Dept. Environmental Services; In-Lieu Wetland Mitigation, Grants – Non - Federal

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Salmon Falls-Piscataqua River watershed in April, 2018. The Nature Conservancy application was received and on November 28, 2018, DES announced the decision to fund The Nature Conservancy project in the Salmon Falls – Piscataqua River watershed. The project proposed by The Nature Conservancy was recommended for

Page 2

Piscataqua River watershed. The project proposed by The Nature Conservancy was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

The project will protect 1,660 linear feet of frontage on the designated Wild and Scenic Lamprey River, and nearly one acre of floodplain and wetland habitat in an area that is critical to maintaining water quality in the Great Bay Estuary. The parcel provides important linkage to other conserved properties and has significant wildlife habitat as identified by the Northeast Blanding's Turtle Working Group, a cooperative research effort lead by New Hampshire Fish and Game. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Robert R. Scott, Commissioner

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.
