Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Saco River watershed in April, 2018. The USVLT application was received and on November 28, 2018, DES announced the decision to fund the USVLT project in the Saco River watershed. The project proposed by the USVLT was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

Page 2

The USVLT will use the ARM Funds to conserve the 422-acre property that contains several valuable aquatic resources including 3,150 feet of shoreline on the 167-acre Whitton Pond, 2,200 linear feet of the Chocorua River, four pond-wetland complexes, three floodplain wetlands, and two vernal pools. The property contains High Priority Water Supply Lands identified in the area around the Chocorua River and in the northwest corner of the property. The site has potential to support rare plants and natural communities, such as the boreal transitional dwarf heath shrub bog, as well as holding a continuous breeding site by the Common Loon on Whitton Pond. Attachment B includes a map of the project location.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

Respectfully submitted,

Robert R. Scott, Commissioner

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.
