Subject: Election Details - New Hampton

New Hampton will:

Process Absentee Ballots on Monday Sept 7 at 1:30 in the upstairs room at the Town Offices (distinct from the Town House);

Require masks of all entering the Town House (our polling place). We will be posting notice of the mask requirement and the option to vote Absentee "curbside" on election day at the Town House;

Have an auxiliary polling area in a tent near the Town House front door for those unwilling or unable to wear a mask who are not willing to vote Absentee. We are notifying the Parties of this separate voting area;

Have one-way traffic going in the front door and out the usual handicap entrance. We have built a new handicap ramp to the front door to make this possible and ADA compliant.

Questions:

Can we count the table with screen in the tent toward our minimum number of booths?

Can we count the table in the tent as one of our two required screens? We think we can fit two inside as well, but may need to eliminate one to assure social distancing and smooth traffic flow.

If an individual delivers his/her own Absentee Ballot at 5:30, must we require them to fill out a new request and Absentee Ballot, or can we accept such a ballot until 7:00? We understand this would not work if delivered by an agent.

Thank you.
