CONTRACT SUPPLEMENTAL INFORMATION SHEET

PROJECT: BPW Project No. 80853, Contract B – Glencliff Access Tunnel Repair and Steam Line Project, Benton, New Hampshire.

DESCRIPTION: Work of the Project consists of furnishing all construction services and materials necessary and required to complete the construction and installation of steam lines from the biomass facility to the laundry building and closure of the existing main access tunnel at the Glencliff Home located in Benton, New Hampshire.

EXPLANATION: This work is required to close the main access tunnel because it is structurally failing. It is located under the only main drive into and out of the Glencliff Home Facility. In order to properly close the tunnel, all utilities, including the existing steam lines that feed the laundry and the telecommunications lines that feed the lower portion of the campus must be relocated. These will be relocated as part of this project.

UNDER ESTIMATE

EXPLANATION: There were two bids received and both were high. The scope of work was reduced to be within budget.

ALTERNATES

EXPLANATION: The work of Alternate 1 included the selective demolition and replacement of condensate piping and steam traps for five (5) dryers in the Laundry Building. This work was kept in the project because it will result in energy savings.

RE: Glenclyff Access Tunnel Repair and Steam Line Project – 80853-B

Beverly,

In an effort to reduce the overall cost of the project so that we may proceed with award and construction AJC is offering the following negotiated schedule of values;

Base Bid Item #2 – Remove Existing Steam and Install New Steam and Condensate Piping System to Laundry

- A. Concrete Pre-cast Pump Structure Outside of the Existing Laundry Building – By setting a pre-cast structure outside of the existing laundry building with appropriate access hatch, the Department would save approximately **\$18,000.00**.
- B. Mechanical Equipment Adjustment – Deduct **\$7,700.00** (Refer to attached Table 1)

Base Bid Item #3 – Remove Existing Steam and Install New Gas Fired Boiler System in Rec Hall

- A. This contract item will be eliminated in its entirety

Base Bid Item #4 – Re-route and Extend Electrical and Telephone Communications

- A. Eliminating the inner duct from the overhead communications lines and lashing the communications cables directly to the messenger there would be an approximate savings of **\$5,000.00**.
- B. Removal of electrical work associated with Rec. Hall (Contract Item #3) – Remove **\$1,270.00** from Contract Item #4 which was incorrectly allocated at bid time.

Base Bid Item #6 – Allowance #2 for Bid Item #3 – Recreation Hall Boiler System Work

- A. This contract item to be eliminated in its entirety
