EXPLANATION

This request is **Sole Source** because the Contractor is the only vendor able to provide the necessary services. As previously stated, the original contract was approved by Governor and Council on June 1, 2016 (Item #37).

The purpose of this request is to continue providing the Department with a hosted, secure, web-based home visiting software system that includes support and maintenance services.

The Department provides statewide home visiting services in eleven (11) at-risk communities across the state through contracts with community health and social service agencies. The Maternal, Infant and Early Childhood Home Visiting Program uses the Healthy Families America Model. Healthy Families America is an evidence-based voluntary home visiting model that embodies the belief that early nurturing relationships are the foundation for lifelong health development. It is family-centered, culturally sensitive, strength based and proven effective in promoting healthy child development and preventing child abuse and neglect. The Healthy Families America Model is equipped to work with families who are most at-risk of child maltreatment and adverse childhood experiences due to a history of trauma, intimate partner violence, mental health disorders and/or substance misuse.

Social Solutions Global, Inc. provides the software to collect and manage data and reporting for this program. Community-based home visitors use this software program to enter client and services data, as well as data related to case management and performance measures. The Division of Public Health Services uses the software to manage the statewide program and to create Federal reports on benchmarks and performance measures on topics such as maternal

depression, tobacco cessation, reduction of child maltreatment and child injuries and child development screens. Continual access to the system's data is essential to demonstrate program quality and deliverables required for the federal funding.

Social Solutions Global's effectiveness in delivering services will continued to be measured through monitoring of the following performance measures:

- Work plan, status reports and meetings;
- Custom support plan;
- Custom report specifications;
- Access to Efforts to Outcomes System for State personnel and provides;
- Ongoing hosting tech support and maintenance; and
- Training plan for users.

As referenced in Section 1. Contract Documents, Subsection 1.3 Contract Terms of the original contract, the parties have the option to extend the agreement for up to five (5) years, subject to the continued availability of funds, satisfactory performance of services and approval by the Governor and Executive Council. The Department is in agreement with renewing services for two (2) of the five (5) years at this time.

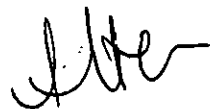

Should the Governor and Executive Council not approve this request; the Department will not be in compliance with federal legislation requiring the monitoring and evaluation of the delivery and effectiveness of the home visiting program, which would impact the ability to obtain future federal funds.

Area served: Statewide

Source of Funds: 50% Federal Funds from the US Department of Health and Human Services, Health Resources and Services Administration; Maternal, Infant & Early Childhood Home Visiting Grant Program, CFDA #93.870, FAIN X10MC32206 (exp. 9/29/2020), X10MC33595 (exp. 9/29/2021), and FAIN TBD (exp. 9/29/2022); and 50% Other Funds (Governor Commission Funds).

In the event the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Ann H. Landry,

EXPLANATION

The purpose of this **sole source** agreement is to provide the Maternal, Infant & Early Childhood Home Visiting Program with a hosted, secure, web-based home visiting software system which includes support and maintenance services.

This agreement is **sole source** because the vendor developed and has been providing the Maternal, Infant & Early Childhood Home Visiting Program's proprietary data system in strict accordance with Federal benchmark and performance measures requirement. The Maternal, Infant & Early Childhood Home Visiting Program requires a secure, web-based, scalable, easily modifiable, standardized data system that is able to align with other maternal and child health and early childhood data. In addition, Federal benchmark and performance measures are being revised, thus requiring the development of new reports prior to the October 2016 reporting deadline. Social Solutions Global, Inc. is uniquely able to assist the Maternal, Infant & Early Childhood Home Visiting Program to meet these fast changing Federal requirements for improved quality assurance and evaluation of home visiting services.

The Maternal, Infant & Early Childhood Home Visiting Program provides statewide home visiting services in 11 at-risk communities across the state through contracts with community health and social service agencies. The Maternal, Infant & Early Childhood Home Visiting Program uses the Healthy Families America Model. Healthy Families America is a research-based voluntary home visiting model that embodies the belief that early nurturing relationships are the foundation for lifelong health development. It is family-centered, culturally sensitive, strength based and proven effective in promoting healthy child development and preventing child abuse and neglect.

