EXPLANATION

The Department of Environmental Services issued a request for proposals for 2016 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Twelve proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on the available federal funding, the Department determined that it could offer grants to nine source protection planning projects and two source security projects. See attachment A for the proposal rankings and list of reviewers.

The Strafford Regional Planning Commission will use the grant funds to conduct an investigation in partnership with the University of New Hampshire of the vulnerability of public drinking water supplies in Newmarket to saltwater intrusion.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that federal funds no longer become available, General funds will not be requested to support this program.

We respectfully request your approval.

Thomas S. Burack
Commissioner

11.2.2 give the Grantee a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the Grant Amount which would otherwise accrue to the grantee during the period from the date of such notice until such time as the State determines that the Grantee has cured the Event of Default shall never be paid to the Grantee; and

11.2.3 set off against any other obligation the State may owe to the Grantee any damages the State suffers by reason of any Event of Default; and

17.1.2 comprehensive public liability insurance against all claims of bodily injuries, death or property damage, in amounts not less than \$2,000,000 for bodily injury or death any one incident, and \$500,000 for property damage in any one incident; and

17.2 The policies described in subparagraph 17.1 of this paragraph shall be the standard form employed in the State of New Hampshire, issued by underwriters acceptable to the State, and authorized to do business in the State of New Hampshire. Each policy shall contain a clause prohibiting cancellation or modification of the policy earlier than ten (10) days after written notice has been received by the State.

23. ENTIRE AGREEMENT. This Agreement, which may be executed in a number of counterparts, each of which shall be deemed an original, constitutes the entire agreement and understanding between the parties, and supersedes all prior agreements and understandings relating hereto.

EXHIBIT A
SCOPE OF WORK

Strafford Region Planning Commission:

Strafford Region Planning Commission (SRPC) will use New Hampshire Department of Environmental Services (NHDES) grant funds to conduct an investigation in partnership with the University of New Hampshire of the vulnerability of public drinking water supplies in Newmarket to saltwater intrusion.

Specifically, the following tasks will be accomplished:

1. Formation of the Technical Planning Committee

SRPC will organize and facilitate the project planning committee, which will include SRPC staff, UNH PhD student Jayne Knott, and local volunteers, and a member of the NH Climate Adaptation Workgroup (CAW). SRPC will convene the planning committee at key points in the project. These will include: an initial project meeting in June 2016; a review of modeling results and draft maps in January 2017; and a meeting to discuss and comment on SRPC's final report and next steps in May 2017. SRPC will present findings and recommendations to the Town in June 2017. Materials such as draft maps and the final report and minutes from all meetings will be provided to NHDES for review and comment.

2. Information Gathering and Groundwater Modeling Assistance

SRPC will review relevant material and studies completed for the Town of Newmarket and assist UNH with gathering the required data for the groundwater model, including GIS data, census data, and data from NHDES, NH Geological Survey, and the Town Public Works Department and other water suppliers. Data including, but not limited to, hydrology, geology, municipal sewer and water infrastructure, public water supply, well monitoring data, water withdrawal data, population, impervious cover, soil, land cover, sea level rise, LiDAR, known contamination sites (e.g., landfills), active underground storage tanks, septic systems, source water protection areas, and wellhead protection areas will be gathered. SRPC will also review the Town's existing efforts to adapt to climate change.

3. UNH Groundwater Modeling

a. *Model Construction (May 2016 – October 2016)*

UNH will assemble the required data for the groundwater modeling. UNH will create MODFLOW Grid for Newmarket, add SEAWAT to Modflow, review data, and construct the model. A brief narrative of the modeling process and key factors related to accuracy and increments of sea level rise to be modeled will be provided to NHDES for review and comment prior to running the model scenarios.

b. *Model scenarios and presentation of modeling results (November 2016-January 2017)*

UNH will simulate groundwater flow under three scenarios of sea level rise, (specifically 1.6 feet, 3.9 feet and 6.6 feet), identified by the NH Coastal Risks and Hazards Commission, using the U.S. Geological Survey's numerical finite-difference code,

Grantee Initials CJK

MODFLOW, and the variable density flow package SEAWAT. Modeling will reflect the influence of large groundwater withdrawals, including the new Town of Newmarket public water supply well (1731010-008) and incorporate technical data available from NHDES. UNH will present model results to the planning committee. SRPC will notify NHDES (DWGB) of date time and date of the meeting to present the model results.

