Summary of Work

The interior metalwork of the cover on Primary Anaerobic Digester # 1 shall be re-coated. The floating digester cover is approximately sixty (60) feet in diameter with a very gentle sloping rise to the center gas collection dome. There is a metal skirt approximately 12 inches wide at the circumference of the cover. The cylindrical gas collection dome which is 6 feet in diameter and approximately 7 feet high is located in the center of the cover. The underside of the cover has a metal plate skin welded to the bottom radial truss system. Seven 4-inch pipe gas mixing lances extend from the ceiling approximately ten feet into the tank which shall be re-coated. The four (4) manholes and lids which penetrate the cover are to be re-coated. There are approximately ten (10) flapper valves to be re-coated, each approximately 8-inches in diameter, evenly distributed around the inside of the concrete tank wall. There are other small appurtenances which are integral parts of the cover and are included in this proposal to be re-coated. Cover may not be removed from tank for re-coating.

Surface Preparation Metal Components

The surface of all metal components to be re-coated shall be prepared according to Steel Structures Painting Council method SP5 - White Metal Blast Cleaning for areas where rust is visible or peeling. The remaining areas shall receive an abrasive brush blast simply to clean the surfaces and create a suitable profile for painting. All materials used in the surface preparation of the components to be re-coated, including but not limited to solvents and blasting grit, must be collected, removed and disposed of by the contractor in accordance with all applicable federal, state and local regulations governing such waste.

Primer Coating Metal Components

No primer coating is needed unless required by product's manufacturer.

Finish Coating Metal Components

Finish coating shall be Sherwin Williams Hi-Mil Sher-Tar Epoxy. No other product will be considered. The color shall be black. The finish coating shall be applied in strict accordance with the manufacturer's instruction for a conventional spray paint application of its product. The finish coating shall be applied to a minimum of 20 mils dry film thickness, in any number of coating applications as recommended by the manufacturer to attain the desired dry film thickness. *Note: WRBP staff will measure the thickness of the existing paint after etching to make sure that the required 20 mils dry film thickness is achieved.*

Acceptance or rejection of work shall be made by WRBP staff, and the contractor shall be responsible for any and all corrective measures required to produce an acceptable coating.

EXHIBIT "A" - Continued THE SERVICES

Contractor Responsibilities

The successful bidder shall provide all labor, materials, services, tools, equipment, transportation and facilities to complete the Scope of Work. It shall be the sole responsibility of the contractor awarded the project to comply with all local, state and federal rules and regulations in the commission of the work requested by this specification. The contractor shall be responsible for the disposal of all waste products in accordance with all local, state and federal rules and regulations governing such materials. All work shall be performed in a neat and workmanlike manner in conformance with best modern trade practices by competent, experienced workers. All materials used shall be applied in strict accordance with the manufacturer's instructions. The contractor will be solely responsible for errors or omissions; therefore, it is recommended that each bidder inspect the area and have project-related questions answered prior to finalizing their quotation. Failure to do so will not relieve the contractor of his obligations under this contract.

Work must be completed during normal treatment plant working hours which are Monday - Friday, 7:00 A.M. to 3:15 P.M. The plant is closed on State Holidays. Since all four digesters are in operation throughout the summer and autumn months, and due to our solids loading at the treatment plant, Primary Digester # 1 will not be available for painting until June 1, 2019. Work shall be completed by June 30, 2019.

Safety

The WRBP operates an active safety program, with a safety committee and safety manual that augments DES Safety requirements. The selected contractor shall comply with all WRBP safety rules, in addition to all applicable state and federal worker safety laws and regulations, including those dealing with confined spaces.

The plant's digester covers are confined spaces (permit required) as per OSHA definition in 29 CFR Part 1910 and the NH Department of Labor Safety Regulations. Attached is Figure 7.1 taken from the WRBP's confined space policy which shows expected hazards and required precautions for these confined spaces. Prior to beginning work, the contractor must provide WRBP a copy of the confined space program that the contractor intends to follow or provide details of the contractor's confined space program. Exhibit C of the contract shall contain a Certification Statement from the contractor stating compliance with OSHA confined space regulations. The contractor is responsible for all the safety equipment and procedures required in Figure 7.1, OSHA, and the contractor's confined space program.

Basis of Award

The WRBP reserves the right to determine what constitutes a conforming proposal; to determine if a firm or individual is qualified; to waive irregularities that it considers not material to the proposal; and award the contract solely as it deems to be in the best interest of the State. Basis of award is the lowest total price submitted from a qualified firm as is in the best interest of the WRBP.

The Contract

The chosen contractor will be under contract to the NHDES. We include herein a blank copy of a standard state service contract (P-37 form), as well as Exhibits A, B and C for the Agreement. Exhibit "A" The Services will be the Scope of Work which describes the services. Exhibit "B" Costs and Terms of Payment is the form with your cost quote for the work. Exhibit "C" Special Conditions provides a form confirming that the firm has a confined space policy which complies with state and federal regulations. It is strongly suggested that you review the general conditions shown on the State contract form (P-37) including the insurance requirements contained in **Item No. 14**. Exhibits A, B, and C shall become part of the contract.

Should your firm be selected for the work, the WRBP will send you a "Notice of Intent to Award" along with a P-37 contract for execution. In addition to this executed P-37 form and the initialed and dated Exhibits A, B, and C, the contract documents included: a "Corporate Resolution" authorizing the signatory to enter into a contract for the work; an insurance certificate meeting the requirements shown in the P-37 listing the NHDES-WRBP as an additional insured; and a "Certificate of Good Standing" from the NH Secretary of State's office. **Be aware that any corporation, individual (sole proprietorship) or partnership doing business with the State must be registered and in good standing with the New Hampshire Secretary of State's Office in order to process a contract.** The contractor will be responsible for providing the WRBP with a current, original certificate issued by the NH Secretary of State dated after April 1, 2018.

**EXHIBIT "A" - Continued
THE SERVICES**

Because it is necessary for the selected contractor to be registered and in good standing with the NH Secretary of State's office, if at the time the contractor receives the "Notice of Intent to Award" the contractor is not registered, the contractor will be allowed fourteen (14) days to complete this task. If at the end of the fourteen (14) days the contractor is not registered, it will be the WRBP's option to disregard the contractor's proposal.

When the required documents are returned, a contract will be processed through the NHDES and the NH Governor and Executive Council, a process that usually requires eight (8) to twelve (12) weeks to complete.

Information contained in the State's Request for Proposals dated October 12, 2018; is hereby included in Exhibit A by reference.
