed by an engineer, the design life of that practice shall be estimated to be ten years.

Operation includes the administration, management, and performance of non-maintenance actions needed to keep the completed practice safe and functioning as intended. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacement of the practice to its original condition if one or more components fail. The Grantee shall assure that any sub-award of Section 319 funds similarly include the same condition in the sub-award. Additionally, both EPA and DES reserve the right to periodically inspect a practice during the life span of the project to ensure that operation and maintenance are occurring. If it is determined that the participants are not operating and maintaining these practices in an appropriate manner, DES may request a refund for that practice supported by the grant.

**Exhibit B**  
**Contract Price and Method of Payment**

All services shall be performed to the satisfaction of DES before payment is made. All payments shall be made upon receipt and approval of stated outputs and upon receipt of an associated invoice.
