SLLF TECHNOLOGY SUMMIT

Technology and Governance: Meeting Challenges, Seizing Opportunities

October 26-28, 2017 • Los Angeles, California

Program Overview

A technology revolution is well underway, and each year the pace of change accelerates.

Computing has become so inexpensive, fast, and ubiquitous, and communication similarly instantaneous and comprehensive, that much of what we know will change. It is like that moment almost 200 years ago, when steam engines finally became so small and affordable that they appeared everywhere, doing everything, and the world of work was transformed. Consumer and industrial goods became much less expensive, thus powering *further* innovation. Fortunes were made, standards of living shot up. But for many people, work or home life were disrupted.

The same thing is happening today, now that computing and instant communication are integrated into every part of our lives. We are in the midst of the most thorough revolution in two centuries. Legislators and other policy makers need to well understand what is happening, to have any hope of keeping up with society's needs.

Likely we will return to this subject in coming years. This year, we have assembled the most pressing topics for your attention, and we'll discuss the most important insights in each. We'll give you an overview of the forces reshaping our economy and society; look at the very newest technologies; discuss how to facilitate high economic growth, how to adapt to modern social media, and how to use "big data" analytics; brainstorm using these innovations to improve our policy making, our economic development, and our engagement with citizens; and examine our vulnerability to cyber attack.

All of these issues are barreling down the highway; there is no way to avoid them without being run over in an unpleasant way. Join us so that you can be on the bus rather than under it!

Program Objectives

- *Understand how our economy and society are being fundamentally reshaped by technology, computing and high-speed communications.*
- *Understand how to facilitate high economic growth in this environment, and use the new capabilities to increase engagement with citizens.*
- *Understand how modern analytics can improve our policy-making.*
- *Understand the vulnerabilities of our critical infrastructure to hostile actors, and what we need to do to achieve security.*

SLLF TECHNOLOGY SUMMIT

Technology and Governance: Meeting Challenges, Seizing Opportunities

October 26-28, 2017 • Los Angeles, California

AGENDA

THURSDAY, OCTOBER 26, 2017

- After 3:00 pm** **Check-In**
Hotel Indigo Los Angeles Downtown
899 Francisco St, Los Angeles, CA 90017
Phone: (213) 232-8800
- 6:00 - 7:30 pm** **Opening Reception**
Hotel Indigo - 18 Social (Rooftop lounge)

FRIDAY, OCTOBER 27, 2017

- 7:00-8:30 am** **Buffet Breakfast**
Hotel Indigo
- 8:45-9:00 am** **Introduction and Welcome**
Stephen G. Lakis, SLLF
Cathilea Robinett, Governing Magazine
- 9:00-10:00 am** **A Second Machine Age: How Technology is Transforming America**
- Almost 200 years ago, steam engines became so small and inexpensive that they were suddenly used everywhere, transforming the world of work, and the rest of life as well. Today we have reached a similar point regarding computing and communications. Both are so fast, inexpensive, and ubiquitous, that every aspect of life is being transformed.
- Machine decision-making can be embedded in almost anything, no matter how small. Instantaneous communication means that anything that can be digitized, can be sent nearly anywhere, at almost no cost.
- How can government assist with the positive aspects of these changes? How can it use them to improve governing? What negative changes should it try to ameliorate, and how?
- 10:00-10:15 am** **Break**

10:15-11:45 am

Tomorrow's Technologies: Ready to Reshape Everything

Participants will explore and experience Virtual Reality (VR), Augmented Reality (AR), Mixed Reality (MR) and other emerging technologies. The world of interactive gaming has broad applications, potentially useful to decision-making and collaboration. Data can “come to life” in ways that make it more useful for more parties.

11:45 am -12:45 pm

Lunch

12:45-1:30 pm

Helping the Information Flow: Facilitating High Economic Growth

In the emerging economy, facilitated by nearly instantaneous communication to nearly anywhere, tiny companies, medium-sized ones, and very large ones can all connect with potential customers much more easily than in the past, and grow more easily than in the past. What do states need to do to ensure this can happen? What policies help ensure that all parts of a state can benefit from these trends?

1:30-2:15 pm

Connections: The Potential and the Problems of Social Media

Nowhere has technology changed America more than in how we communicate. A century ago, we wrote letters. Fifty years ago we paid dearly to call one person on a phone tethered to the wall. Today, our thoughts, ideas, and concerns can be spread around the world instantaneously, usually in cartoons, memes, pictures, or in 140 characters or fewer. Constituents, corporations, consumers, and legislators all work, live and play in a world where information, both true and false, is at everyone's fingertips, and communication, accurate or inaccurate, can be shared instantaneously. How does this new world influence legislators? Legislation? Leaders?

2:15-2:30 pm

Break

2:30-3:15 pm

Today's Analytics: Better Data Means Better Policies

Some states have already used analytics (the analysis of “big data”) to improve policies and policy outcomes. Such analysis can be used to fashion effective policies, or to evaluate the effectiveness of policy proposals. We'll look at examples.

3:15-4:00 pm

Breakout Sessions

A: Using Technology to Make Better Decisions

B: Using Technology to Spur Economic Development

C: Using Technology to Engage Constituents and Customers

Participants will work with faculty to apply the technologies discussed today, to these three specific challenges. They will propose specific steps and efforts that would help them be more effective in these areas.

4:15 pm

Return to Hotel

6:00 pm

Reception and Dinner

Nick & Stef's Steakhouse
330 South Hope Street
Los Angeles, CA

SATURDAY, OCTOBER 28, 2017

7:00-8:30 am

Buffet Breakfast

Hotel Indigo

8:30-10:00 am

Cyber Threats: To our Data, our Economy, and our Security

Our decentralized economic and political systems have always been open to tampering by people trying to steal money, information, or votes. However, our increasing reliance on technology and shared data storage has made these threats greater and more sinister than before. We will explore the threats and discuss strategies for dealing with them. Is your state doing what it should be?

10:00-10:15 am

Break

10:15-11:45 am

Cyber Threats: To our Democracy

Nothing is more central to democracy than free and fair elections. Even the perception – accurate or not – that elections are not fair could spell the end of our two centuries-old democracy. We know now of technology-based efforts to affect the 2016 election in at least 21 states, so this issue is real and timely. What are states doing to protect themselves from such attacks, and what should you be doing in your state?

11:45 am -12:00 pm

Conclusion

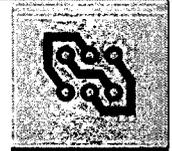

We will discuss the key learnings of our two days together, related to our changing economy; providing modern information infrastructure; using analytics; the newest technologies; and ensuring cybersecurity.

SLLF TECHNOLOGY SUMMIT

Technology and Governance: Meeting Challenges, Seizing Opportunities

October 26-28, 2017 • Los Angeles, California

REGISTRATION INFORMATION

Registration Deadline: September 27

- **WHAT COSTS ARE COVERED FOR LEGISLATIVE LEADERS?**

SLLF will cover two nights lodging at the Hotel Indigo (October 26-28), all scheduled meals, and we will reimburse up to \$850 for your transportation.
