CHRISTOPHER D. CLEMENT, SR.
COMMISSIONER

JEFF BRILLHART, P.E.
ASSISTANT COMMISSIONER

Bureau of Construction
February 14, 2014

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with D.L. King & Associates, Inc. (Vendor 168979) of Nashua, NH on the basis of a low bid of \$568,950.00 for a new fueling facility and removing the existing fuel tanks at the Wakefield and Tuftonboro Sheds, from the date of Governor and Council approval through August 1, 2014 unless extended by the Department in accordance with the Standard Specifications. 100% Capital Budget Funds.

Table with 2 columns: Funding description and FY 2014 amount. Includes entries for 04-96-96-960030-8695 and 04-96-96-960030-7986.

2. Further authorize that a contingency in the amount of \$56,895.00 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 10% of the contract amount.

Table with 2 columns: Funding description and FY 2014 amount. Includes entries for 04-96-96-960030-7986 and 034-500161 Capital Budget Funds.

EXPLANATION

This is a Capital Budget funded project as part of the Tank Replacement Program. This project consists of constructing a new vehicle fueling facility and removing the existing fueling facility at the Wakefield Shed (PS 312) and Tuftonboro Shed (PS 311). The work at each facility includes the installation of an underground storage tank (UST), a dispenser fueling pad with pre-manufactured pump enclosure, and all other associated fueling system equipment and appurtenances.

The contingency amount is proposed to be 10% of the contract amount. These are sites with high groundwater and are being constructed during a time of rising fuel prices. The work includes replacement of substandard underground fuel storage tanks and typically has higher risks of cost overruns due to the potential for contaminated soils and groundwater to remediate. Until the existing tank is removed and soil and water testing completed, the true extent of the dewatering and remediation efforts is only an estimate.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Handwritten signature in black ink, appearing to read 'C.D. W' with a stylized flourish.

Christopher D. Clement, Sr.
Commissioner

CDC/md

Department Estimate: \$569,550.00
Contract Amount: \$568,950.00
Under Estimate: \$ 600.00

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: This project consists of constructing a new vehicle fueling facility and removing the existing fueling facility at the Wakefield Shed (PS 312) and Tuftonboro Shed (PS 311). The scope of work at the Wakefield facility will include the installation of one (1) 15,000-gallon split/two product underground storage tank (UST), one (1) multi-product dispenser and fueling pad with pre-manufactured pump enclosure, and all other associated fueling system equipment and appurtenances. The scope of work at the Tuftonboro facility will include the installation of one (1) 3,000-gallon diesel underground storage tank (UST), one (1) single-product dispenser and fueling pad with pre-manufactured pump enclosure, and all other associated fueling system equipment and appurtenances. The project will include the relocation and re-installation of the existing Orpak pedestal at the Wakefield facility, and the installation of an Ortop2 fuel management console at the Tuftonboro facility. The project will also include the removal of one (1) existing 3,000-gallon UST, one (1) existing dispenser and associated fueling pad, the dispenser shed and all associated fueling system equipment and appurtenances related to the existing fueling system at each location. Additionally, one (1) existing 2,500-gallon gasoline aboveground storage tank (AST) and all associated equipment and appurtenances at the Wakefield location shall also be removed.

FEDERAL FUNDING: Non – Federal

CONTINGENCY: The Contingency amount is proposed to be 10% of the contract amount. These are sites with high groundwater and are being constructed during a time of rising fuel prices. The work includes replacement of substandard underground fuel storage tanks and typically has higher risks of cost overruns due to the potential for contaminated soils and groundwater to remediate. Until the existing tank is removed and soil and water testing completed, the true extent of the dewatering and remediation efforts is only an estimate.

