**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (NHDES) to award an Aquatic Resource Mitigation (ARM) Fund grant to the Southeast Land Trust of New Hampshire (SELT), Exeter, NH (Vendor Code #155425-B001) in the amount of \$300,000 for the purpose of conserving a 214-acre parcel located on Dearborn Road and Chester Turnpike in Candia and Auburn, effective upon G & C approval through June 30, 2021. 100% ARM Funds.

Funding is available in the account as follows:

	<u>FY'21</u>
03-44-44-442010-38710000-073-500581	\$300,000
Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal	

**EXPLANATION**

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Merrimack River watershed in April, 2019. The SELT application was received and on November 22, 2019, NHDES announced the decision to fund the SELT project in the Merrimack River watershed. The project proposed by the SELT was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists

Page 2

the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

The SELT project has significant benefits to public drinking water quality by protecting 40 acres of wetlands, all which drain into Little Lake Massabesic and Massabesic Lake— a public drinking water supply for more than 160,000 residents of Manchester and 6 neighboring towns. The parcel consists of a diversity of aquatic resources and their upland buffers including more than 30 distinct wetlands, 12 confirmed vernal pools that support spotted salamander and wood frog breeding habitat, and 5,912 linear feet of stream. The property has been identified as important habitat for Blanding's turtles (endangered in NH) in the "Conservation Plan for Blanding's Turtle and Associated Species of Conservation Need in the Northern United States" by the U.S. Fish & Wildlife Service. In addition, the project contributes to ongoing landscape connectivity efforts in the region having been recognized in The Nature Conservancy's Connect the Coast study which identified 86 acres of the riparian habitat along Murray Mill Brook as a critical wildlife corridor. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

  
Robert R. Scott, Commissioner
