EXPLANATION

This request is **retroactive** because the Department did not receive the fully executed documents in time for the request to be heard at the December 19, 2018 meeting of the Governor and Executive Council. The purpose of this request is to ensure information on the prevalence of health risk behaviors among New Hampshire residents is available to the Department in order to measure long-term changes in health to the public, which in turn is used to target interventions, measure performance of public health programs and services.

The Behavioral Risk Factor Surveillance Survey is a statewide, random telephone survey of adults that has been conducted each year in New Hampshire for the past twenty years. The survey period begins in January of each year and continues for the next twelve consecutive calendar months without interruption. This survey is administered in all fifty (50) states and is in large part funded by the Centers for Disease Control.

The objective of the Behavioral Risk Factor Surveillance Survey is to measure the prevalence of specific health risk behaviors among New Hampshire citizens as well as to understand their knowledge of both the health risks and health benefits that can be influenced by individual behavior. The telephone survey provides information about health related behaviors at the state and county levels as well as for the Cities of Manchester and Nashua. Information is also collected about the prevalence of health conditions such as asthma, diabetes and cardiovascular disease. No personally identifiable information is collected, and the individuals contacted choose to participate, or to not participate, in the survey.

The information from the survey is used by the Department of Health and Human Services to plan, implement and evaluate health programs and to identify high-risk segments of the population for focused education, outreach and other types of health promotion and disease prevention activities. This information is also used to inform policy makers and the public to assist with setting health program priorities. The Behavioral Risk Factor Surveillance Survey is the only comprehensive source of data for measuring general health status, behavior, prevention and screening in the adult population in New Hampshire.

Should the Governor and Council not authorize this request, information on the prevalence of health risk behaviors among New Hampshire residents will not be available. Furthermore, the Department of Health and Human Services would not be able to measure long-term changes in the health of the public, and thus would be unable to evaluate the performance of its health improvement programs. In extreme situations, the suspension of the Behavioral Risk Factor Surveillance Survey could impede the State's ability to expeditiously gather information to respond to emerging disease outbreaks or natural disasters.

The NH BRFSS program is designed to generate state-wide estimates of NH residents' health behaviors and practices that are linked to the leading causes of morbidity and mortality. The statistics collected will be used by the Division of Public Health Services and other local health agencies for planning and implementing health promotion activities serving about 1.35 million New Hampshire residents.

Examples of State-Wide Usage of BRFSS data:

The BRFSS program is an efficient data gathering tool during times of emergency for assisting NH residents. For example: The 2007 BRFSS survey asked NH residents questions about personal preparedness during a natural disaster. The results indicated that only 54% of households have a three-day supply of water on hand. This information was used to craft outreach and education messages to NH residents and designated September as New Hampshire Preparedness Month.

In 2009 and 2010, questions were quickly added to the BRFSS to monitor vaccination rates for the 2009 H1N1 influenza outbreak as well as flu-like illness.

Area served: Statewide.

Source of Funds: 96.64% Federal Funds from the US Department of Health and Human Services, Centers for Disease Control and Prevention, Centers for Medicaid Services, Substance Abuse Block Grant, Substance Abuse and Mental Health Services Administration, and Health Resources and Services Administration, 2.19% General Funds and 1.17% Other Funds from the University of New Hampshire.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Jeffrey A. Meyers
Commissioner

EXPLANATION

Funds in this agreement will be used to provide telephone survey data collection services as part of the annual Behavioral Risk Factor Surveillance Survey. The Behavioral Risk Factor Surveillance Survey is a statewide, random telephone survey of adults that has been conducted each year in New Hampshire for the past twenty years. The survey period begins in January of each year and continues for the next twelve consecutive calendar months without interruption. This survey is administered in all fifty states and is in large part funded by the Centers for Disease Control.

The objective of the Behavioral Risk Factor Surveillance Survey is to measure the prevalence of specific health risk behaviors among New Hampshire citizens as well as to understand their knowledge of both the health risks and health benefits that can be influenced by individual behavior. The telephone survey provides information about health related behaviors at the state and county levels as well as for the Cities of Manchester and Nashua. Information is also collected about the prevalence of health conditions such as asthma, diabetes and cardiovascular disease. No personally identifiable information is collected, and the individuals contacted choose to participate, or to not participate, in the survey.

The information from the survey is used by the Department of Health and Human Services to plan, implement and evaluate health programs and to identify high-risk segments of the population for focused education, outreach and other types of health promotion and disease prevention activities. This information is also used to inform policy makers and the public to assist with setting health program priorities. The Behavioral Risk Factor Surveillance Survey is the only comprehensive source of data for measuring general health status, behavior, prevention and screening in the adult population in New Hampshire.

In addition to administering the Behavioral Risk Factor Surveillance Survey, ICF Macro, Inc. will conduct a special project for a callback to Behavioral Risk Factor Surveillance Survey respondents who self-identify as asthmatics. The interview period for this asthma callback survey begins in January and continues through the following February.

Should the Governor and Council not authorize this request, information on the prevalence of health risk behaviors among New Hampshire residents will not be available. Furthermore, the Department of Health and Human Services would not be able to measure long-term changes in the health of the public, and thus would be unable to evaluate the performance of its health improvement programs. In extreme situations, the suspension of the Behavioral Risk Factor Surveillance Survey could impede the State's ability to expeditiously gather information to respond to emerging disease outbreaks or natural disasters.

The Department received two (2) proposals. The proposals were reviewed and scored by a team of three (3) individuals with program specific knowledge. Their decision followed a thorough discussion of the strengths and weaknesses of the proposal. The final decision was made through consensus scoring. The Bid Summary is attached.

As referenced in the Request for Proposals and in the contract Exhibit C-1, this agreement has the option to renew for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Executive Council.

The following performance measures will be used to measure the effectiveness of the Agreement:

- Conduct 500 Behavioral Risk Factor Surveillance System interviews monthly (Land-lines & cellphones) of randomly selected eligible New Hampshire adults aged 18 and over.
- Partial completed interviews should not exceed 3.0% of the monthly total surveys completed.
- Maintain a monthly survey response rate of 45.0%.
- Upload a monthly random sample of 10 audio interviews on the ICF web portal to be reviewed by DHHS.

Area served: Statewide.

Source of Funds: 94.113% Federal Funds from the US Department of Health and Human Services, Centers for Disease Control and Prevention, Centers for Medicaid Services, Substance Abuse Block Grant, Substance Abuse and Mental Health Services Administration, and Health Resources and Services Administration, 2.264% General Funds and 3.623% Other Funds from the University of New Hampshire.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted, .

The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and
