The State of New Hampshire
Department of Environmental Services

Robert R. Scott, Commissioner

April 21, 2020

His Excellency, Governor Christopher T. Sununu
and The Honorable Council
State House
Concord, NH 03301

REQUESTED ACTION

Approve Donato Marangiello's request for a five-year permit time extension, in accordance with RSA 482-A:3, XIV-a, to perform the following work on Lake Winnepesaukee in Alton. File # 2015-00590. This project was previously approved by the Governor and Executive Council on June 24, 2015, Item #146; and on March 25, 2020, Item #65. Governor and Executive Council granted the transfer of the wetlands permit from the original owner of the property Leslie H. Fabian, to the new owner of the property, Donato Marangiello. This project will not have significant impact on or adversely affect the values of Lake Winnepesaukee.

Fill 760 sq. ft. of lakebed to construct 44 linear ft. of breakwater, in a "slight dogleg" configuration leaving a 6 ft. gap at the shoreline, construct a 6 ft. x 47 ft. cantilevered pier connected to a 6 ft. x 35 ft. piling pier by a 6 ft. 12 ft. walkway in a "U" configuration accessed by a 6-ft. x 6 ft. walkway, and drive 2 tie-off piles for the easterly slip on an average of 102 ft. of frontage on Rattlesnake Island, on Lake Winnepesaukee, in Alton.

The New Hampshire Department of Environmental Services (NHDES) finds that the applicant has demonstrated all of the following:

1. The permit for which the extension is being sought has not been revoked or suspended without reinstatement.
2. The extension will not violate a condition of law or rule.
3. The project is proceeding toward completion in accordance with the plans and other documentation referenced in the permit dated May 9, 2015.
4. The applicant proposes reasonable mitigation measures to protect the public waters of the state from deterioration during the period of extension.

The NHDES imposed the following conditions as part of this approval:

1. All work shall be in accordance with plans by Folsom Design Group dated January 23, 2015, as received by the Department on March 16, 2015.
2. This permit shall not be effective until it has been recorded with the County Registry of Deeds office by the Permittee. A copy of the recorded permit shall be submitted to the DES Wetlands Bureau by certified mail, return receipt requested, prior to construction.
3. Appropriate siltation and erosion controls shall be in place prior to construction, shall be maintained during construction, and shall remain until the area is stabilized.

4. Work authorized shall be carried out such that discharges in spawning or nursery areas during spawning seasons shall be avoided, and impacts to such areas shall be avoided or minimized to the maximum extent practicable during all times of the year.
5. Appropriate turbidity controls shall be installed prior to construction, shall be maintained during construction such that no turbidity escapes the immediate dredge area, and shall remain until suspended particles have settled and the water at the work site has returned to normal clarity.
6. No portion of breakwater as measured at normal full lake shall extend more than 50 feet from normal full lake shoreline.
7. The breakwater shall not exceed 3 feet in height (Elev. 507.32) over the normal high water line (Elev. 504.32).
8. The width as measured at the top of the breakwater (Elev. 507.32) shall not exceed 3 feet.
9. This facility is permitted with the condition that future maintenance dredging, if needed, shall not be permitted more frequently than once every 6 years, and that a new permit shall be required for each dredge activity.
10. The owner understands and accepts the risk that if this facility requires dredging to maintain a minimum slip depth of 3 feet, more frequently than once every 6 years, or is shown to have an adverse impact on abutting frontages, it shall be subject to removal.
11. The minimum spacing for pile bents shall be 12 feet as measured center pile to center pile.
12. All activities shall be in accordance with the Shoreland Water Quality Protection Act, per RSA 483-B. The owner is responsible for obtaining any Shoreland Permit that may be required per RSA 483-B, for construction, excavation or fill that will occur within the Protected Shoreland.

EXPLANATION

The NHDES approved this project on April 21, 2020. The NHDES supported its decision with the following findings:

1. The owner, authorized agent or applicant certifies that this permit qualifies for a permit extension in accordance with RSA 482-A:3, XIV-a, and Env-Wt 502.01.
2. This permit has been extended in accordance with RSA 482-A:3, XIV-a and Env-Wt 502.01.

Application file documents are being forwarded to the Governor and the Executive Council in connection with their consideration of this matter pursuant to RSA 482-A:3,II.(a) as it is a major project in public waters of the state.

We respectfully request your approval of this item.

Robert R. Scott
Commissioner

Project Description: Construct a three bedroom cottage, shed, patio and effluent disposal system. Total of permanent impacts equal 2,145. Total of temporary impacts equal 7,399 sq. ft.. Total of impacts proposed 9,544 sq. ft. We are also constructing a breakwater and docking structure along the shoreline to provide two boat slips. Total impact 1,279.5 sq. ft.

The NH Natural Heritage database has been checked for records of rare species and exemplary natural communities near the area mapped below. The species considered include those listed as Threatened or Endangered by either the state of New Hampshire or the federal government. We currently have no recorded occurrences for sensitive species near this project area.

A negative result (no record in our database) does not mean that a sensitive species is not present. Our data can only tell you of known occurrences, based on information gathered by qualified biologists and reported to our office. However, many areas have never been surveyed, or have only been surveyed for certain species. An on-site survey would provide better information on what species and communities are indeed present.

This report is valid through 1/23/2016.
