Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, New Hampshire 03301

*Retracted
10/17/13 General*

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Public Health Services, Bureau of Laboratory Services to pay the Association of Public Health Laboratories, 8515 Georgia Avenue, Suite 700, Silver Spring, MD 20910-3403, (Vendor #170491-R001), \$9,750.00 for annual membership dues, **retroactive** to July 1, 2013 through June 30, 2015. Funds are available in the following account for SFY 2014 and SFY 2015:

05-95-90-903010-79660000 HEALTH AND SOCIAL SERVICES, DEPT OF HEALTH AND HUMAN SVS,
HHS: DIVISION OF PUBLIC HEALTH, BUREAU OF LABORATORY SERVICES, PUBLIC HEALTH
LABORATORIES

Fiscal Year	Class/Object	Class Title	Job Number	Total Amount
SFY 2014	026/500251	Organizational Dues	90059000	\$4,750.00
SFY 2015	026/500251	Organizational Dues	90059000	\$5,000.00
			Total	\$9,750.00

EXPLANATION

This request is **retroactive** because it was necessary to wait for approval of the SFY 2014 – 2015 biennium State Budget.

Funds are requested to pay the annual membership dues to the Association of Public Health Laboratories (APHL) for SFY 2014 and SFY 2015. The Association of Public Health Laboratories is a national nonprofit organization dedicated to working with its members to strengthen public health laboratories. The Association's mission is to promote the role of public health laboratories in shaping state, national, and global health objectives, and to promote policies, programs and technologies that assure continuous improvement in the quality of laboratory practice and health outcomes. The Association strives to provide public health laboratories with the resources and infrastructure needed to protect the health of the nation, and to prevent and control disease globally.

In collaboration with its members, the Association advances quality laboratory practice, trains tomorrow's laboratory leaders, supports laboratory emergency preparedness, and infectious disease surveillance and outbreak response including foodborne disease outbreaks. Through cooperative agreements with the Centers for Disease Control and Prevention (CDC), funds are made available to the Association to fund partner's participation in projects that are of importance to public health, the State of New Hampshire, and the Centers for Disease Control and Prevention.

Listed below are answers to standard questions required for Governor and Council organization dues and membership approval submissions:

1. How long has this organization been in existence and how long has this agency been a member of this organization?
 - The American Public Health Association formed the Committee of Laboratories in 1899. The organization was renamed the Association of Public Health Laboratories (APHL) in 1998. New Hampshire Public Health Laboratories became a member in 1952.
2. Is there any other organization, which provides the same or similar benefits, which your agency belongs to?
 - No, this agency is unique and specific for public health laboratories.
3. How many other states belong to this organization and is your agency the sole New Hampshire state agency that is a member?
 - All 50 States, plus county and local public health departments, and US territories belong to the organization. The New Hampshire Department of Health and Human Services is the sole New Hampshire agency with membership to this organization.
4. How is the dues structure established? (Standard fee for all states, based on population, based on other criteria, etc.)
 - Annual dues for members of the American Public Health Association are determined by the Board of Directors, based on population.
5. What benefit does the state receive from participating in this membership?
 - The Association of Public Health Laboratories provides staff to advocate in Washington, DC for national issues of public health and public health laboratory significance. For small states such as New Hampshire that do not have a Washington, DC office, the Association of Public Health Laboratories legislative staff provide timely briefings to state laboratory officials on congressional activities, and non-partisan advocacy on public health laboratory issues, such as funding for laboratory emergency response, infectious disease control, and foodborne disease outbreaks. Given that more than half of the public health laboratories' operating budget comes from federal sources, the Department's participation with the Association of Public Health Laboratories is vital to maintain our ability to continue to receive federal grants and funding for these programs.
 - The Association of Public Health Laboratories provides technical support and helps New Hampshire apply for and obtain federal grants that are helping the laboratory in the development and implementation of its strategic priorities, and the Association provides supplemental funding for these priorities, such as funding to implement rapid molecular testing for tuberculosis.
 - The Association of Public Health Laboratories provides funding for travel to trainings and national meetings, including the national tuberculosis workshop meeting. The Association provides both webinar training and "on-hands" laboratory training for a variety of public health laboratory topics including Pertussis testing, molecular virology testing, and tuberculosis.
 - The Association of Public Health Laboratories provides direct funding for travel and training for through its Emerging Laboratory Leadership Program. In the past five years, four supervisors and a mid-level manager have participated in this program.