The Healthy Families America Model is equipped to work with families who are most at-risk of child maltreatment and adverse childhood experiences due to a history of trauma, intimate partner violence, mental health disorders and/or substance misuse. The most vulnerable populations of young families including low income mothers less than 21 years of age and those with a history of substance misuse or child abuse. Services are provided prenatally or shortly after the birth of a baby and are offered voluntarily and intensively over a three year span.

Social Solutions Global, Inc. provides the software to collect and manage data and reporting for this program. Community-based home visitors use this software program to enter client and services data, as well as data related to case management and performance measures. The Division of Public Health uses the software to manage the statewide program and to create Federal reports on benchmarks and performance measures on topics such as maternal depression, tobacco cessation, reduction of child maltreatment and child injuries and child development screens

Social Solutions Global has met previous performance measures by completing the implementation schedule consisting of activities, deliverables and milestones to satisfaction. Deliverables included providing software configuration by week 11, deliver a user operational manual and support plan by week 12 and complete custom reports by week 21.

This contract contains language which allows the Department the option to renew the contract for up to five (5) additional years, subject to the continued availability of funds, satisfactory performance of services and approval by the Governor and Executive Council.

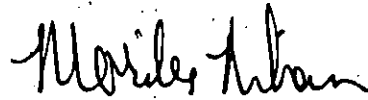

Should Governor and Executive Council not approve this request, the Department would not be in compliance with federal legislation which requires the monitoring and evaluation of the delivery and effectiveness of the home visiting program.

Area Served: Statewide

Source of Funds: 100% Federal Funds from the US Department of Health and Human Services, Health Resources and Services Administration, Maternal, Infant and Early Childhood Home Visiting Grant. (CFDA# 93.505, FAIN# X02MC27409 & X02MC28234, and CFDA# 93.870, FAIN# X10MC29490).

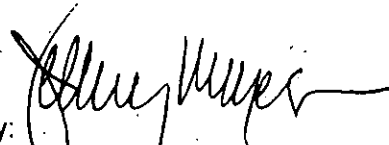

In the event that the federal funds become no longer available, no further general funds will be requested to support this contract.

- d. The Business Associate shall not, unless such disclosure is reasonably necessary to provide services under Exhibit A of the Agreement, disclose any PHI in response to a request for disclosure on the basis that it is required by law, without first notifying Covered Entity so that Covered Entity has an opportunity to object to the disclosure and to seek appropriate relief. If Covered Entity objects to such disclosure, the Business Associate shall refrain from disclosing the PHI until Covered Entity has exhausted all remedies.
- c. If the Covered Entity notifies the Business Associate that Covered Entity has agreed to be bound by additional restrictions over and above those uses or disclosures or security safeguards of PHI pursuant to the Privacy and Security Rule, the Business Associate shall be bound by such additional restrictions and shall not disclose PHI in violation of such additional restrictions and shall abide by any additional security safeguards.

(3) Obligations and Activities of Business Associate.

- a. Business Associate shall report to the designated Privacy Officer of Covered Entity, in writing, any use or disclosure of PHI in violation of the Agreement, including any security incident involving Covered Entity data, in accordance with the HITECH Act, Subtitle D, Part 1, Sec.13402.
- b. The Business Associate shall comply with all sections of the Privacy and Security Rule as set forth in, the HITECH Act, Subtitle D, Part 1, Sec. 13401 and Sec.13404.
- c. Business Associate shall make available all of its internal policies and procedures, books and records relating to the use and disclosure of PHI received from, or created or received by the Business Associate on behalf of Covered Entity to the Secretary for purposes of determining Covered Entity's compliance with HIPAA and the Privacy and Security Rule.
- d. Business Associate shall require all of its business associates that receive, use or have access to PHI under the Agreement, to agree in writing to adhere to the same restrictions and conditions on the use and disclosure of PHI contained herein, including the duty to return or destroy the PHI as provided under Section (3)b and (3)k herein. The Covered Entity shall be considered a direct third party beneficiary of the Contractor's business associate agreements with Contractor's intended business associates, who will be receiving PHI pursuant to this Agreement, with rights of enforcement and indemnification from such business associates who shall be governed by standard provision #13 of this Agreement for the purpose of use and disclosure of protected health information.
- e. Within five (5) business days of receipt of a written request from Covered Entity, Business Associate shall make available during normal business hours at its offices all records, books, agreements, policies and procedures relating to the use and disclosure of PHI to the Covered Entity, for purposes of enabling Covered Entity to determine Business Associate's compliance with the terms of the Agreement.