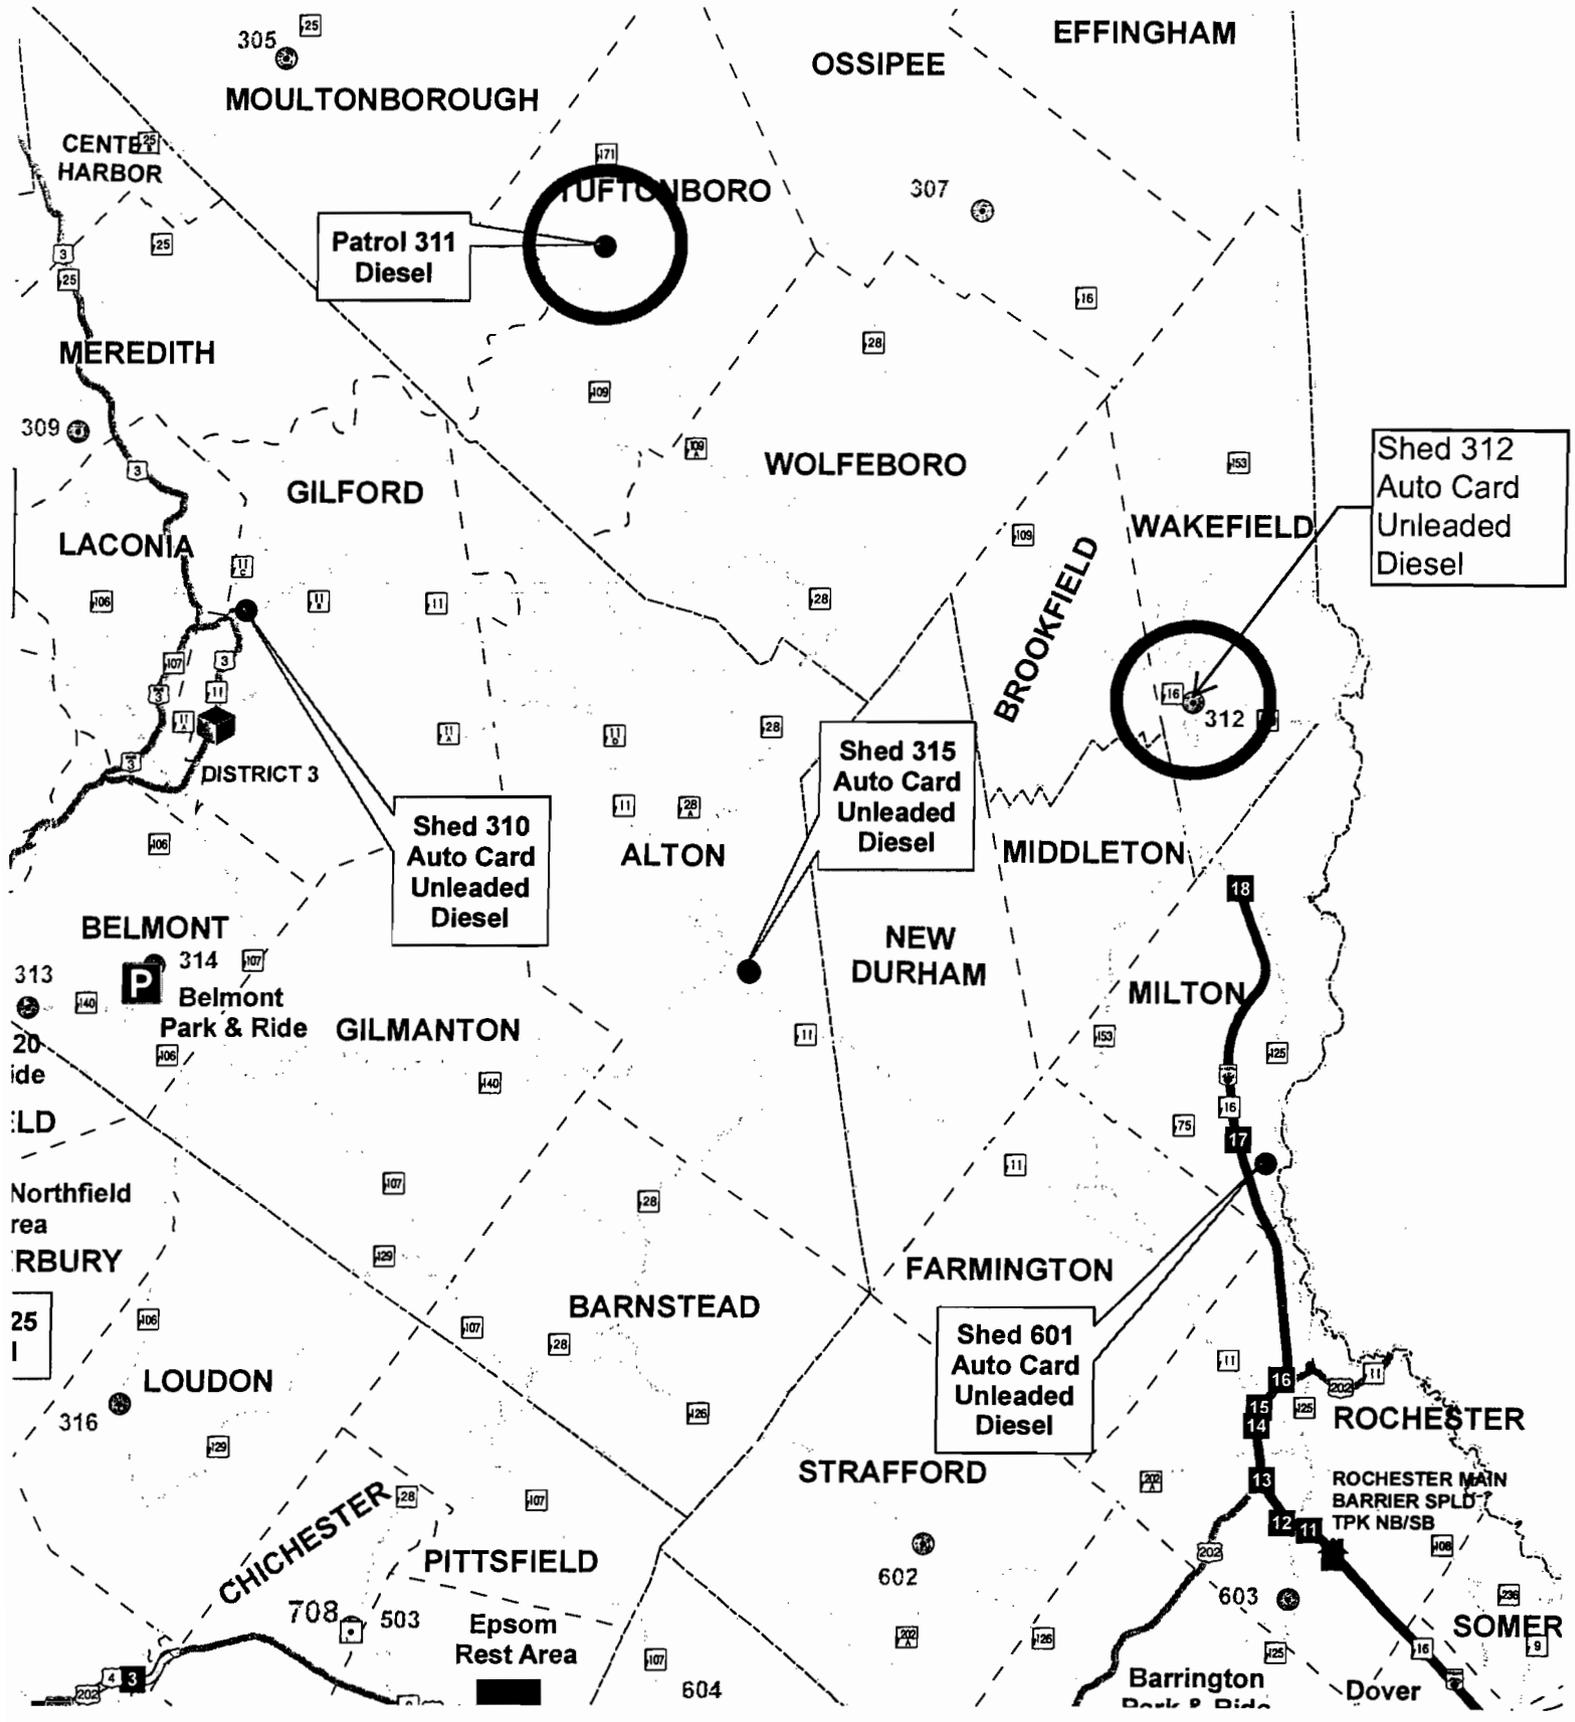

PROJECT INITIATED: To meet Department of Environmental Services (DES) requirements for the replacement of single walled Underground Storage Tanks (UST).

PROJECT EXPLANATION: The Department of Transportation is required to comply with all DES rules relative to the testing and removal of all UST's. All single walled tanks are required to be removed by 2015.

TRAFFIC IMPLICATIONS: All the required work will be performed within the limits of the Patrol Shed yards.

COMPLETION DATE: August 1, 2014