4. Data Analysis and Preparation of Maps

SRPC will prepare a set of informational maps using the data produced by the groundwater modeling, sea level rise projections for the Lamprey River, and data on drinking water supply sources, well locations, and withdrawal. SRPC will create a saltwater intrusion risk overlay identifying hot spots of vulnerability. SRPC will prepare a set of maps identifying areas where higher groundwater levels introduce new (or exacerbate existing) groundwater threats, such as septic systems, underground storage tanks, and contaminated sites. SRPC will review modeling scenarios and maps with the planning committee and solicit input from the committee. Draft maps will be provided to NHDES for review and comment.

5. Public Outreach and Education

SRPC will attend a Planning Board meeting to inform the Board and residents about the project and will prepare project updates for the Town on a bi-monthly basis. SRPC will present a final report of findings and recommendations to the Town in June 2017. All presentation material will be shared with NHDES.

6. Preparation of a Final Report with Recommended Next Steps

SRPC will prepare a final report for the Town. The final report will consist of the following components: executive summary; overview of local climate change projections; description of the Town's efforts and actions to date that are relevant to climate change; discussion of the hazard; description of the modeling process; set of maps identifying hot spots of vulnerability; discussion of the implications of saltwater intrusion on wells in Newmarket including the social, economic, and environmental impacts; an overview of the general types of strategies and policies to adapt to saltwater intrusion; and recommended next steps for identifying best regulatory and non-regulatory options for the Town.

A detailed description of the modeling process will be included as a technical appendix. The final report will be submitted to NHDES.

Quarterly progress report forms must be completed by grant recipients or their subcontractor and submitted to NHDES every three months, beginning with the first full 3 month quarter after grant approval from Governor & Council.

EXHIBIT B
BUDGET & PAYMENT METHOD

All services shall be performed to the satisfaction of the Department of Environmental Services before payment is made. All payments shall be made upon receipt and approval of stated outputs and upon receipt of the associated invoice. **If the invoice is less than the initial estimate, only the amount on the invoice will be paid.** Payments shall be made in accordance with the following schedule, based upon completion of specific tasks:

Task Number/Description	Source Water Protection Grant
1. Formation of the Technical Planning Committee	\$955
2. Information Gathering and Groundwater Modeling Assistance	\$338
3a. UNH Groundwater Modeling – Model Construction	\$6,536
3b. UNH Groundwater Modeling – Model Scenarios and Presentation of Model Results	\$6,536
4. Data Analysis and Preparation of Maps	\$2,815
5. Public Outreach and Education	\$641
6. Preparation of a Final Report with Recommended Next Steps	\$2,138
TOTAL	\$19,960

EXHIBIT C
SPECIAL PROVISIONS

Subparagraph 1.7 of the General Provisions shall not apply to this Agreement. The comprehensive public liability insurance against all claims of bodily injuries, death, or property damage under Subparagraph 17.1.2 of the General Provisions shall be reduced from \$2,000,000 to \$1,000,000 for bodily injury or death in any one incident. A reduction from the State's standard liability coverage is warranted in light of the minimal risk associated with the activities required under this contract.

Changes to the Scope of Work or reallocation of grant funds require NHDES approval in advance.

Work must be completed by the completion date listed on the grant agreement (section 1.6). Requests for payment along with required proof of work must be submitted no later than 90 days after the completion date or the grant will be closed out and funds will no longer be available.

If a deadline extension is requested, the grantee must make that request for approval at least two months before the completion date. Failure to do so may result in lower rankings of future grant applications.

Federal Funds paid under this agreement are from a Grant to the State from the U.S. Environmental Protection Agency, Drinking Water State Revolving Fund Set-Asides under CFDA #66.468. All applicable requirements, regulations, provisions, terms and conditions of this Federal Grant are hereby adopted in full force and effect to the relationship between this Department and the grantee.