- f. Within ten (10) business days of receiving a written request from Covered Entity, Business Associate shall provide access to PHI in a Designated Record Set to the Covered Entity, or as directed by Covered Entity, to an individual in order to meet the requirements under 45 CFR Section 164.524.
- g. Within ten (10) business days of receiving a written request from Covered Entity for an amendment of PHI or a record about an individual contained in a Designated Record Set, the Business Associate shall make such PHI available to Covered Entity for amendment and incorporate any such amendment to enable Covered Entity to fulfill its obligations under 45 CFR Section 164.526.
- h. Business Associate shall document such disclosures of PHI and information related to such disclosures as would be required for Covered Entity to respond to a request by an individual for an accounting of disclosures of PHI in accordance with 45 CFR Section 164.528.
- i. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.
- j. In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Covered Entity shall have the responsibility of responding to forwarded requests. However, if forwarding the individual's request to Covered Entity would cause Covered Entity or the Business Associate to violate HIPAA and the Privacy and Security Rule, the Business Associate shall instead respond to the individual's request as required by such law and notify Covered Entity of such response as soon as practicable.
- k. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. If return or destruction is not feasible, or the disposition of the PHI has been otherwise agreed to in the Agreement, Business Associate shall continue to extend the protections of the Agreement, to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as Business Associate maintains such PHI. If Covered Entity, in its sole discretion, requires that the Business Associate destroy any or all PHI, the Business Associate shall certify to Covered Entity that the PHI has been destroyed.

(4) Obligations of Covered Entity

- a. Covered Entity shall notify Business Associate of any changes or limitation(s) in its Notice of Privacy Practices provided to individuals in accordance with 45 CFR Section 164.520, to the extent that such change or limitation may affect Business Associate's use or disclosure of PHI.

- b. Covered Entity shall promptly notify Business Associate of any changes in, or revocation of permission provided to Covered Entity by individuals whose PHI may be used or disclosed by Business Associate under this Agreement, pursuant to 45 CFR Section 164.506 or 45 CFR Section 164.508.
- c. Covered entity shall promptly notify Business Associate of any restrictions on the use or disclosure of PHI that Covered Entity has agreed to in accordance with 45 CFR 164.522, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

(5) Termination for Cause

In addition to standard provision #10 of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I. The Covered Entity may either immediately terminate the Agreement or provide an opportunity for Business Associate to cure the alleged breach within a timeframe specified by Covered Entity. If Covered Entity determines that neither termination nor cure is feasible, Covered Entity shall report the violation to the Secretary.

(6) Miscellaneous

- a. Definitions and Regulatory References. All terms used, but not otherwise defined herein, shall have the same meaning as those terms in the Privacy and Security Rule, and the HITECH Act as amended from time to time. A reference in the Agreement, as amended to include this Exhibit I, to a Section in the Privacy and Security Rule means the Section as in effect or as amended.
- b. Amendment. Covered Entity and Business Associate agree to take such action as is necessary to amend the Agreement, from time to time as is necessary for Covered Entity to comply with the changes in the requirements of HIPAA, the Privacy and Security Rule, and applicable federal and state law.
- c. Data Ownership. The Business Associate acknowledges that it has no ownership rights with respect to the PHI provided by or created on behalf of Covered Entity.
- d. Interpretation. The parties agree that any ambiguity in the Agreement shall be resolved to permit Covered Entity to comply with HIPAA, the Privacy and Security Rule and the HITECH Act.
- e. Segregation. If any term or condition of this Exhibit I or the application thereof to any person(s) or circumstance is held invalid, such invalidity shall not affect other terms or conditions which can be given effect without the invalid term or condition; to this end the terms and conditions of this Exhibit I are declared severable.
- f. Survival. Provisions in this Exhibit I regarding the use and disclosure of PHI, return or destruction of PHI, extensions of the protections of the Agreement in section 3 k, the defense and indemnification provisions of section 3 d and standard contract provision #13, shall survive the termination of the Agreement.

