EXPLANATION

This project is part of the State's Ten Year Transportation Improvement Plan under the Highway Safety Improvement Program (HSIP). The project involves the replacement or removal of 9,000 feet of deficient cable guardrail and 1,350 linear feet of deficient w-beam guardrail including 2 "F" terminal units. The existing cable, "F" terminal units, and blunt ends shall be upgraded to meet the current guardrail standards and are located along Tier 2 and 3 roadways in Maintenance Districts 4 and 5.

The existing cable guardrail and "F" terminal units along US 202, NH 13, NH 31, NH 77, NH 122, NH 130, NH 136, NH 137, and NH 149 do not meet the current AASHTO or NHDOT safety standards. The purpose of this project is to replace the existing sub-standard rail and end units with new beam guardrail and end units that do meet the current standards.

The proposed contingency amount is 5% of the contract amount. This is to account for unanticipated traffic control needs and any guardrail adjustments that may need to be made in the field.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 90% Federal (Highway Safety Improvement Program (HSIP)) utilizing Turnpike Toll credits as the State's 10% match, effectively using 100% Federal Funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Your approval of this resolution is respectfully requested.

Sincerely,

Victoria F. Sheehan
Commissioner

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: This project involves the replacement or removal of 9,000 feet of deficient cable guardrail and 1,350 linear feet of deficient w-beam guardrail including 2 "F" terminal units. The existing cable, "F" terminal units, and blunt ends shall be upgraded to meet the current guardrail standards and are located along Tier 2 and 3 roadways in Maintenance Districts 4 and 5.

FEDERAL FUNDING: 90% (Highway Safety Improvement Program (HSIP)) utilizing Turnpike Toll credits as the State's 10% match

CONTINGENCY: The proposed contingency amount is 5% of the contract amount. This is to account for unanticipated traffic control needs and any guardrail adjustments that may need to be made in the field.