- The Association of Public Health Laboratories serves as a clearinghouse for state public health laboratories to confidentially share best practices with each other and to provide training and information to administrative staff on such topics as successful laboratory operations with less funding, improving procurement strategies, and advocating for public health laboratories. In planning and preparing for pandemics (such as Influenza AH7, a novel virus currently circulating in China, and Middle Eastern Respiratory Syndrome Coronavirus, currently circulating in the Middle East), the Association facilitates the prompt dissemination of information to public health laboratories by coordination of conference calls and meetings between subject matter experts at the Centers for Disease Control and Prevention and the public health laboratories.
- The Association of Public Health Laboratories provides direct funding for travel and training for through their Emerging Laboratory Leadership Program. In the past five years, four supervisors and a mid-level manager have participated in this program.
- The Association of Public Health Laboratories organizes through its members, who include all 50 States, technical upgrades on instrumentation and discounts on service agreements by providing a larger customer base for competitive bids.

6. Are training or educational/ research materials included in the membership? If so, is the cost included? Explain in detail.

- Yes, the Association of Public Health Laboratories provides educational webinars at no additional cost to its members. The Association provides funding for travel, hotels and all training costs associated with technical laboratory-specific educational trainings.

7. Is the membership required to receive any federal grants or required in order to receive or participate in licensing or certification exams? Explain.

- No, the membership is not required to apply for federal grants, however the Association of Public Health Laboratories provides guidance and information sessions to assist the NH Public Health Laboratories in its applications for federal grants, including a recent funding opportunity to obtain certification for the laboratories' food safety unit.

8. Is there any travel included with this membership fee? Explain in detail any travel to include the number of employees involved, the number of trips, destination if known and purposes of membership-supported trips.

- Travel is not included in the membership fee, however, the benefits of membership with the Association of Public Health Laboratories provides funding for travel and training of management staff, technical training for laboratory instrumentation and laboratory procedures, training of emerging leaders, and quality improvement activities. In the previous State Fiscal Year, the Association paid for all, or a portion of, 18 trainings and activities, supporting 12 Division staff members.

9. Which State agency employees are directly involved with this organization? (Indicate if they are members, voting members, committee members, and/or officers of the organization.

- The Public Health Laboratories' Director, Dr. Christine Bean, was recently elected to President-elect, and due to a resignation, is currently the President of the Board of Directors, of the Association of Public Health Laboratories.

10. Explain in detail any negative impact to the State if the Agency did not belong to this organization.
- Should Governor and Executive Council not authorize this Request, New Hampshire will have to terminate its membership. Technical training, and planning and preparing for disease outbreaks and pandemics, will be reduced, which may reduce the State's capacity and capability to response to disease outbreaks and emergencies.

Area served: statewide.

Source of Funds: 100% General Funds.

Respectfully submitted,

José Thier Montero, MD
Director

Member-Associates Contact Form

Please list the contact information for your laboratory's member-associates below.

Member-associates are those laboratory staff chosen by the Laboratory Director to receive member benefits. Member-associates may not vote but have the right to hold appointed (but not elected) office (e.g., committee chair, liaison, task force), to serve on committees, and to speak from the floor of a general member meeting. State laboratories are provided with four complimentary member-associate positions. Local Laboratories and Associate Institutional Laboratories are provided with three complimentary member-associate positions. The Laboratory Director may appoint additional member-associates for \$125 each.