Party Responsibilities

Customer/User Responsibilities

Administrators are expected to receive individualized training from a member of their SSG Implementation Team and/or attend the 3 Day Administrator Orientation or 4 Day Virtual Administrator Orientation before they begin contacting Customer Support. Non-administrator users also have a responsibility to receive training to obtain an understanding of the features prior to utilizing Customer Support. (Customer Support provides free online and recorded trainings through our online Help Manual and Knowledge Base.) The user also has a responsibility to know what it is they need when contacting Support; the customer/user should contact their System Administrator/Site Manager if they are uncertain of or unable to clearly describe their needs.

Customer Support Responsibilities

The Customer Support Representative is responsible for gathering the customer/user's information and for determining their needs by listening and asking clarifying questions. When evaluating the needs of the customer/user, it is our responsibility to determine whether the question or issue can be resolved in less than 20 minutes. If yes, the Representative should continue to assist. If no, the customer/user may be scheduled for advanced support with a more senior member of the team and/or forwarded on to their Account Manager to discuss paid training/consulting options when appropriate.

Customer Support: Basic Support

When users contact Customer Support, a case will be entered into our Customer Relationship Management (CRM) system resulting in a unique case number. This case number will be provided to the customer and will be left open until the case is resolved. Each time a user contacts Support with a different question or issue a new case will be entered into the CRM system.

When contacting Support via email, Customer Portal or web form (during normal business hours):

If a user emails Customer Support or submits a case online they will receive an automatic response with the case number.

Response Time for Basic Email/Portal Support

Response times may vary and is highly dependent upon the volume of cases Support is working on with all customers. Our initial target response time ranges depending on the priority of the case submitted. See below for details and definitions of case priorities and target response times:

- **Critical/Business Down** – Critical/Business Down cases apply to a service being stopped or so severely impacting you with no acceptable workaround that you cannot reasonably continue business operations. Critical/Business Down cases apply to reports due within a limited time frame, removal of users for security purposes the software, features or reports not functioning causing possible data loss, data corruption, or significant financial impact. Customers reporting Critical/Business Down cases should be readily available for additional follow up questions or troubleshooting. Target response time for Critical/Business Down cases is one business hour.
- **High** - Your use of the software is continuing but there is a serious impact on business operations. You are reporting that the software is operational with one or more important features unavailable with no acceptable workaround. High priority requests can apply to time sensitive cases or cases that require significant investigation and need to be addressed quickly. Target response time for High priority cases will be business two hours.
- **Medium** - Your use of the software is continuing but there is a moderate impact on business operations. User is reporting that the software is operational with one or more important features unavailable but there is an acceptable workaround. Medium priority requests can apply to time sensitive cases or cases that require significant investigation and need to be addressed quickly. Target response time for Medium priority cases will be 16 business hours.
- **Low** - Software is operational with problems or errors which have little impact on system operations. There is no time limitation involved and the response will not impact immediate business operations. Low priorities can apply to enhancement requests, questions on best practice, request for more information on a specific feature, spelling or grammar errors or comments on the software. Target response time for Low priority cases will be one business day.

In order to provide the highest level of service to all our customers, Critical/Business Down cases will be reviewed first; if the case does not meet the definition of a Critical/Business Down case then the response will be based on the actual priority of the question, request or concern.

If a case is not submitted through our designated contact us pages or the portal, the priority will default to Medium unless it explicitly states otherwise within the subject of the message. Case priorities can be adjusted after the case has been submitted if additional information is provided/discovered that causes the priority to either increase or decrease. If the case priority is adjusted by a Customer Support Representative, the representative will notify you of the change and provide an explanation for the change.

When contacting Support via chat (during normal chat business hours):

Chat is answered in real time in the order in which they are received. (If no representatives are available your question will be sent via email and it will be answered in the order in which it's received – see email response times for more information.) For all chat interactions, our goal is to answer the user's question(s) while on chat. If for some reason this is not possible, the targeted response time for following up on a chat with questions left unanswered ranges from 2 hours to one business day depending on the level of research needed to investigate and answer the user's question. The response time may be longer if the case is escalated to a higher level support team member, but the customer will receive updates while the representative continues to work on the case. We strongly recommend that users do not use Chat support for more complex questions or issues, such as ETO Results related questions or troubleshooting technical issues on your computer such as the inability to open a report. These types of questions are handled much more easily via phone or email.

