EXPLANATION

Exotic aquatic plants have been a problem in the above-listed waterbodies for several years. NHDES grant funds in the amounts outlined in the table above are earmarked for management activities to control these exotic aquatic plants in 2019.

The primary purpose of New Hampshire's Exotic Aquatic Plant Program is to "prevent the introduction and further dispersal of exotic aquatic weeds and to manage or eradicate exotic aquatic weed infestations in the surface waters of the state" (RSA 487:17. II).

His Excellency, Governor Christopher T. Sununu
and The Honorable Council

Page 2 of 2

The program, initiated in 1981, has five focus areas: 1) Prevention of new infestations; 2) Monitoring for early detection of new infestations to facilitate rapid control activities; 3) Control of new and established infestations; 4) Research towards new control methods with the goal of reducing or eliminating infested areas; and 5) Regional cooperation.

DES received 44 requests for funding to control exotic aquatic plant growth in 2019. Each project was selected to receive a grant. The budget estimate for each entity is included as Attachment A in the agreements. Please refer to Attachment B of each agreement for a listing of projects that are identified to receive funding, as well as information on the grant request reviewer.

The program is 100% fee funded through the Lake Restoration Fund. In the event that fee funds become no longer available, General Funds will not be requested to support this program. This agreement was approved by the Office of the Attorney General as to form, execution, and content.

We respectfully request your approval.

Robert R. Scott, Commissioner

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.

Exhibit A
Scope of Services

1. The Town of Freedom is the grantee for this project. The New Hampshire Department of Environmental Services (NHDES) is referred to as the "state." Amy P. Smagula of the Watershed Management Bureau is the grant officer for the state.
2. Variable milfoil, an invasive aquatic plant, has become a nuisance problem in various portions of the Danforth Pond system, and the grantee is seeking grant funds to assist in control efforts in 2019.
3. The grantee shall ensure that the contractors (selected through a competitive bid process) adhere to the following project-specific tasks:

For herbicide treatment in 2019, the grantee will ensure that SOLitude Lake Management performs the following tasks:

- Task 1 Prepare and file Special Permit application with NH DPC (inclusive of the required abutter notifications, publication of newspaper notices and all costs associated with advertising and attending a public hearing, if required).
- Task 2 Perform chemical treatment of the subject waterbody per the bid specifications, inclusive of all labor, chemical, and equipment costs.
- Task 3 Conduct pre- and post-treatment surveys; coordinate water quality sampling for herbicide residues; and, submit the required written reporting to the State per the bid specifications.

For the diver work in 2019, the grantee will ensure that the diver(s) perform(s) the following tasks:

- Task 1 Notify the NHDES Exotic Species Program of the scope and timing of the project, and how the materials removed from the pond will be disposed of, and the names of the divers performing the work, at least two weeks before the work is scheduled to begin. Divers performing this work must be certified Weed Control Divers in New Hampshire.
 - Task 2 Notify NHDES within 5 business days of when the work is completed by submitting a daily dive report for work that was performed, per the reporting examples provided in the Weed Control Diver course.
4. NHDES will provide monetary support to you for up to 25% of the total project cost as outlined in the project bid, up to the amount specified in this document.

Should the cost of the herbicide or diver work be lower than the bids for those projects, remaining grant funds may be used match costs associated with other NHDES approved milfoil control projects in the above referenced waterbody.