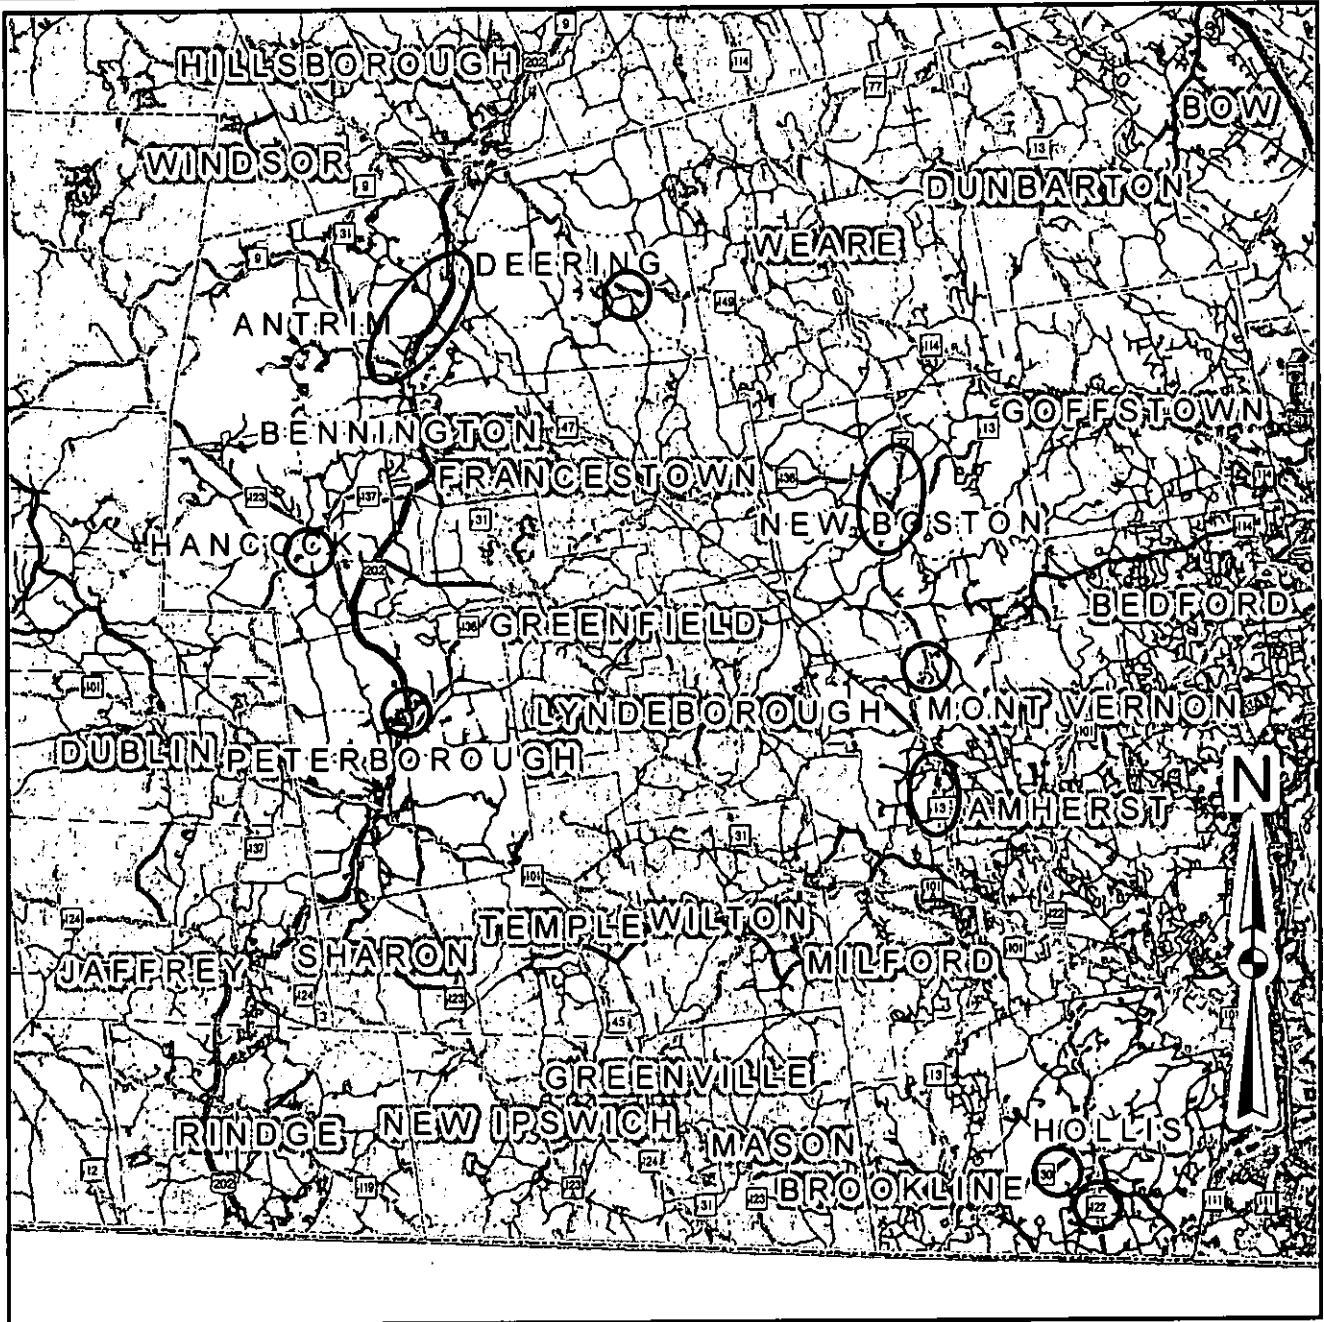

PROJECT INITIATED: This project was initiated through the State's Ten Year Plan, under the HSIP Program.

PROJECT EXPLANATION: The existing cable guardrail and "F" terminal units along US 202, NH 13, NH 31, NH 77, NH 122, NH 130, NH 136, NH 137, and NH 149 do not meet the current AASHTO or NHDOT safety standards. The purpose of this project is to replace the existing sub-standard rail and end units with new beam guardrail and end units that do meet the current standards.

TRAFFIC IMPLICATIONS: All work to be performed in a manner that permits two-way traffic whenever possible. Short-term one-lane, alternating two-way traffic will be allowed with prior approval.