When contacting Support via phone (during normal business hours):

Calls are taken in real time and are answered in the order in which they were received. (Please note, if you are waiting in the queue for the next available representative and wish to leave a voicemail, the next available representative will respond to the voicemail, typically within one hour.) For all phone interactions, our goal is to answer the user's question(s) while on the phone. If for some reason this is not the case, the targeted response time for following up on a call with questions left unanswered ranges from 4 hours to one business day depending on the level of research needed to investigate and answer the user's question. The response time may be longer if the case is escalated to a higher level support team member, but the customer will receive updates while the representative continues to work on the case.

Resolution Time for Basic Support

Our targeted support (non-development related issue) resolution time is 8 business hours from initial response (this does not include time when the support representative is waiting for a response from the customer). Please note our resolution time is highly dependent on the detailed information provided by the user/customer.

Customer Support: Advanced Support Offerings

Social Solutions offers three additional levels of advanced support to respond to the unique client needs. These advanced support offerings provide customers with 1:1 assistance for *fully trained* ETO Administrators (see Customer/User Responsibilities above). This type of support typically lasts 30-60 minutes and is scheduled once a Customer Support Representative assesses that the particular case may be too complex to be resolved in a normal tier 1 support interaction. Each customer may receive between 2 and 8 hours per quarter of advanced support sessions per quarter related to general ETO questions and ETO Results related inquiries depending on the level of support selected. Additionally, there is between 3 and 6 additional hours per quarter in advanced support for data quality reporting and cleanup, as well as ETO Admin Certification, pre-release webinars and pre-release webinar follow up, which vary depending on the level of support selected. Additional needs may be discussed with the Account Management team. The limit for advanced support is per organization/customer and not per administrator. ***For specific details on each level of Advanced Support, refer to the table on page 2 of this document.***

Availability of Advanced Support

Social Solutions Customer Support is able to provide support up to 24 hours per day, 7 days per week for calls regarding general ETO questions. Targeted response times are enhanced although they still vary depending on the availability of the customer and the Advanced Support Representative.

Response and Resolution Time for Advanced Support

Response and resolution times may vary and is highly dependent upon the volume of cases Support is working on with all customers. Our target response time ranges from 1 hour to one business day depending on the severity of the issue and the level of advanced support selected. Our targeted support (non-development related issue) resolution time is 8 business hours (this does not include time when the support representative is waiting for a response from the customer). Please note our resolution time is highly dependent on the detailed information provided by the user/customer.

Advanced Support for ETO Results

ETO Administrators requiring Advanced Support with ETO Result are required to complete either the ETO Results Intermediate (8 hour) classes prior to receiving advanced support. The Orientation is a historical course and new administrators will be referred to the Intermediate course. The pre-requisite to the Intermediate course is either the 4-hour Results Orientation (live version) or the Self-Paced Orientation (free), and evidence of report building proficiency.

Advanced support calls related to ETO Results are typically scheduled within a week to 10 days, depending on availability of both the customer and the ETO Results specialist. *Peak reporting seasons may result in a longer wait time.*

Advanced Support for ETO Results consists of the following services under the advanced support offerings:

- One-on-One Advanced Session (1 hour per session)
- Data analysis based on case requirements which could otherwise be conducted by the customer
- Report building outside of an Advanced Session, as determined by reporting requirements. This will only be implemented after at least one One-on-One session has been conducted with the customer.
- Research related to any aspect of desired report issues

Once the maximum hours available under the applicable tier have been exhausted during any quarter, the customer will be referred to their Account Manager to purchase additional consulting hours or they may choose to wait until the next quarter when their limit resets.

