

# VOTING WITH THE CLEARCAST™ TABULATOR

The voter marks their ballot.

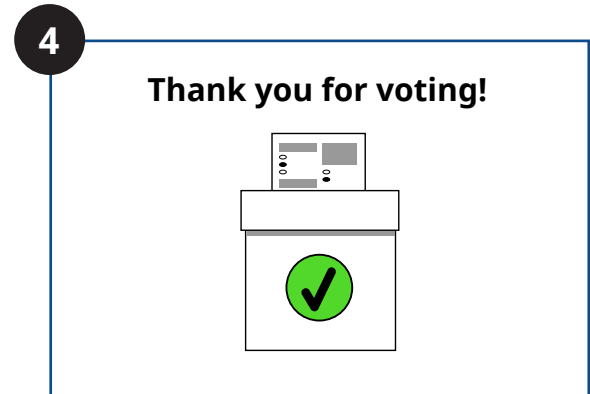

Voter places marked ballot into ClearCast scanner.

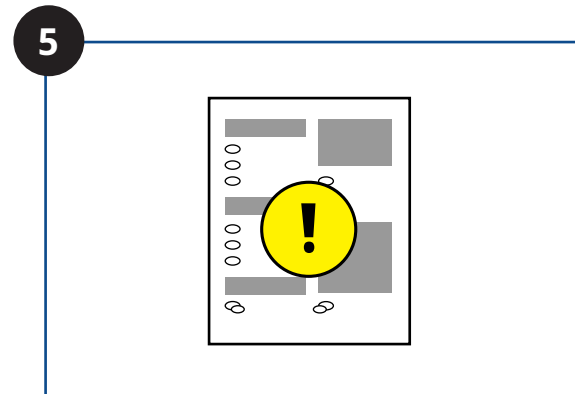

**Your ballot is being processed**

Voter waits for the tabulator to process ballot.

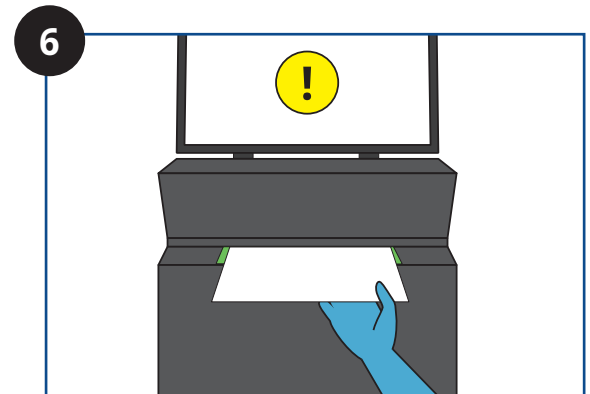

**Thank you for voting!**

The tabulator either alerts voter that their ballot has been cast, or returns ballot to the voter (see next panel).

In the event a ballot is returned, the tabulator indicates the reason with an alert message (see pages 2 and 3 for examples of alert messages).

The voter chooses for the ballot to be returned for revision, or to submit as is.