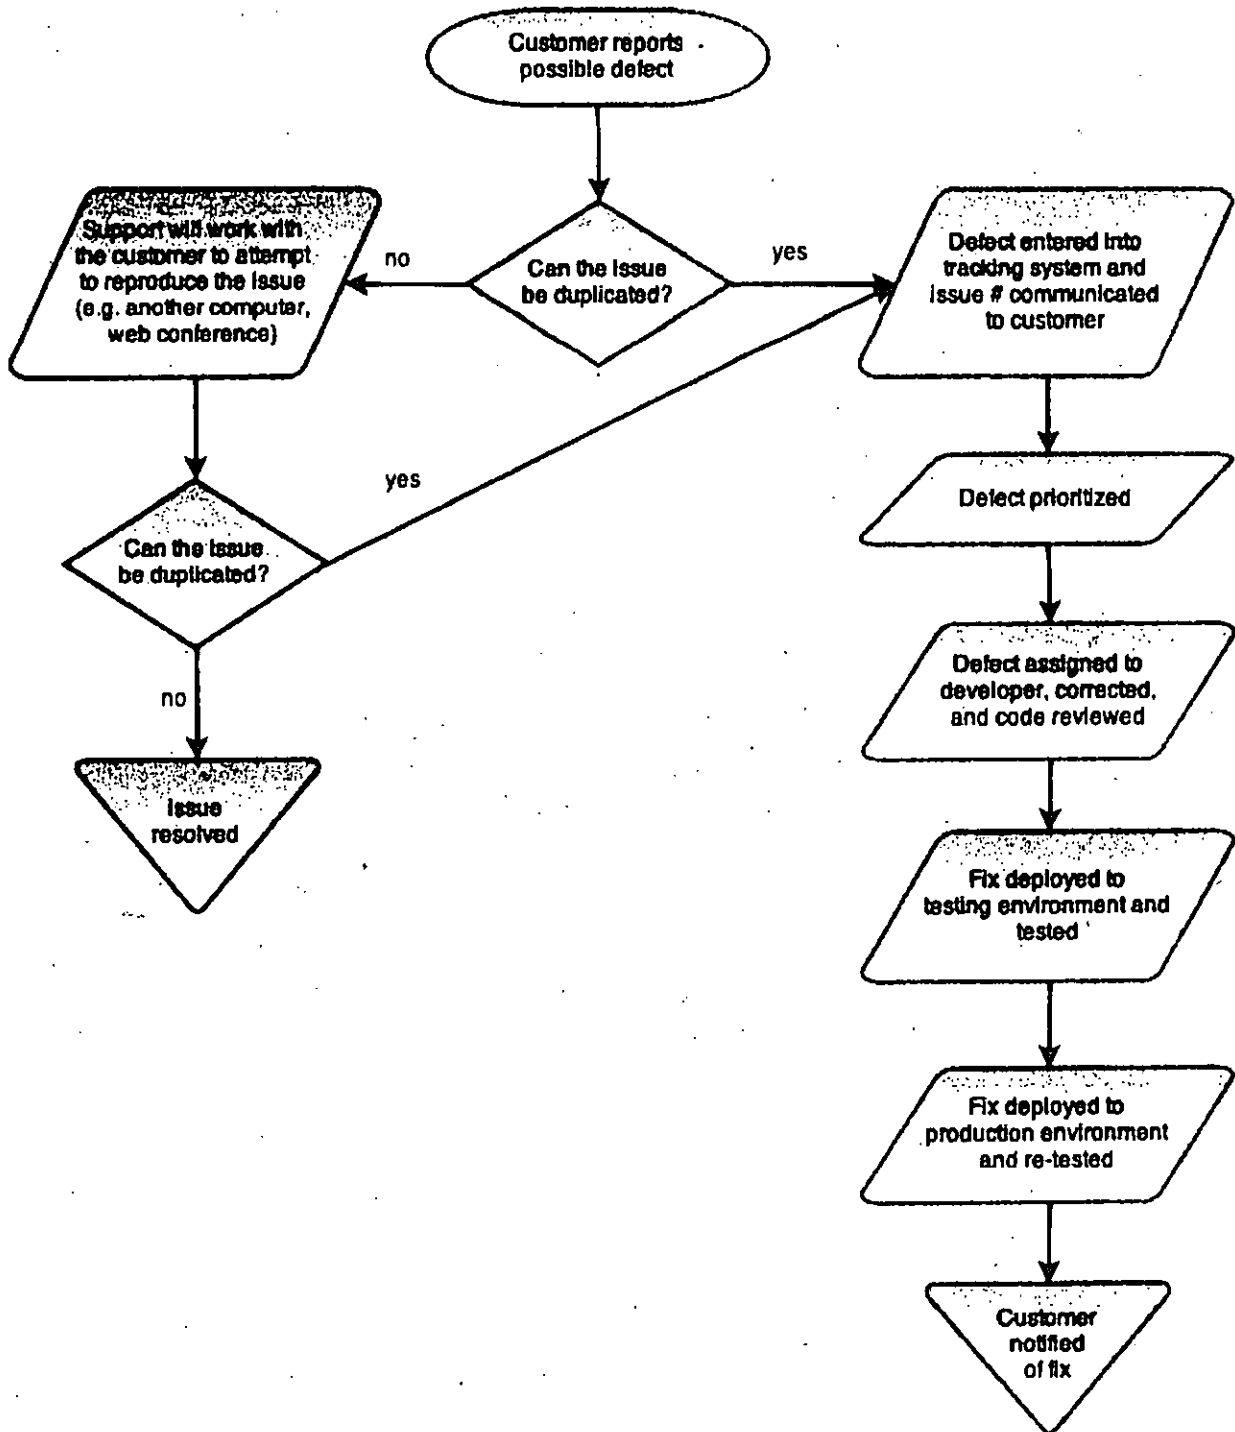

Customer Support: Issues/Defects

An issue or defect is an error, flaw, mistake, or failure in the software. If the user is experiencing something that they believe to be an issue in the software, the user should contact Customer Support and provide detailed instructions on how to reproduce the problem. A representative will login as/with the user to diagnose the issue and determine if it is a defect.

When users contact Customer Support with a potential issue, a case will be entered into the CRM system. If it is determined that the reported problem is a defect or issue, an issue will also be logged in the system in addition to the case. The customer will be given an issue number to track the defect. The representative will assign a severity to the issue based on the criteria described below; the resolution time is highly dependent on the severity. A customer has the right to provide feedback regarding the severity of the issue based on the priority for their organization. Each time a user contacts support with a different issue, a new case number and an issue number will be provided to the customer. The customer will receive communication from Customer Support on the status of the issue based on the criteria set below.

Social Solutions Development Team typically deploys three to four major updates/releases to the Software per year, along with monthly maintenance releases. Customers are given advanced notification of maintenance periods and upcoming updates on the login page and via an e-newsletter.

Below is a flowchart outlining the process Customer Support Representatives follow for issues:

Issue/Defect Priorities

There are four levels of severity for issues. Each issue is prioritized based on its severity level.

Severity 1 "SHOW-STOPPER"	Major functionality issue that prevents customer from being able to use software	The Development Team works to resolve these issues immediately with a target resolution of 2 business days or less.	Customer Support will provide <u>daily</u> updates of the status of the issue until such time as the issue is resolved. Escalation of the issue to the COO will occur if issue is not resolved within the target resolution time.
Severity 1 "NON SHOW-STOPPER"	Major functionality issue which does not have a work-around that is key to ETO's performance and causes major impact to customer's ability to operate their organization.	The Development Team works to resolve these issues immediately with a target resolution of 10 business days.	Customer may elect to have Customer Support provide updates on a daily, every other day, or whenever there is an update in the defect's remediation. Escalation of the issue to the COO will occur if issue is not resolved within the "target" resolution time.
Severity 2	A major function does not work in a core area of ETO, but there is a workaround. However, the workaround is time consuming.	The Development Team will fix within its normal release cycle. The target is to fix these issues within 30-120 days.	Customers will receive an automated update when the issue resolution is scheduled to be deployed.
Severity 3	Minor functionality less key to ETO is not working or there is functionality that is not working but there is an easy workaround.	These issues will be targeted to be addressed when there is work being done in the functional area that contains the defect. Issue can be categorized as a higher priority if it's affecting a large number of customers.	Status will be provided via customer portal and customers will receive an automated update when the resolution is scheduled to be deployed.
Severity 4	Cosmetic or inconsistency issues that do not affect functionality in any significant way.	These issues will be targeted to be addressed when there is work being done in the functional area that contains the defect.	Status will be provided via customer portal and customers will receive an automated update when the resolution is scheduled to be deployed.

Resolution Time for Issues/Defects

These targeted resolution times only apply to core functionality, except if the functionality affected is completely hindering a user's ability to work and use the software.
